The language proposed for inclusion in the 1991 appropriations acts is printed following the account title. Language for 1990 appropriations, printed in roman type, is used as a base. Brackets enclose material that is proposed for deletion; italic type indicates proposed new language. At the end of the final language paragraph, and printed in italic within parentheses, are citations to any relevant authorizing legislation and to the specific appropriations act from which the basic text of the 1990 language is taken. Where appropriate, a note follows the language indicating that the budget authority proposed is for continuing activities for which additional appropriations authorization is or has been proposed. An illustration of proposed appropriations language for 1991 follows:

OPERATING EXPENSES

For necessary expenses of the Office of Climate Information, [$30,290,000] *$28,870,000* of which [$150,000] *$400,000* shall remain available until expended. (*34 U.S.C. 218 et seq.; Department of Government Appropriation Act, 1990.*)

The language proposed for general provisions is presented in the same fashion, except that the previously enacted language is not shown where whole sections or subsections of language are proposed for deletion.

BASIS FOR SCHEDULES

The 1989 column of this budget generally presents the actual transactions and balances for that year, as recorded in agency accounts.

For 1990, the regular schedules include enacted appropriations. In addition, indefinite appropriations are included on the basis of amounts likely to be required.

The 1991 column of the regular schedules includes proposed appropriations for all programs under existing legislation, including those that require extension or renewal of expiring laws.

Amounts for proposed new legislation are shown generally in separate schedules, following the regular schedules or in budget sequence in the respective bureau. These schedules are headed "Proposed for later transmittal under proposed legislation." Appropriations language is included with the regular schedules, but not with the separate schedules for proposed legislation. Necessary appropriations language will be transmitted later upon enactment of the proposed legislation. In some cases, when the amount requested in the budget is less than the amount required for the program level mandated in existing authorizing legislation (as in the case of certain entitlement programs), the reduced amount is reflected in the proposed appropriations language and the regular schedules. The proposed change in the authorizing legislation may be included in the appropriations language transmitted with the budget or in proposed legislation, to be transmitted separately. In these cases, the words, "Legislative Action Required" appear at the end of the language.

PROGRAM AND FINANCING SCHEDULE

This schedule consists of three parts.

In the "Program by activities" section, obligations generally are shown for specific activities or projects. The activity structure is developed individually for each appropriation or fund account to provide a meaningful presentation of information for the program being financed. That structure is tailored to the individual account and is not uniform across the Government. When the amounts of obligations that are financed from collections credited to an account (reimbursements and repayments) are significant, "Reimbursable program" obligations are shown separately from "Direct program" obligations. When the amounts are significant, "Capital investments" are shown separately from "Operating expenses." The last entry "Total obligations," indicates the minimum amount of budgetary resources that must be available to the appropriation or fund account in that year.

The "Financing" section shows the budgetary resources available or estimated to be available to finance the total obligations. First are the amounts of offsetting collections credited to the account. Next are unobligated balances of budgetary resources (that have not expired) brought forward from the end of the prior year. Finally, those amounts that were available for obligation during the year and were not used, but continue to be available, are shown as an unobligated balance available, end of year. That balance is carried forward and usually obligated in a subsequent year. Other adjusting entries may be included. The residual is the new budget authority required to finance the program. Where more than one kind of budget authority is provided, that information is shown. In some cases, provisions of law other than the appropriations language for the account increase or reduce the budget authority provided. In such cases, the public law number is usually indicated in the stub entry. For example, P.L. 99-177 refers to the Balanced Budget and Emergency Deficit Control Act of 1987, also known as the Gramm-Rudman-Hollings Act. In some cases, the availability of budgetary resources may be restrained by legally binding limitations on obligations for direct loans or for other purposes. Such limitations are usually included in appropriations language.

The "Relation of obligations to outlays" section shows the difference between obligations, which may not be liquidated in the same year in which they are incurred, and outlays. The entry "obligations incurred, net," shows the amount of new obligations incurred in the year, less offsetting collections credited to the account. The amount of obligations that were incurred in previous years but not liquidated, are entered as an obligated balance, start of year. Similarly, an end of year obligated balance is entered. Certain adjusting entries may be included. The residual is the net amount of outlays resulting from the liquidation of obligations incurred in that year and previous years.

NARRATIVE STATEMENT OF PROGRAM AND PERFORMANCE

Narrative statements present briefly the objectives of the program and the work to be financed primarily for 1991. Measures of expected performance may be included, and the relationship to the financial estimates is described.

SCHEDULE OF OBJECT CLASSIFICATION AND PERSONNEL SUMMARY

There is shown for each account a schedule of obligations, according to the following uniform list of object classifications:

10 PERSONAL SERVICES AND BENEFITS
11 Personnel compensation
12 Personnel benefits
13 Benefits for former personnel
20 CONTRACTUAL SERVICES AND SUPPLIES
21 Travel and transportation of persons
22 Transportation of things
23.1 Rental payment to GSA
23.2 Rental payments to others
23.3 Communications, utilities, and miscellaneous charges
24 Printing and reproduction
25 Other services
26 Supplies and materials
30 ACQUISITION OF CAPITAL ASSETS
31 Equipment
32 Lands and structures
33 Investments and loans
40 GRANTS AND FIXED CHARGES
41 Grants, subsidies, and contributions
42 Insurance claims and indemnities
43 Interest and dividends
44 Refunds

These object classes reflect the nature of the things or services purchased, regardless of the purpose of the program for which they are used.

Several of the object classes are divided into subclasses—personnel compensation, for example, is shown separately for full-time permanent employees, for other than full-time employees, and for certain other payments.

Except for revolving funds, reimbursable obligations are aggregated in a single line and not identified by object class. Data, classified by object, are illustrated in the following schedule:

Object Classification (in thousands of dollars)

99.0	Reimbursable obligations	250	350	380
99.9	Total obligations	30,396	30,590	29,300

When obligations for personnel compensation are shown in the object classification schedule, a personnel summary generally will follow the object classification schedule, as illustrated below:

Personnel Summary

Direct:			
Total number of full-time permanent positions	813	785	741
Total compensable workyears:			
Full-time equivalent employment	774	748	706
Full-time equivalent of overtime and holiday hours	23	17	19
Reimbursable:			
Total number of full-time permanent positions	9	13	14
Total compensable workyears: Full-time equivalent employment	8	12	13

Control of Federal civilian employment generally is on a full-time equivalent (FTE) or workyear basis for the executive branch.

BUSINESS-TYPE BUDGET STATEMENTS

Business-type budget statements are presented for activities specifically required by the Government Corporation Control Act or similar legislation and generally for other revolving and trust revolving funds conducting business with the public. They are not usually presented for funds conducting business within the Government.

Statement of Revenue and Expense

For many revolving funds there is a statement of revenue and expense that shows the resulting net income or loss for the year. This statement usually includes accrued revenue (e.g., revenue earned) and accrued expenditures (e.g., including cost incurred but not yet paid), whether funded or unfunded.

Statement of Financial Condition

The statement of financial condition shows assets, liabilities, and Government equity for the fund at the close of each fiscal year. In addition to this information, which is similar to commercial balance sheet data, budget needs also require additional information, shown in the equity section. A disclosure is made of obligations incurred that have not yet accrued into liabilities (undelivered orders) and of budgetary resources for which no funding has been received (unfinanced budgetary resources). Unfinanced budgetary resources include orders from Federal customers that have not been filled (unfilled orders), and unfinanced budget authority in the form of authority to borrow for which borrowing has not taken place, and contract authority for which liquidating cash has not been received. Orders received from the public must be accompanied by advance payment.

FEDERAL CREDIT SCHEDULES

As part of an effort to establish systematic control of the levels of Federal credit during any fiscal year, the budget proposes annual limitations on the amount of obligations for direct loans and commitments for guaranteed loans in appropriations language for appropriation or fund accounts with credit activity. For those accounts under which Federal credit is extended, schedules for the status of direct loans and the status of guaranteed loans summarize activity for the years shown.

Status of Direct Loans

A direct loan obligation is a legal or binding agreement that results in: (1) a disbursement of funds to a non-Federal entity by a Federal agency (including the Federal Financing Bank on behalf of a Federal agency) that is contracted to be repaid, with or without interest; (2) a purchase of non-Federal loans by a Federal agency through secondary market operations; or (3) a sale of Federal agency assets to a non-Federal entity on credit terms of more than 90 days duration.

Acquisitions of guaranteed non-Federal loans by a Federal agency in satisfaction of default or other guarantee claims are not recorded as new direct loan obligations. However, they are recorded as disbursements for guaranteed loan claims (line 1232) in the cumulative balance of loans outstanding section of the schedule on the status of direct loans.

A direct loan obligation is counted against the annual limitation when the principal amount is obligated. Limitations apply to the gross obligations for direct loans, which means the amount obligated during a fiscal year, without reductions for such items as repayments, prepayments, sale of loan assets, defaults, or forgiveness.

For each appropriation or fund account with direct loan activity, a schedule is displayed immediately following the program and financing schedule as follows:

Status of Direct Loans (in thousands of dollars)

	Estimate of direct loan subsidy:			
1320	Subsidy rate (in percent)			7.83
1330	Subsidy amount (in thousands of dollars)			1,096

[1] Represents an adjustment to the prior year balance of direct loans outstanding.

The subsidy amounts presented in these schedules are the estimated present value of the difference in cost to the borrower between the Federal direct loan or guaranteed loan and alternative private financing available to the same or a similar borrower for the same or a similar purpose.

Status of Guaranteed Loans

A guaranteed loan commitment is a legal or binding agreement that results in a non-Federal debt instrument on which the agency pledges to pay part or all of the amount due to a lender or holder in the event of default by the borrower. Agency guarantees that result in loans that are disbursed by the FFB are counted as *direct loans* of the agency and, therefore, will not be counted as guaranteed loans. However, the amount of direct loans made in this manner is subject to limitations on loan guarantee commitments of the originating agency. Loan guarantees include agreements in the form of loan insurance, defined as a type of guarantee in which an agency pledges the use of accumulated insurance premiums to secure lenders against default on the part of borrowers.

A guaranteed loan is counted against the annual limitation when a firm commitment is made, i.e., when the Government enters into a guarantee agreement to become effective at such time as the lender meets stipulated pre-conditions. A commitment is reported for every guaranteed loan, even though the commitment and the actual loan guarantee may occur simultaneously. Amounts for limitations and in the schedules are the full principal amounts of loans guaranteed whether guaranteed in full or in part. The amount of the Government's contingent liability is shown as a memorandum entry in the schedule. Limitations apply to the gross commitments for guaranteed loans, which means the amount committed during a fiscal year, without reductions for such items as repayments, prepayments, sale of guaranteed loans, or defaults.

For each appropriation or fund account with guaranteed loan activity, a schedule is displayed following the program and financing schedule (or status of direct loans schedule, if there is one) as follows:

ALLOCATIONS BETWEEN AGENCIES

In some cases, funds appropriated to the President or to an agency are allocated to one or more agencies that help to carry out a program. Obligations incurred under such allocations are included in the data for the account to which the appropriation is made in the allocating agency. The object classification schedule for such accounts identifies the amount of such obligations by performing agency. A note at the end of a bureau or equivalent grouping identifies allocations received from other agencies.

BUDGETS NOT SUBJECT TO REVIEW

In accordance with law or established practice, the presentations for the Legislative Branch, the Judiciary, the Federal Deposit Insurance Corporation, the Milk Market Orders Assessment Fund of the Department of Agriculture, the Farm Credit Administration, and the International Trade Commission have been included, without review, in the amounts submitted by the agencies.

The budgets of the privately owned Government-sponsored enterprises and the Board of Governors of the Federal Reserve System, are not subject to review; they are included for information purposes only.

GENERAL PROVISIONS

TITLE VI—GENERAL PROVISIONS

DEPARTMENTS, AGENCIES, AND CORPORATIONS

The following sections are proposed for deletion and do not appear below:

Sec. 606	Prohibition on paying persons previously nominated for a position but disapproved by the Senate.
Sec. 610	Prohibition against enforcing regulations disapproved by resolutions adopted by the Congress.
Sec. 613	Prohibition against planning, implementing or administering reductions in the Customs Service's regions or offices.
Sec. 614	Prohibition against office furnishing or redecoration in excess of $5,000, unless approved by Committees on Appropriations.
Sec. 617	Nullifies section 622(b).
Sec. 618	Prohibition against the implementation or enforcement of certain non-disclosure agreements between the Government and its employees.
Sec. 619	Adjusts rates of pay for federal and District of Columbia employees and officials.
Sec. 620	Restriction on acquiring facilities for law enforcement training without approval of Appropriations Committees.
Sec. 622(b)..	Prohibits payments to non-federal grantees or contractors unless such entities have a written policy designed to ensure a drug-free workplace.
Sec. 625	Amends title 5 of the United States Code by adding a provision concerning the membership of review boards and prohibits reductions in rank or pay of a career appointee in the Senior Executive Service upon reassignment or transfer.

SECTION 601. Unless otherwise specifically provided, the maximum amount allowable during the current fiscal year in accordance with section 16 of the Act of August 2, 1946 (60 Stat. 810), for the purchase of any passenger motor vehicle (exclusive of buses and ambulances), is hereby fixed at $7,100 except station wagons for which the maximum shall be $8,100: *Provided*, That these limits may be exceeded by not to exceed $3,700 for police-type vehicles, and by not to exceed $4,000 for special heavy-duty vehicles: *Provided further*, That the limits set forth in this section may be exceeded by not more than five percent for electric or hybrid vehicles purchased for demonstration under the provisions of the Electric and Hybrid Vehicle Research, Development, and Demonstration Act of 1976.

SEC. 602. Appropriations of the executive departments and independent establishments for the current fiscal year available for expenses of travel or for the expenses of the activity concerned, are hereby made available for quarters allowances and cost-of-living allowances, in accordance with 5 U.S.C. 5922–24.

SEC. 603. Unless otherwise specified during the current fiscal year no part of any appropriation contained in this or any other Act shall be used to pay the compensation of any officer or employee of the Government of the United States (including any agency the majority of the stock of which is owned by the Government of the United States) whose post of duty is in the continental United States unless such person (1) is a citizen of the United States, (2) is a person in the service of the United States on the date of enactment of this Act, who, being eligible for citizenship, has filed a declaration of intention to become a citizen of the United States prior to such date and is actually residing in the United States, (3) is a person who owes allegiance to the United States, (4) is an alien from Cuba, Poland, South Vietnam, or the Baltic countries lawfully admitted to the United States for permanent residence, or (5) South Vietnamese, Cambodian, and Laotian refugees paroled in the United States after January 1, 1975: *Provided*, That for the purpose of this section, an affidavit signed by any such person shall be considered prima facie evidence that the requirements of this section with respect to his status have been complied with: *Provided further*, That any person making a false affidavit shall be guilty of a felony, and, upon conviction, shall be fined no more than $4,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for any other provisions of existing law: *Provided further*, That any payment made to any officer or employee contrary to the provisions of this section shall be recoverable in action by the Federal Government. This section shall not apply to citizens of Ireland, Israel, the Republic of the Philippines or to nationals of those countries allied with the United States in the current defense effort, or to temporary employment of translators, or to temporary employment in the field service (not to exceed sixty days) as a result of emergencies.

SEC. 604. Appropriations available to any department or agency during the current fiscal year for necessary expenses, including maintenance or operating expenses, shall also be available for payment to the General Services Administration for charges for space and services and those expenses of renovation and alteration of buildings and facilities which constitute public improvements performed in accordance with the Public Buildings Act of 1959 (73 Stat. 749), the Public Buildings Amendments of 1972 (86 Stat. 216), or other applicable law.

SEC. 605. Funds made available by this or any other Act for administrative expenses in the current fiscal year of the corporations and agencies subject to chapter 91 of title 31, United States Code, shall be available, in addition to objects for which such funds are otherwise available, for rent in the District of Columbia; services in accordance with 5 U.S.C. 3109; and the objects specified under this head, all the provisions of which shall be applicable to the expenditure of such funds unless otherwise specified in the Act by which they are made available: *Provided*, That in the event any functions budgeted as administrative expenses are subsequently transferred to or paid from other funds, the limitations on administrative expenses shall be correspondingly reduced.

SEC. [607] *606.* Pursuant to section 1415 of the Act of July 15, 1952 (66 Stat. 662), foreign credits (including currencies) owed to or owned by the United States may be used by Federal agencies for any purpose for which appropriations are made for the current fiscal year (including the carrying out of Acts requiring or authorizing the use of such credits), only when reimbursement therefor is made to the Treasury from applicable appropriations of the agency concerned: *Provided*, That such credits received as exchanged allowances or proceeds of sales of personal property may be used in whole or part payment for acquisition of similar items, to the extent and in the manner authorized by law, without reimbursement to the Treasury.

SEC. [608] *607.* No part of any appropriation contained in this or any other Act shall be available for interagency financing of boards, commissions, councils, committees, or similar groups (whether or not they are interagency entities) which do not have a prior and specific statutory approval to receive financial support from more than one agency or instrumentality.

SEC. [609] *608.* Funds made available by this or any other Act to the "Postal Service Fund" (39 U.S.C. 2003) shall be available for employment of guards for all buildings and areas owned or occupied by the Postal Service and under the charge and control of the Postal Service, and such guards shall have, with respect to such property, the powers of special policemen provided by the first section of the Act of June 1, 1948, as amended (62 Stat. 281; 40 U.S.C. 318), and, as to property owned or occupied by the Postal Service, the Postmaster General may take the same actions as the Administrator of General Services may take under the provisions of sections 2 and 3 of the Act of June 1, 1948, as amended (62 Stat. 281; 40 U.S.C. 318a, 318b), attaching thereto penal consequences under the authority and within the limits provided in section 4 of the Act of June 1, 1948, as amended (62 Stat. 281; 40 U.S.C. 318c).

SEC. [611] *609.* No part of any appropriation contained in, or funds made available by, this or any other Act, shall be available for any agency to pay to the Administrator of the General Services Administration a higher rate per square foot for rental of space and services (established pursuant to section 210(j) of the Federal Property and

Administrative Services Act of 1949, as amended) than the rate per square foot established for the space and services by the General Services Administration for the fiscal year for which appropriations were granted.

Sec. [612] *610.* (a) Notwithstanding any other provision of law, and except as otherwise provided in this section, no part of any of the funds appropriated for the fiscal years ending September 30, [1990] *1991*, or September 30, [1991] *1992*, by this Act or any other Act, may be used to pay any prevailing rate employee described in section 5342(a)(2)(A) of title 5, United States Code, or any employee covered by section 5348 of that title—

(1) during the period from the date of expiration of the limitation imposed by section 612 of the Treasury, Postal Service, and General Government Appropriations Act, [1989] *1990*, until the first day of the first applicable pay period that begins not less than ninety days after that date, in an amount that exceeds the rate payable for the applicable grade and step of the applicable wage schedule in accordance with such section 612; and

(2) during the period consisting of the remainder, if any, of fiscal year [1990] *1991*, and that portion of fiscal year [1991] *1992*, that precedes the normal effective date of the applicable wage survey adjustment that is to be effective in fiscal year [1991] *1992*, in an amount that exceeds, as a result of a wage survey adjustment, the rate payable under paragraph (1) of this subsection by more than the overall average percentage adjustment in the General Schedule during fiscal year [1990] *1991*.

(b) Notwithstanding section 9(b) of Public Law 92-392 or section 704(b) of Public Law 95-454, subsection (a) of this section shall apply (in such manner as the Office of Personnel Management shall prescribe) to any prevailing rate employee to whom such section 9(b) applies.

[(b)] *(c)* Notwithstanding any other provision of law, no prevailing rate employee described in subparagraph (B) or (C) of section 5342(a)(2) of title 5, United States Code, may be paid during the periods for which subsection (a) of this section is in effect at a rate that exceeds the rates that would be payable under subsection (a) were subsection (a) applicable to such employee.

[(c)] *(d)* For the purpose of this section, the rates payable to an employee who is covered by this section and who is paid from a schedule that was not in existence on September 30, [1989] *1990*, shall be determined under regulations prescribed by the Office of Personnel Management.

[(d)] *(e)* Notwithstanding any other provision of law, rates of premium pay for employees subject to this section may not be changed from the rates in effect on September 30, [1989] *1990*, except to the extent determined by the Office of Personnel Management to be consistent with the purpose of this section.

[(e)] *(f)* The provisions of this section shall apply with respect to pay for services performed by any affected employee on or after October 1, [1989] *1990*.

[(f)] *(g)* For the purpose of administering any provision of law, including section 8431 of title 5, United States Code, or any rule or regulation that provides premium pay, retirement, life insurance, or any other employee benefit, that requires any deduction or contribution, or that imposes any requirement or limitation, on the basis of a rate of salary or basic pay, the rate of salary or basic pay payable after the application of this section shall be treated as the rate of salary or basic pay.

[(g)] *(h)* Nothing in this section may be construed to permit or require the payment to any employee covered by this section at a rate in excess of the rate that would be payable were this section not in effect.

[(h)] *(i)* The Office of Personnel Management may provide for exceptions to the limitations imposed by this section if the Office determines that such exceptions are necessary to ensure the recruitment or retention of qualified employees.

Sec. [615] *611.* Funds appropriated in this or any other Act may be used to pay travel to the United States for the immediate family of employees serving abroad in cases of death or life threatening illness of said employee.

Sec. [616] *612.* (a) Notwithstanding the provisions of sections 112 and 113 of title 3, United States Code, each Executive agency detailing any personnel shall submit a report on an annual basis in each fiscal year to the Senate and House Committees on Appropriations on all employees or members of the armed services detailed to Executive agencies, listing the grade, position, and offices of each person detailed and the agency to which each such person is detailed.

(b) The provisions of this section shall not apply to Federal employees or members of the armed services detailed to or from—

(1) the Central Intelligence Agency;

(2) the National Security Agency;

(3) the Defense Intelligence Agency;

(4) the offices within the Department of Defense for the collection of specialized national foreign intelligence through reconnaissance programs;

(5) the Bureau of Intelligence and Research of the Department of State;

(6) any agency, office, or unit of the Army, Navy, Air Force, and Marine Corps, the Federal Bureau of Investigation and the Drug Enforcement Administration of the Department of Justice, the Department of the Treasury, and the Department of Energy performing intelligence functions; and

(7) the Director of Central Intelligence.

(c) The exemptions in part (b) of this section are not intended to apply to information on the use of personnel detailed to or from the intelligence agencies which is currently being supplied to the Senate and House Intelligence and Appropriations Committees by the executive branch through budget justification materials and other reports.

(d) For the purposes of this section, the term "Executive agency" has the same meaning as defined under section 105 of title 5, United States Code (except that the provisions of section 104(2) of title 5, United States Code shall not apply) and includes the White House Office, the Executive Residence, and any office, council, or organizational unit of the Executive Office of the President.

Sec. [621] *613.* None of the funds appropriated by this or any other Act may be expended by any Federal agency to procure any product or service that is subject to the provisions of Public Law 89-306 and that will be available under the procurement by the Administrator of General Services known as "FTS2000" unless—

(1) such product or service is procured by the Administrator of General Services as part of the procurement known as "FTS2000"; or

(2) that agency establishes to the satisfaction of the Administrator of General Services that—

(A) the agency's requirements for such procurement are unique and cannot be satisfied by property and service procured by the Administrator of General Services as part of the procurement known as "FTS2000"; and

(B) the agency procurement, pursuant to such delegation, would be cost-effective and would not adversely affect the cost-effectiveness of the FTS2000 procurement.

Sec. [622 (a)] *614.* No department, agency, or instrumentality of the United States receiving appropriated funds under this Act for fiscal year [1990] *1991*, or under any other Act appropriating funds for fiscal year [1990] *1991*, shall obligate or expend any such funds, unless such department, agency, or instrumentality has in place, and will continue to administer in good faith, a written policy designed to ensure that all of its workplaces are free from the illegal use, possession, or distribution of controlled substances (as defined in the Controlled Substances Act) by the officers and employees of such department, agency, or instrumentality.

Sec. [623] *615.* (a) No amount of any grant made by a Federal agency shall be used to finance the acquisition of goods or services (including construction services) unless the recipient of the grant agrees, as a condition for the receipt of such grant, to—

(1) announce in any solicitation for offers to procure such goods or services (including construction services) the amount of Federal funds that will be used to finance the acquisition for which such offers are being solicited; and

(2) express the amount announced pursuant to paragraph (1) as a percentage of the total costs of the planned acquisition.

(b) The requirements of subsection (a) shall not apply to a procurement for goods or services (including construction services) that has an aggregate value of less than $500,000.

Sec. [624] *616.* Notwithstanding section 1346 of title 31, United States Code, or section [608 of Public Law 100-440] *607 of this Act*, funds made available for fiscal year [1990] *1991* by this or any other Act shall be available for the interagency funding of national security and emergency preparedness telecommunications initiatives which benefit multiple Federal departments, agencies, or entities, as provided by Executive Order Numbered 12472 (April 3, 1984).

Sec. 617. Notwithstanding any other provision of law, beginning in fiscal year 1991 and thereafter, the Government of the District of Columbia shall bill directly on a quarterly basis and in advance, *individual establishments of the Judicial, Legislative, and Executive branches of the Federal Government for the water and sewer services that they receive in buildings owned by such establishments, pursuant to sections 106 and 212 of the District of Columbia Public Works Act of 1954. From funds available to such Federal establishments, each establishment shall pay quarterly and in advance to "Federal Payment for Water and Sewer Services" the amount billed by the District Government for water and sewer services to be furnished: Provided, That the amounts paid to "Federal Payment for Water and Sewer Services" shall be paid quarterly and in advance to the District of Columbia for such services, pursuant to sections 106 and 212 of the Act: Provided further, That after the end of each quarter, the District Government shall adjust its individual billings promptly to reflect actual usage of services. [ADMINISTRATIVE PROVISIONS]

[SECTION 1. The Chairman of the Majority or Minority Conference Committee of the Senate may, during the fiscal year ending September 30, 1990, at his election, transfer not more than $50,000 from the appropriation account for salaries for the Conference of the Majority and the Conference of the Minority of the Senate, to the account, within the contingent fund of the Senate, from which expenses are payable under section 120 of Public Law 97-51 (2 U.S.C. 61g-6). Any transfer of funds under authority of the preceding sentence shall be made at such time or times as such chairman shall specify in writing to the Senate Disbursing Office. Any funds so transferred by the chairman of the Majority or Minority Conference Committee shall be available for expenditure by such committee in like manner and for the same purposes as are other moneys which are available for expenditure by such committee from the account, within the contingent fund of the Senate, from which expenses are payable under section 120 of Public Law 97-51 (2 U.S.C. 61g-6).]

[SEC. 2. Funds appropriated to the Conference of the Majority and funds appropriated to the Conference of the Minority for the fiscal year ending September 30, 1990, may be utilized in such amounts as the Chairman of each Conference deems appropriate for the specialized training of professional staff, subject to such limitations, insofar as they are applicable, as are imposed by the Committee on Rules and Administration with respect to such training when provided to professional staff of standing committees of the Senate.]

[SEC. 3. Subsection (d) of section 2 of Public Law 100-123 (2 U.S.C. 58a-1), is amended by inserting immediately after "by the Sergeant at Arms)," the following: "and all other moneys received by the Sergeant at Arms as charges or commissions for telephone services,".]

[SEC. 4. (a) The Sergeant at Arms and Doorkeeper of the Senate is authorized to establish an Office of Senate Health Promotion.]

[(b)(1) In carrying out this section, the Sergeant at Arms and Doorkeeper of the Senate is authorized to establish, or provide for the establishment of, exercise classes and other health services and activities on a continuing and regular basis. In providing for such classes, services, and activities, the Sergeant at Arms and Doorkeeper of the Senate is authorized to impose and collect fees, assessments, and other charges to defray the costs involved in promoting the health of Members, officers, and employees of the Senate. For purposes of this section, the term "employees of the Senate" shall have such meaning as the Sergeant at Arms, by regulation, may prescribe.]

[(2) All fees, assessments, and charges imposed and collected by the Sergeant at Arms pursuant to paragraph (1) shall be deposited in the revolving fund established pursuant to subsection (c) and shall be available for purposes of this section.]

[(c) There is established in the Treasury of the United States a revolving fund within the contingent fund of the Senate to be known as the Senate Health Promotion Revolving Fund (hereinafter referred to in this section as the "fund"). The fund shall consist of all amounts collected or received by the Sergeant at Arms and Doorkeeper of the Senate as fees, assessments, and other charges for activities and services to carry out the provisions of this section. All moneys in the fund shall be available without fiscal year limitation for disbursement by the Secretary of the Senate for promoting the health of Members, officers, and employees of the Senate.]

[(d) Disbursements from the revolving fund shall be made upon vouchers signed by the Sergeant at Arms and Doorkeeper of the Senate.]

[(e) The provisions of section 4 of the Act of July 31, 1946 (40 U.S.C. 193d) shall not be applicable to any class, service, or other activity carried out pursuant to the provisions of this section.]

[(f) The provisions of this section shall be carried out in accordance with regulations which shall be promulgated by the Sergeant at Arms and Doorkeeper of the Senate and subject to approval at the beginning of each Congress by the Committee on Rules and Administration of the Senate.]

[SEC. 5. (a) Paragraph (3) of section 506(a) of the Supplemental Appropriations Act, 1973 (2 U.S.C. 58(a)) is amended to read as follows:

> ["(3)(A) postage on, and fees and charges in connection with, mail matter sent through the mail under the franking privilege in excess of amounts provided from the appropriation for official mail costs, upon certification by the Senate Sergeant at Arms and subject to such regulations as may be promulgated by the Committee on Rules and Administration, (B) postage on, and fees and charges in connection with official mail matter sent through the mail other than the franking privilege upon certification by the Senate Sergeant at Arms and subject to such regulations as may be promulgated by the Committee on Rules and Administration, and (C) reimbursement to each Senator for costs incurred in the preparation of required official reports, and the acquisition of mailing lists to be used for official purposes, and in the mailing, delivery, or transmitting of matters relating to official business;".]

[(b) Receipts paid to the Sergeant at Arms from sales of postage on, and fees and charges in connection with mail matter sent through the mail by Senators, Senate committees, or other Senate offices (including joint committees and commissions funded from the contingent fund of the Senate), other than under the franking privilege, as cash or check payments directly from such Senators, committees, or offices, or as reimbursement from the Financial Clerk of the Senate pursuant to certification by the Sergeant at Arms of charges to be made to such funds available to such Senators, committees, or offices for such postage, fees and charges shall be used by the Sergeant at Arms for payment to the United States Postal Service for such postage, fees, and charges.]

[SEC. 6. On and after the date this Act becomes law, the Secretary of the Senate, subject to the approval of the Committee on Appropriations of the Senate, is authorized to provide up to $1,000,000 for capitalization purposes to the revolving fund established by the last paragraph under the heading "Contingent Expenses of the Senate" appearing under the heading "SENATE" in chapter XI of the Third Supplemental Appropriation Act, 1957 (2 U.S.C. 46a-1), by transferring to such revolving fund any funds available from any Senate appropriation account, with respect to which he has disbursement authority, for the fiscal year in which the transfer is made (or for any preceding fiscal year) or which have been made available until expended; and any moneys so transferred shall be available for use in like manner and to the same extent as the moneys in such revolving fund which were not transferred thereto pursuant to this section.]

[SEC. 7. The Secretary of the Senate may enter into an agreement with the Secretary of Education to provide closed captioning of the Senate floor proceedings, subject to the approval of the Senate Committee on Rules and Administration. The Senate authorizes the Secretary of Education to have access to the audio and video broadcast of the Senate floor proceedings for the purpose of captioning. Such funds as may be necessary to carry out the purposes of this section are authorized to be paid from the appropriation account for "Miscellaneous Items" within the contingent fund of the Senate.]

[SEC. 8. (1) The Secretary of the Senate and the Sergeant at Arms and Doorkeeper of the Senate are authorized to acquire goods, services, or space from government agencies and units by agreement under the provisions of the Economy Act, 31 U.S.C. 1535, and to make advance payments in conjunction therewith, if required by the providing agency or establishment.]

[(2) No advance payment may be made under paragraph (1) unless specifically provided for in the agreement. No agreement providing for advance payment may be entered into unless it contains a provision requiring the refund of any unobligated balance of the advance.

(3) No agreement may be entered into under paragraph (1) without the approval of the Senate Committee on Rules and Administration and the Senate Committee on Appropriations.]

[Sec. 9. The provisions of Senate Resolution 89, of the One Hundredth Congress, agreed to January 28, 1987, are hereby enacted into law, effective on the date such Senate Resolution 89 was agreed to.]

[Sec. 10. The second proviso, under the headings "SENATE" and "Office of the Chaplain", of the Legislative Branch Appropriation Act, 1970 (Public Law 91-145) is amended by striking out "a secretary" and inserting in lieu thereof "such employees as he deems appropriate, except that the amount which may be paid for any fiscal year as gross compensation for personnel in such Office for any fiscal year shall not exceed $147,900".]

[Sec. 11. (a) For purposes of subchapters I and II of chapter 37 of title 31, United States Code (relating to claims of or against the United States Government), the United States Senate shall be considered to be a legislative agency (as defined in section 3701(a)(4) of such title), and the Secretary of the Senate shall be deemed to be the head of such legislative agency.]

[(b) Regulations prescribed by the Secretary of the Senate pursuant to section 3716 of title 31, United States Code, shall not become effective until they are approved by the Senate Committee on Rules and Administration.]

[Sec. 12. There shall be available to meet any unpaid expenses incurred by any duly authorized individual, prior to the first day of the 101st Congress, under authority of section 31a-1 of title 2, United States Code, (1) any unexpended and unobligated funds appropriated for the fiscal year ending September 30, 1988, which were available to such individual as an expense allowance under section 31a-1 or section 31a-3 of such title, plus (2) in case such individual was authorized to incur expenses under authority of section 31a-1 of such title 2 on the last day of the 100th Congress but was not authorized to incur expenses under such authority on the first day of the 101st Congress, 25 percent of the funds appropriated for the fiscal year ending September 30, 1989, under authority of section 31a-2 and section 31a-3 of such title 2.]

[Sec. 13. (a) There is established in the Treasury of the United States a revolving fund within the contingent fund of the Senate to be known as the "Senate Office of Public Records Revolving Fund" (hereafter in this section referred to as the "revolving fund").]

[(b) All moneys received on and after October 1, 1989, by the Senate Office of Public Records from fees and other charges for services shall be deposited to the credit of the revolving fund. Moneys in the revolving fund shall be available without fiscal year limitation for disbursement by the Secretary of the Senate for use in connection with the operation of the Senate Office of Public Records, including supplies, equipment, and other expenses.]

[(c) Disbursements from the revolving fund shall be made upon vouchers approved by the Secretary of the Senate.]

[(d) The Secretary of the Senate is authorized to prescribe such regulations as may be necessary to carry out the provisions of this section.]

[(e) To provide capital for the revolving fund, the Secretary of the Senate is authorized to transfer, from moneys appropriated for fiscal year 1990 to the account "Miscellaneous Items" in the contingent fund of the Senate, to the revolving fund such sum as he may determine necessary, not to exceed $30,000.] *(Congressional Operations Appropriations Act, 1990.)*

ADMINISTRATIVE PROVISIONS

SEC. 101. Of the amounts appropriated for fiscal year [1990] *1991* for salaries and expenses of the House of Representatives, such amounts as may be necessary may be transferred among the headings "HOUSE LEADERSHIP OFFICES", "MEMBERS' CLERK HIRE", "COMMITTEE EMPLOYEES", "CONTINGENT EXPENSES OF THE HOUSE (STANDING COMMITTEES, SPECIAL AND SELECT)", "CONTINGENT EXPENSES OF THE HOUSE (ALLOWANCES AND EXPENSES)", and "SALARIES, OFFICERS AND EMPLOYEES", upon approval of the Committee on Appropriations of the House of Representatives.

SEC. 102. [(a) One additional employee is authorized for each of the following:

(1) the House Democratic Caucus;
(2) the House Republican Conference;
(3) the Minority Leader; and
(4) the Chief Deputy Majority Whip.

(b) The annual rate of pay for the positions established under subsection (a) shall not exceed the annual rate of pay payable from time to time for level V of the Executive Schedule under section 5316 of title 5, United States Code.] *The Committee on House Administration is authorized to receive and expend funds for the conduct of a biennial equipment exposition for Members.*

SEC. 103. [(a) Section 104(a) of the Legislative Branch Appropriations Act, 1987 (as incorporated by reference in section 101(j) of Public Law 99-500 and Public Law 99-591) (2 U.S.C. 117e) is amended—

(1) by striking out "SEC. 104. (a)" and inserting in lieu thereof "SEC. 104. (a)(1)";

(2) by striking out the last sentence; and

(3) by inserting after paragraph (1), as so redesignated by paragraph (1) of this subsection, the following new paragraphs:

"(2) If disposal in accordance with paragraph (1) is not feasible because of age, location, condition, or any other relevant factor, the Clerk may donate the equipment to the government of a State, to a local government, or to an organization that is described in section 501(c)(3) of the Internal Revenue Code of 1986 and exempt from tax under section 501(a) of such Code. A donation under this paragraph—

"(A) shall be at no cost to the Government; and

"(B) may be made only if the used equipment has no recoverable value because disposal in accordance with paragraph (1), under the most favorable terms available to the Government, would result in a loss to the Government.

"(3) The Committee on House Administration of the House of Representatives shall have authority to prescribe regulations to carry out this subsection.

"(4) As used in this section—

"(A) the term 'State' means a State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and a territory or possession of the United States; and

"(B) the term 'used equipment' means such used or surplus equipment (including furniture and motor vehicles) as the Committee on House Administration of the House of Representatives may prescribe by regulation.".

(b) The first section of the Act entitled "An Act to authorize the disposition of certain office equipment and furnishings, and for other purposes", approved October 20, 1974 (2 U.S.C. 59a), is repealed.

(c) The amendments made by subsection (a) and the repeal made by subsection (b) shall take effect on October 1, 1989.] *The provisions of H. Res. 294, approved November 17, 1989, establishing five additional positions on the Capitol Police for duty with respect to the House of Representatives, shall be the permanent law with respect thereto. (Congressional Operations Appropriations Act, 1990.)*

The Judiciary Office Building Development Act, Public Law 100–480, among other purposes, authorizes the Architect of the Capitol to contract for the design and construction of a building adjacent to Union Station in the District of Columbia to be leased to the Judicial Branch of the United States. This schedule reflects the transfer of funds authorized by the Act and the costs associated with the construction of the building. Costs of construction are financed by $148,600 thousand of federally-guaranteed debt issued in 1989.

Estimates prepared by the Legislative Branch assumed the financial arrangements to be a lease-purchase, which would distribute outlays associated with acquisition of the building over a period of thirty years. However, the arrangements involve federally guaranteed financing and other characteristics that make them substantively the same as direct federal

construction, financed by direct federal borrowing. Because estimated expenditures of the Legislative Branch are required to be included in the budget as submitted and without change, this separate schedule is included as an adjustment to reflect direct construction costs, consistent with standard budget concepts and scoring conventions.

ADMINISTRATIVE PROVISIONS

SEC. 104. Notwithstanding any other provisions of law, the Architect of the Capitol is hereby authorized to (1) develop a pilot program to determine the economic feasibility and efficiency of centralizing certain maintenance functions, to assign and reassign, without increase or decrease in basic salary or wages, any person on the employment rolls of the Office of the Architect of the Capitol, for personal services in any buildings, facilities, or grounds under his jurisdiction for which appropriations have been made and are available; (2) maintain appropriate cost and productivity records for the program; and (3) report to appropriate authorities, including the Committees on Appropriations, on the results of the program, together with recommendations for continuation or expansion of the program.

SEC. 105. The Architect of the Capitol, under the direction of the Joint Committee on the Library, is authorized to accept donations to restore and display the Statue of Freedom model.

[SEC. 106. (a) The position of Executive Assistant to the Architect of the Capitol is abolished.

(b) The provisions—

(1) under the center subheadings "OFFICE OF THE ARCHITECT OF THE CAPITOL" and "SALARIES", and

(2) of section 303, of H.R. 7593 of the second session of the Ninety-Sixth Congress, as enacted into permanent law by section 101(c) of the Joint Resolution of December 16, 1980 (40 U.S.C. 166b-1), which relate to the salary of the Executive Assistant to the Architect of the Capitol, are repealed.

(c) The third paragraph under the center subheadings "OFFICE OF THE ARCHITECT OF THE CAPITOL" and "SALARIES" in the Legislative Branch Appropriation Act, 1960 (40 U.S.C. 166b-3) is amended—

(1) by striking out "three positions" and inserting in lieu thereof "four positions", and

(2) by striking out ", Assistant Architect," and all that follows and inserting in lieu thereof "or Assistant Architect.".

(d) The proviso in the first undesignated paragraph under the center subheadings "OFFICE OF THE ARCHITECT OF THE CAPITOL" and "SALARIES" in the first section of the Legislative Branch Appropriation Act, 1971 (40 U.S.C. 164a) is amended by striking out ", and, in case of the absence or disability of the Assistant Architect, the Executive Assistant shall so act".

(e) Subsection (b) of section 308 of the Legislative Branch Appropriations Act, 1988 (40 U.S.C. 166b-3a(b)) is amended to read as follows:

"(b) The positions referred to in subsection (a) are—

"(1) the position of assistant referred to in the proviso in the first undesignated paragraph under the center subheadings 'OFFICE OF THE ARCHITECT OF THE CAPITOL' and 'SALARIES' in the first section of the Legislative Branch Appropriation Act, 1971 (40 U.S.C. 164a), and

"(2) the eight positions provided for in the third and fourth undesignated paragraphs under the center subheadings 'OFFICE OF THE ARCHITECT OF THE CAPITOL' and 'SALARIES' in the first section of the Legislative Branch Appropriation Act, 1960 (40 U.S.C. 166b-3).".] *(Congressional Operations Appropriations Act, 1990.)*

Personal services and necessary expenses to provide support for the basic operations of the Library are financed from this appropriation.

Collections services.—This program acquires, catalogs for use, and classifies for systematic arrangement on the shelves, materials received by the Library. In cooperation with the Constituent Services program, collections policy is set. It also includes preservation and special collection programs.

Constituent services.—This program serves the public by maintaining the general collections and the general reading rooms. It also develops, produces, markets, and distributes the printed catalog cards, cataloging data in machine-readable form, book catalogs, technical publications, and selected bibliographies made available from the automated data bases. In cooperation with the Collections Services program, this program sets collections policy. This program also coordinates Federal library and information resources.

Cultural affairs.—This program includes the Library's activities in the areas of information, exhibits, and publishing. It includes the American Folklife Center, the Center for the Book, the Offices of Communications, Development, Interpretive Programs, Scholarly Programs and Special Events, and Public Programs.

Law library.—The Law Library is responsible for the custody, development, and service of the law collection of the Library of Congress and functions as the foreign and international law research arm of the United States Congress.

Management services.—This activity supports the executive staff of the Office of the Librarian: budget and finance; human resources; contracts and logistics; buildings management; automation; and other centralized services. It also includes rental of space off Capitol Hill.

Special projects.—This activity supports the accomplishment of the mission of the Library as a whole by serving as a catalyst for innovative thinking and response to strategic and operational issues; by enhancing the skills of other Library staff by providing direct experience addressing such issues; and by providing a means of dealing with strategic and operational matters that affect more than one service unit of the Library.

other library materials deposited in accordance with the Copyright Act and transferred to the Library of Congress. The income and obligations for 1989, and estimates for 1990 and 1991 are as follows:

	1989 actual	*1990 est.*	*1991 est.*
Income:			
Gross receipts	8,469,716	8,639,000	14,500,000
Estimated value of materials deposited and transferred to the Library of Congress	10,316,704	10,500,000	10,700,000
Total income	18,786,420	19,139,000	25,200,000
Obligations	19,591,000	20,047,000	25,755,000

The effort described under each of the activities are predicated on an estimated 600,000 copyright registrations during 1991, an estimated 580,000 during 1990, and registrations of 611,328 during 1989.

Receiving and accounting for applications, fees, and correspondence.—Materials received by the Copyright Office are assembled and routed; accounts are maintained for all moneys received; records relating to the registration of copyrights are filed; and materials are deposited in accordance with the Copyright Act.

Examining copyright applications.—All applications and deposits are examined before issuance of registration certificates or recordings of documents to determine whether the provisions of the Copyright Act have been satisfied.

Indexing and cataloging materials received.—The Register of Copyrights is required to publish complete and indexed catalogs of all items registered. The catalog entries prepared by the Copyright Office are made available to the public and the Library. It is estimated that for 1991 the number of items to be cataloged will be 600,000.

Reference service.—The Copyright Office makes information available to the public concerning the provisions of the Copyright Act, including procedures, policies, and rulings. Information concerning registrations is furnished on a fee basis.

Publishing the catalog of copyright entries and bulletins of decisions.—Catalogs for each class of copyright entries and bulletins of copyright decisions are published and made available to the public.

General supervision and legal services.—The work of the Copyright Office includes legal supervision and research into the present copyright law and international copyright relations. It also involves a study of improvement of the domestic law and our international copyright relations.

Licensing Division.—The Licensing Division performs the responsibilities connected with the licensing activities of cable television stations and satellite carriers and the licensing of jukeboxes.

Policy analysis and research.—The Congressional Research Service provides objective, nonpartisan analytical and consultative services to the Members and committees of Congress, assisting them in the analysis, appraisal, and evaluation of any subject matter of legislative concern, including recommendations submitted to the Congress by the Executive Branch. Research services are also provided to assist Congress with its oversight, representative, and other responsibilities. Support takes the form of background studies, in-depth policy analyses, consultations, briefings, legal research, continuous liaison with committees, assistance with committee hearings, public policy seminars for Members and congressional staff, and related data and materials. In order to respond most effectively to the broad range of congressional inquiries, the Service supplements individually tailored products with Issue Briefs, Reports, Committee Prints, and "Info Packs", which are collections of both CRS products and carefully selected materials from outside sources that provide background material on issues of very high congressional interest. Lists of subjects and policy areas that a committee might profitably pursue are periodically made available to each congressional committee. As provided by statute, the Service prepares decennially the Constitution of the United States—Analysis and Interpretation, and supplements at 2-year intervals, prepares compendiums for the annual national high school and college debate topics, and provides assistance to the Congressional Budget Office, the Office of Technology Assessment, and the General Accounting Office.

Documentation and status of legislation.—The Service prepares and publishes for distribution to the Congress the Digest of Public General Bills and Resolutions, including summaries of all public bills and resolutions introduced in Congress, the status of bills receiving action, and various pertinent indexes. Upon request, the Service prepares legislative history memorandums on bills for which hearings have been announced, and compiles and makes available to each committee reports on legislatively authorized programs and activities within that committee's jurisdiction that are scheduled to terminate during the current Congress.

Information and reference service.—The Congressional Research Service provides extensive information and reference assistance to Members and committees. Reference files containing clippings, pamphlets, and documents and automated information services are maintained for rapid information retrieval. Lists of selected reports, prepared by CRS staff on legislative issues, are regularly distributed to congressional offices. To provide faster responses and in-person services, the Service also maintains reference centers in congressional office buildings and the Congressional Reading Rooms in the Madison and Jefferson Buildings of the Library of Congress.

Executive direction and support.—Providing overall supervision and administrative support to the entire Congressional Research Service is the responsibility of the Office of the Director and the administrative personnel.

The National Library Service for the Blind and Physically Handicapped (NLS) is responsible for administering a national program to provide reading material for blind and physically handicapped residents of the United States and its outlying areas and for U.S. citizens residing abroad.

Direct service to users.—During the past 5-year period, 1985–89, the blind and physically handicapped readership throughout the country has grown from 664,600 to over 711,000 and circulation from approximately 19,300,000 units (volumes and containers) to almost 21,000,000.

Support services.—A variety of professional, technical, and clerical functions are performed by NLS's staff. A combined total of 22,500 requests for interlibrary loan searches or information concerning library and related services available to the blind and to other physically handicapped persons were received in 1989, and approximately 3,300 copyright permissions were granted.

The Oliver Wendell Holmes Devise fund and the permanent committee for the Oliver Wendell Holmes devise to administer it were created by an act of Congress, approved August 5, 1955 (69 Stat. 533).

The current program is devoted primarily to the preparation of a History of the Supreme Court of the United States, of which the first two volumes were published by the Macmillan Co. in 1972. The third, fourth and fifth volumes were published in August 1974, September 1981, and August 1985, respectively. The sixth and seventh volumes were published in 1988. Additional volumes are nearing completion.

Reader and reference services.—These services include the preparation of bibliographies, indexes, digests, and checklists; surveys of bibliographic services; and providing photostats, photographs, microfilm, and other forms of photoduplication, to other Government agencies, libraries and other institutions, and to the general public.

Organization and control of the collections.—In 1989 this included the ongoing updating of the Dewey Decimal Classification System, and a consultant's assistance in refining and testing network interconnections to facilitate the exchange of bibliographic information.

Public programs.—The Library sponsors lectures; poetry readings; musical concerts; the furtherance of musical research, composition, performance and appreciation; and the preparation of sound recordings of music and literature. This program also covers the distribution of recordings of the Library's literary programs and concerts to radio stations for public service broadcasts.

ADMINISTRATIVE PROVISIONS

[SEC. 201. Appropriations in this Act available to the Library of Congress shall be available, in an amount not to exceed $145,390, of which $46,200 is for the Congressional Research Service, when specifically authorized by the Librarian, for expenses of attendance at meetings concerned with the function or activity for which the appropriation is made.]

SEC. [202] *201.* (a) No part of the funds appropriated in this Act shall be used by the Library of Congress to administer any flexible or compressed work schedule which—

(1) applies to any manager or supervisor in a position the grade or level of which is equal to or higher than GS-15; and

(2) grants the manager or supervisor the right to not be at work for all or a portion of a workday because of time worked by the manager or supervisor on another workday.

(b) For purposes of this section, the term "manager or supervisor" means any management official or supervisor, as such terms are defined in section 7103(a) (10) and (11) of title 5, United States Code.

SEC. [203] *202.* Appropriated funds received by the Library of Congress from other Federal agencies to cover general and administrative overhead costs generated by performing reimbursable work for other agencies under the authority of 31 U.S.C. 1535 and 1536 shall not be used to employ more than 65 employees.

SEC. [204] *203.* Not to exceed [$2,500] *$10,000* of any funds appropriated to the Library of Congress may be expended, on the certification of the Librarian of Congress, in connection with official representation and reception expenses for the [annual] Library of Congress incentive awards program.

[SEC. 205. From and after October 1, 1988, the Library of Congress is authorized to—

(1) disburse funds appropriated for the John C. Stennis Center for Public Service Training and Development;

(2) compute and disburse the basic pay for all personnel of the John C. Stennis Center for Public Service Training and Development;

(3) provide financial management services and support to the John C. Stennis Center for Public Service Training and Development, in the same manner as provided with respect to the Office of Technology Assessment under section 101(c) of Public Law 97-51 (2 U.S.C. 142f); and

(4) collect from the funds appropriated for the John C. Stennis Center for Public Service Training and Development the full costs of providing the services specified in (1), (2), and (3) above, as provided under an agreement for services ordered under 31 U.S.C. 1535 and 1536.]

[SEC. 206. From and after October 1, 1989, the Librarian of Congress shall take appropriate action to assure that no legislative branch employee whose salary is disbursed by the Library of Congress disbursing office is adversely affected by alternative ways of performing the personnel/payroll processing function.] *(Legislative Branch Appropriations Act, 1990.)*

The Office of the Superintendent of Documents operates under a separate appropriation, which provides funds for: (1) the mailing for Members of Congress and other Government agencies of certain Government publications, as authorized by law; (2) the distribution of Government publications to designated depository libraries; (3) the compilation of catalogs and indexes of Government publications; and (4) the distribution of Government publications in the International Exchange Program. These four functions are related to the publication activity of other agencies and to the demands of the public, Members of Congress, and depository libraries. Consequently, the Office of the Superintendent of Documents can exercise little control over the volume of work which it may be called upon to perform. A description of these four functions follows:

Distribution for other Government agencies and Members of Congress.—The Office of Superintendent of Documents maintains mailing lists and mails, at the request of Government agencies and Members of Congress, certain publications specified by public law.

Depository library distribution.—As required, Government publications are supplied to libraries which are designated as depositories for Government publications.

Cataloging and indexing.—The Office of Superintendent of Documents is charged with preparing catalogs and indexes of all publications issued by the Federal Government. The principal publication is the "Monthly Catalog of U.S. Government Publications."

International exchange.—The Office of Superintendent of Documents distributes Government publications to foreign governments which agree, as indicated by the Library of Congress, to send to the United States similar publications of their governments for delivery to the Library of Congress.

The Government Printing Office executes orders for printing, binding, and blankbook work, placed by Congress and the various agencies of the Federal Government, and furnishes on order, blank paper, inks, and similar supplies. The Government Printing Office also sells publications to the public through its sales of publications program and distributes publications to the public for other Government agencies.

All such work is financed through the Government Printing Office revolving fund (44 U.S.C. 309). The fund is reimbursed by the customer agencies, receipts from sales of publications to the general public, and, except for the excess of receipts over costs associated with the sale of publications to the public, net operating income is retained for reuse by the fund.

The U.S. Tax Court hears and decides cases involving deficiences in Federal income, estate, gift taxes and in excise taxes relating to public charities, private foundations, qualified pension plans, and real estate investment trusts. It also renders declaratory judgments regarding the qualification or continuing qualification (including revocation of rulings on the exemptions) of retirement plans.

The Tax Court has jurisdiction to render declaratory judgments with respect to exempt organization status determinations pursuant to section 501(c)(3), Internal Revenue Code, and to enter declaratory judgments on the tax treatment of interest on proposed issues of governmental obligations. In addition, the court has jurisdiction over actions to restrain disclosure and to obtain additional disclosure with respect to public inspection of written determinations issued by the Internal Revenue Service, and actions to compel the disclosure of the identity of third-party contacts relating to written determinations made by the Internal Revenue Service.

The Tax Court has jurisdiction to restrain the premature assessment and collection of any tax that is the subject of a petition before the Court, to review post-petition jeopardy levies and jeopardy assessments, to review Internal Revenue Service determinations to sell property seized pursuant to a jeopardy assessment, and to award administrative and litigation costs.

For 1991, the court proposes a trial program of 400 weeks consisting of 230 weeks of regular trial sessions and 170 weeks of small tax case sessions. Trials are held in approximately 80 cities throughout the United States.

Statistics on the actual and estimated number of cases before the court are presented in the following tabulation:

The Commission on Security and Cooperation in Europe is authorized and directed to monitor the acts of the signatories which reflect compliance with or violation of the articles of the Final Act of the Conference on Security and Cooperation in Europe, with particular regard to the provisions relating to Cooperation in Humanitarian Fields. The law establishing the Commission on Security and Cooperation in Europe also mandated it to monitor and encourage U.S. Government and private activities designed to expand East-West trade and the exchange of people and ideas. The Commission will receive semiannual reports from the President on the signatories' compliance with the Final Act and on U.S. activities in trade and cultural/humanitarian exchange and it will itself make advisory reports to the Congress on the progress of implementation.

The Commission is made up of nine Senators, nine Members of the House of Representatives and one Commissioner each from the Departments of State, Defense, and Commerce.

The John C. Stennis Center was established by Public Law 100–458. The purposes of the Center are (1) to increase awareness of the importance of public service, to foster among the youth of the United States greater recognition and understanding of the role of public service in the development of the United States, and to promote public service as a career choice; (2) to provide training and development opportunities for State and local elected government officials and employees of State and local governments in order to assist such officials and employees to become more effective and more efficient in performing their public duties and to develop their potential for accepting increased public service opportunities; and (3) to provide training and development opportunities for those employees of Members of the Congress who perform key roles in helping Members of Congress serve the people of the United States. The Center is authorized to develop such programs, activities, and services as it considers appropriate to carry out its purposes. The principal amount of $7,500,000 was transferred to the John C. Stennis Center for Public Service Development trust fund.

TITLE III—GENERAL PROVISIONS

SEC. 301. No part of the funds appropriated in this Act shall be used for the maintenance or care of private vehicles, except for emergency assistance and cleaning as may be provided under regulations relating to parking facilities for the House of Representatives issued by the Committee on House Administration and for the Senate issued by the Committee on Rules and Administration.

SEC. 302. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 303. Whenever any office or position not specifically established by the Legislative Pay Act of 1929 is appropriated for herein or whenever the rate of compensation or designation of any position appropriated for herein is different from that specifically established for such position by such Act, the rate of compensation and the designation of the position, or either, appropriated for or provided herein, shall be the permanent law with respect thereto: *Provided*, That the provisions herein for the various items of official expenses of Members, officers, and committees of the Senate and House, and clerk hire for Senators and Members shall be the permanent law with respect thereto.

SEC. 304. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

SEC. 305. (a) The Architect of the Capitol, in consultation with the heads of the agencies of the legislative branch, shall develop an overall plan for satisfying the telecommunications requirements of such agencies, using a common system architecture for maximum interconnection capability and engineering compatibility. The plan shall be subject to joint approval by the Committee on House Administration of the House of Representatives and the Committee on Rules and Administration of the Senate, and, upon approval, shall be communicated to the Committee on Appropriations of the House of Representatives and the Committee on Appropriations of the Senate. No part of any appropriation in this Act or any other Act shall be used for acquisition of any new or expanded telecommunications system for an agency of the legislative branch, unless, as determined by the Architect of the Capitol, the acquisition is in conformance with the plan, as approved.

(b) As used in this section—

(1) the term "agency of the legislative branch" means, the Office of the Architect of the Capitol, the Botanic Garden, the General Accounting Office, the Government Printing Office, the Library of Congress, the Office of Technology Assessment, and the Congressional Budget Office; and

(2) the term "telecommunications system" means an electronic system for voice, data, or image communication, including any associated cable and switching equipment.

[Sec. 306. (a) Hereafter, notwithstanding the applicable statutes described in subsection (b), an agency of the legislative branch to which those statutes apply is authorized to use telecommunications systems and services provided by the Architect of the Capitol or the House of Representatives or the Senate under the approved plan required by section 305 of Public Law 100–202 (101 Stat. 1329–308) if such systems and services—

(1) have been acquired competitively; and

(2) have been determined by the Architect of the Capitol to be at least equal in quality to, and not greater in cost than, the systems and services available under the procurement conducted by the Administrator of General Services known as "FTS2000".

(b) The applicable statutes described in this subsection are—

(1) section 111 of the Federal Property and Administrative Services Act of 1949; and

(2) the Treasury, Postal Service and General Government Appropriations Act of 1990.

(c) As used in this section, the term "agency of the legislative branch" means the office of the Architect of the Capitol, the Botanic Garden, the General Accounting Office, the Government Printing Office, the Library of Congress, the Office of Technology Assessment, and the Congressional Budget Office.]

[Sec. 307. The pay for the positions described in section 308(b) of the Legislative Branch Appropriations Act, 1988, as contained in section 101(i) of Public Law 100–202—

(1) shall be subject to any applicable adjustment during fiscal year 1990 under, or by reference to any applicable adjustment during fiscal year 1990 under, subchapter I of chapter 53 of title 5, United States Code; and

(2) with respect to the position of Assistant Architect of the Capitol, shall be subject to any recommendation of the President that, pursuant to section 225 of the Federal Salary Act of 1967 (2 U.S.C. 351 et seq.), takes effect during fiscal year 1990.]

Sec. 306. (a) Notwithstanding any other provision of law—

(1) Section 307 of Public Law 101–163 is repealed, and shall be treated as though it had never been enacted.

(2) Effective on the first day of the first applicable pay period commencing on or after the date of enactment of this Act, the compensation for the following positions under the Architect of the Capitol shall hereafter be at an annual rate of basic pay equivalent to the rate for level 5 of the Senior Executive Service established under section 5382 of title 5, United States Code: the Administrative Assistant, the Executive Officer, the Director of Engineering, the Budget Officer, the General Counsel, the Superintendent of the Senate Office Buildings, the Superintendent of the House Office Buildings, and the Supervising Engineer of the United States Capitol.

(b) Effective upon enactment of this Act, the Architect of the Capitol is authorized to fix the compensation of six positions, without regard to Chapter 51 of Title 5, United States Code, at an annual rate of basic pay not-to-exceed the rate for level 4 of the Senior Executive Service established under section 5382 of title 5, United States Code.

Sec. [308.] *307.* (a) None of the funds appropriated for fiscal year [1990] *1991* by this Act or any other law may be obligated or expended by any entity of the executive branch for the procurement from commercial sources of any printing related to the production of Government publications (including forms), unless such procurement is by or through the Government Printing Office.

(b) Subsection (a) does not apply to (1) individual printing orders costing not more than $1,000, if the work is not of a continuing or repetitive nature, (2) printing for the Central Intelligence Agency, the Defense Intelligence Agency, or the National Security Agency, or (3) printing from commercial sources that is specifically authorized by law or is of a kind that has been routinely procured by or through the Government Printing Office.

(c) As used in this section, the term "printing" means the process of composition, platemaking, presswork, binding, and microform, and the end items of such processes.

[Sec. 309. Section 309(a) of title 44, United States Code, is amended by striking out "not to exceed $3,000 in any fiscal year" after "attendance at meetings".]

[Sec. 310. There is established, as a joint office of Congress, the Special Services Office, which (under the supervision and control of a board, to be known as the Special Services Board, comprised of the Clerk of the House of Representatives, the Sergeant at Arms and Doorkeeper of the Senate, and the Librarian of Congress) shall provide special services to Members of Congress, and to officers, employees, and guests of Congress.]

[Sec. 311. Such sums as may be necessary for fiscal year 1990 pay raises for programs funded by this Act shall be absorbed within the levels appropriated in this Act.]

[Sec. 312. Section 6121(1) of title 5, United States Code, is amended by inserting "the Government Printing Office," after "military department,". Also, section 6133(c) of such title is amended by inserting "(1)" after "(c)"; and by adding at the end thereof the following new paragraph: "(2) With respect to employees in the Government Printing Office, the authority granted to the Office of Personnel Management under this subchapter shall be exercised by the Public Printer.".]

[Sec. 313. (a) The first section of House Resolution 21, Ninety-Ninth Congress, agreed to December 11, 1985, as enacted into permanent law by section 103 of the Legislative Branch Appropriations Act, 1987 (as incorporated by reference in section 101(j) of Public Law 99-500 and Public Law 99–591) (40 U.S.C. 184b) is amended by striking out "educationally enriching child care" and all that follows through the end of the section, and inserting in lieu thereof the following: "educationally enriching child care—

"(1) for children of Members, officers, employees, and support personnel of the House of Representatives; and

"(2) if places are available after admission of all children who are eligible under paragraph (1), for children of Senators, children of officers and employees of the Senate, and children of employees of agencies of the legislative branch.".

(b) Section 4 of such resolution, as so enacted (40 U.S.C. 184e), is amended—

(1) in subsection (a), by striking out the second sentence; and

(2) in the first sentence of subsection (b), by striking out "to make the reimbursements required by subsection (a) and".

(c) Section 5 of such resolution, as so enacted (40 U.S.C. 184f), is amended—

(1) in the matter before paragraph (1), by striking out ", the term"; and

(2) by striking out paragraphs (1) through (3) and inserting in lieu thereof the following:

"(1) the term 'employee of the House of Representatives' means an employee whose pay is disbursed by the Clerk of the House of Representatives;

"(2) the term 'employee of the Senate' means an employee whose pay is disbursed by the Secretary of the Senate;

"(3) the term 'Member' means, with respect to the House of Representatives, a Representative in, or a Delegate or Resident Commissioner to, the Congress;

"(4) the term 'agency of the legislative branch' means the Office of the Architect of the Capitol, the Botanic Garden, the General Accounting Office, the Government Printing Office, the Library of Congress, the Office of Technology Assessment, the Congressional Budget Office, and the Copyright Royalty Tribunal; and

"(5) the term 'support personnel' means, with respect to the House of Representatives, any employee of a credit union or of the Architect of the Capitol, whose principal duties are to support the functions of the House of Representatives.".]

[Sec. 314. No department, agency, or instrumentality of the United States receiving appropriated funds under this Act for fiscal year 1990, shall obligate or expend any such funds, unless such department, agency, or instrumentality has in place, and will continue to administer in good faith, a written policy designed to ensure that all of its workplaces are free from the illegal use, possession, or distribution of controlled substances (as defined in the Controlled Substances Act) by the officers and employees of such department, agency, or instrumentality.]

[Sec. 315. Effective in the case of this Act and any subsequent Act making appropriations for the Legislative Branch, for purposes of the

Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99–177), as amended, or any other Act which requires a uniform percentage reduction in accounts in this Act and any subsequent Act making appropriations for the Legislative Branch, the accounts under the general heading "Senate", and the accounts under the general heading "House of Representatives", shall each be considered to be one appropriation account and one "program, project, and activity".❳

❲SEC. 316. (a)(1) Effective January 1, 1990, the total number of pieces of mail which may be mailed as franked mail under section 3210(d) of title 39, United States Code, during any calendar year by a Senator entitled to mail franked mail may not exceed an amount equal to three multiplied by the number of addresses to which such mail may be delivered in the State from which the Senator was elected (as determined on the basis of the most recent statistics, from the United States Postal Service, available prior to such calendar year). Any mail matter which relates solely to a notice of appearance or a scheduled itinerary of a Senator in the State from which such Senator was elected shall not count against the limitation set forth in the preceding sentence.

(2) Effective January 1, 1990, the total number of pieces of mail which may be mailed as franked mail under section 3210(d) of title 39, United States Code, during any calendar year by a Member of the House of Representatives entitled to mail franked mail may not exceed an amount equal to three multiplied by the number of addresses to which such mail may be delivered in the area from which the Member was elected (as determined on the basis of the most recent statistics, from the United States Postal Service, available prior to such calendar year). Any mail matter which relates solely to a notice of appearance or a scheduled itinerary of a Member in the area from which such Member was elected shall not count against the limitation set forth in the preceding sentence.

(b) Effective January 1, 1990, a mass mailing (as defined in section 3210(a)(6)(E) of title 39, United States Code) by a Senator or a Member of the House of Representatives shall be limited to 2 sheets of paper (or their equivalent), including any enclosure that—

(1) is prepared by or for the Senator or Member who makes the mailing; or

(2) contains information concerning, expresses the views of, or otherwise relates to the Senator or Member who makes the mailing.

(c) Effective October 1, 1989, section 3216 of title 39, United States Code, is amended by striking out "by a lump sum appropriation to the legislative branch" and inserting in lieu thereof "by appropriations for the official mail costs of the Senate and the House of Representatives".❳

❲SEC. 317. At the end of section 3216 of title 39, United States Code, add the following new subsection:

"(e)(1) Not later than two weeks after the last day of each quarter of the fiscal year, or as soon as practicable thereafter, the Postmaster General shall send to the Clerk of the House, the House Commission on Congressional Mailing Standards, the Secretary of the Senate, and the Senate Committee on Rules and Administration a report which shall contain a tabulation of the estimated number of pieces and costs of franked mail, as defined in section 3201 of this title, in each mail classification sent through the mail for that quarter and for the preceding quarters in the fiscal year, together with separate tabulations of the number of pieces and costs of such mail sent by the House and by the Senate.

"(2) Two weeks after the close of the second quarter of the fiscal year, or as soon as practicable thereafter, the Postmaster General shall send to the Clerk of the House, the House Commission on Congressional Mailing Standards, the Committee on House Administration, the Secretary of the Senate, and the Senate Committee on Rules and Administration, a statement of the costs of postage on, and fees and charges in connection with, mail matter sent through the mails as described in subsection (1) of this section for the preceding two quarters together with an estimate of such costs for the balance of the fiscal year. As soon as practicable after receipt of this statement, the House Commission on Congressional Mailing Standards, the Committee on House Administration, and the Senate Committee on Rules and Administration shall consider promulgating such regulations for their respective Houses as may be necessary to ensure that total postage costs, as described in subsection (1) of this section, will not exceed the amounts available for the fiscal year.".❳

❲SEC. 318. Section 3210(a)(6) of title 39, United States Code, is amended—

(1) in subparagraph (A)(i) by striking out "is mailed fewer" and inserting in lieu thereof "is postmarked fewer"; and

(2) in subparagraph (A)(ii)(II) by striking out "is mailed fewer" and inserting in lieu thereof "is postmarked fewer";

(3) in subparagraph (c) by striking out "is mailed fewer" and inserting in lieu thereof "is postmarked fewer"; and

(4) by adding at the end thereof the following new subparagraph:

"(F) For purposes of subparagraphs (A) and (C) if mail matter is of a type which is not customarily postmarked, the date on which such matter would have been postmarked if it were of a type customarily postmarked shall apply.".❳

❲SEC. 319. (a)(1) The Architect of the Capitol shall be appointed by the President by and with the advice and consent of the Senate for a term of 10 years.

(2) There is established a commission to recommend individuals to the President for appointment to the Office of Architect of the Capitol. The Commission shall be composed of—

(A) the Speaker of the House of Representatives,

(B) the President pro tempore of the Senate,

(C) the majority and minority leaders of the House of Representatives and the Senate, and

(D) the chairmen and the ranking minority members of the Committee on House Administration of the House of Representatives and the Committee on Rules and Administration of the Senate.

The commission shall recommend at least three individuals for appointment to such office.

(3) An individual appointed Architect of the Capitol under paragraph (1) shall be eligible for reappointment to such office.

(b) Subsection (a) shall be effective in the case of appointments made to fill vacancies in the Office of Architect of the Capitol which occur on or after the date of the enactment of this Act. If no such vacancy occurs within the six-year period which begins on the date of the enactment of this Act, no individual may, after the expiration of such period, hold such office unless the individual is appointed in accordance with subsection (a).❳

❲SEC. 320. Section 119(a)(7) of Public Law 100–458 is amended to read as follows: "To make other necessary expenditures including official reception and representation expenses.".❳

❲SEC. 321. For payment to Alison Leland, widow of Mickey Leland, late a Representative from the State of Texas, $89,500. For payment to Shelia A. Smith, widow of Larkin Smith, late a Representative from the State of Mississippi, $89,500.❳

SEC. 308. Section 309(a) of title 44, United States Code, is amended by striking out "uniforms, or allowances therefor, as authorized by section 5901 of Title 5" and inserting in lieu thereof the following: "uniforms or uniform allowances"

SEC. 309. Section 1703 of title 44, United States Code, is amended by striking out ", the cost to be charged against the appropriation for printing and binding for Congress" from the first sentence. Section 1707 of such title is amended by striking out "The appropriation for printing and binding" from the last sentence, and inserting in lieu thereof the following: "The Revolving Fund". (Legislative Branch Appropriations Act, 1990.)

SEC. 310. Section 303 of title 44, United States Code, is amended to read as follows: The annual rate of pay for the Public Printer shall be a rate which is equal to the rate for level III of the Executive Schedule of subchapter II of chapter 53 of title 5. The annual rate of pay for the Deputy Public Printer shall be a rate which is equal to the rate for level IV of such Executive Schedule.

The United States Court of Appeals for the Federal Circuit has exclusive jurisdiction of appeals from final decisions of all Federal district courts in cases arising under 28 U.S.C. 1338; 35 U.S.C. sections 145 and 146; 28 U.S.C. 1346(a)(2); final decisions of the U.S. Court of International Trade; final decisions of the U.S. Claims Court; final decisions of the U.S. Court of Veterans Appeals; final determinations of the U.S. International Trade Commission relating to unfair practices in import trade made under 19 U.S.C. 1337; findings of the Secretary of Commerce under headnote 6 to schedule 8, part 4, of the Tariff Schedules of the United States relating to importation of educational or scientific instruments and apparatus; final orders or decisions of the Merit Systems Protection Board, final decisions of the General Accounting Office Personnel Appeals Board, and final decisions of all agency Boards of Contract Appeals; and exclusive jurisdiction over appeals from final decisions of the Patent and Trademark Office tribunals on patent applications and interferences, trademark applications and interferences, cancellations, concurrent uses, and oppositions; and appeals under section 71 of the Plant Variety Protection Act of 1970.

The court also has exclusive jurisdiction of (1) appeals from interlocutory orders or decrees in cases where the court would have jurisdiction of the appeal; (2) appeals from interlocutory orders granting or denying in whole or in part a motion to transfer an action to the U.S. Claims Court; and (3) appeals from judgments in civil actions for patent infringement otherwise appealable to the court and final except for accounting. The court may, in its discretion, permit an appeal from an interlocutory order of a judge who certifies that there is a controlling question of law and a substantial ground for difference of opinion thereon, and an immediate appeal may materially advance the ultimate termination of the litigation.

The United States Court of International Trade, established under Article III of the Constitution of the United States, was created by the Act of October 10, 1980 (94 Stat. 1727), effective November 1, 1980, as successor to the former United States Customs Court. The court has original and exclusive jurisdiction of civil actions against the United States, its agencies and officers, and certain civil actions brought by the United States, arising out of import transactions and Federal statutes affecting international trade. The court possesses all the powers in law and equity of, or as conferred by statute upon, a district court of the United States, and is authorized to conduct jury trials. The geographical jurisdiction of the court is nationwide and trials before the court may be held at any place within the jurisdiction of the United States. The court also is authorized to hold hearings in foreign countries. The principal statutory provisions pertaining to the court are contained in the following sections of title 28 of the United States Code: Organization, sections 251 to 257; Jurisdiction, sections 1581 to 1585; and Procedures, sections 2631 to 2647.

SALARIES AND EXPENSES*—Continued

Funds appropriated under this heading are for the salaries and benefits of judges and supporting personnel and all operating expenses of the United States courts of appeals, district courts, bankruptcy courts, and Claims Court and are shown by activity:

Court automation support.—This activity provides the resources necessary for automated docketing and case management, office automation and data communication installation and support services. The 1991 request includes funds to support additional personnel for the expansion of automated systems in the courts.

Salaries of judges.—This activity includes the salaries and benefits of all active United States circuit and district judges (including judges of the territorial courts of the United States), Claims Court judges, bankruptcy judges, and all justices and judges who have retired from office or from regular active service in pursuance of law. The fiscal year 1991 request includes funds for an increase in the number of senior judges.

Salaries of supporting personnel.—The salaries and benefits of all other officers and employees of the Federal Judiciary not otherwise specifically provided for are included under this activity. It provides for United States magistrates; the administrative and legal aides required to assist the judges and magistrates in the conduct of hearings, trials, and other judicial functions; and personnel to staff the component offices of the courts, including the Federal Probation Service. For fiscal year 1991, funds are included for additional supporting personnel required as a result of increased workload.

Expenses of operation and maintenance of the courts.—Funds included under this activity are for travel expenses incurred by judges, magistrates, and supporting personnel in attending sessions of court or transacting other official business and for relocation expenses, communications, printing, contractual services, supplies, equipment, and lawbooks. The fiscal year 1991 request includes funds to support the additional supporting personnel; expansion of the drug dependent offenders program; and increases in the cost of services, supplies, and equipment.

Space and facilities.—This activity provides for the rental of space, alterations, and related services for United States court facilities.

Funds appropriated under this heading provide for the administration and operation of the Criminal Justice Act of 1964 (18 U.S.C. 3006A), as amended, which provides for furnishing representation for any person financially unable to obtain adequate representation: (1) who is charged with a felony or misdemeanor (other than a petty offense, unless the defendant faces the likelihood of loss of liberty), or with juvenile delinquency, or with a violation of probation; (2) who is under arrest, when such representation is required by law; (3) who is entitled to appointment of counsel in parole proceedings under chapter 311 of title 18, United States Code; (4) who is subject to a mental condition hearing under chapter 313 of title 18, United States Code; (5) who is in custody as a material witness; (6) who is entitled to appointment of counsel under the sixth amendment to the Constitution; (7) who faces loss of liberty in a case, and Federal law requires the appointment of counsel; or (8) who is seeking relief under section 2241, 2254, or 2255 of title 28, United States Code. Representation includes counsel and investigative, expert, and other necessary services. The appropriation includes funding for the compensation and expenses of court-appointed counsel and persons providing investigative, expert and other services under the Act, for the operation of the Federal Defender organizations, and for the continuing education and training of persons providing representational services under the Act. In addition, this appropriation is available for the compensation of counsel: (1) appointed pursuant to 5 United States Code Section 3109 to assist the court in criminal cases where the defendant has waived representation by counsel; and (2) appointed pursuant to 28 United States Code Section 1875 to represent jurors in civil actions for the protection of their employment.

The following sections are proposed for deletion and do not appear below:

Sec. 403. Prohibition of restrictions on the issuance bankruptcy notices to creditors and other interested parties.

Sec. 404. Provides for fees associated with bankruptcy notices, and the establishment of the Judiciary Automation Fund.

Sec. 406. Relates to amending fee amounts and prescribing fees on motions.

Sec. 401. Appropriations and authorizations made in this title which are available for salaries and expenses shall be available for services as authorized by 5 U.S.C. 3109.

Sec. 402. Appropriations made in this title shall be available for salaries and expenses of the Temporary Emergency Court of Appeals authorized by Public Law 92-210 and the Special Court established under the Regional Rail Reorganization Act of 1973, Public Law 93-236.

[JUDICIARY AUTOMATION FUND]

Sec. [405] *403.* Appropriations made in this title which are available for salaries and expenses shall be available, notwithstanding the limitations in 31 U.S.C. section 1345, for the Judicial Conference of the United States to sponsor and host the Fifth International Appellate Judges Conference in the United States, provided that an amount shall be available only if the Appropriations Committees of both Houses of Congress are notified fifteen days in advance of any obligation or expenditure. The Judicial Conference may supplement such appropriations with other funds made available by any department or agency for the purposes of technical foreign aid, educational and cultural programs with the people of foreign countries, or commemorating the bicentennial anniversary of the United States Constitution and the Bill of Rights, provided that any supplementation shall be only for the expenses of the Fifth International Appellate Judges Conference. The Director of the Administrative Office may also accept and utilize gifts of funds, to be deposited as a special deposit account in the Treasury, for the expenses of the Fifth International Appellate Judges Conference for reimbursement of appropriations or direct expenditure, provided that any unexpended balance of the special deposit account shall be returned to the donor or donors. For the purpose of the conference, the Director is authorized to pay for local travel and incidental expenses of foreign participants and dependent members of their immediate household, to pay for per diem to such persons in lieu of subsistence at rates prescribed by the Director, and to conduct and pay for the activities set forth in subsec-

tions (1), (2), (9), (15), and (18) of section 804 of the United States Information and Educational Exchange Act of 1948, as amended (22 U.S.C. section 1474). Appropriations for commemorating the bicentennial or for salaries and expenses of the Judiciary shall not be made available by this section for the travel and incidental expenses of dependents. Nothing in this section precludes payment for the travel and other expenses of foreign participants and their dependents by any other department or agency, or by the Director on their behalf, as authorized by law.

Sec. 404. (a) The Judicial Conference shall prescribe reasonable fees, pursuant to sections 1913, 1914, 1926, and 1930 of Title 28, United States Code, for collection by the courts under those sections for access to information available through automatic data processing equipment. These fees may distinguish between classes of persons, and shall provide for exempting persons or classes of persons from the fees, in order to avoid unreasonable burdens and to promote public access to such information. The Director, under the direction of the Judicial Conference of the United States, shall prescribe a schedule of reasonable fees for electronic access to information which the Director is required to maintain and make available to the public.

(b) The Judicial Conference and the Director shall transmit each schedule of fees prescribed under paragraph (a) to the Congress at least 30 days before the schedule becomes effective. All fees hereafter collected by the Judiciary under paragraph (a) as a charge for services rendered shall be deposited as offsetting collections to the Judiciary Automation Fund pursuant to 28 U.S.C. 612(c)(1)(A) to reimburse expenses incurred in providing these services. (The Judiciary Appropriations Act, 1990.)

This Office assists the President in the discharge of his budgetary, management, and other executive responsibilities.

Budget review.—Budget instructions and procedures are developed, review of agency estimates is coordinated, budget data systems are maintained, agency financial management plans are reviewed, and the budget document is prepared.

National security and international affairs, Economics and government, Natural resources, energy, and science, and Human resources, veterans, and labor.—Agency programs, budget requests, and management activities are examined, appropriations are apportioned, proposed changes in agency functions are studied, and special studies aimed at establishing goals and objectives that would result in long- and short-range improvements in the agencies' financial, administrative, and operational management are conducted.

Director's office.—Executive direction and coordination for all Office of Management and Budget activities is provided. This includes the Director's immediate office as well as staff support in the areas of administration, public affairs, legislative reference, congressional and legislative affairs, economic policy, and General Counsel.

Management.—Development and oversight of the implementation of Government-wide management policies and programs. OMB's Management staff provides policy leadership, review and assistance to aid the improvement of Federal program management in the areas of service delivery, collections, management integrity, management and control systems, personnel management, Federal-State-local-relations, cash and credit management, Total Quality Management, a drug-free workplace, privatization, and program evaluation.

Information and regulatory affairs.—Policy leadership and assistance to agencies in paperwork management and reduction, ADP telecommunications policy, statistical policy, information policy and regulatory reviews are provided. Estimates include resources necessary for the Office of Information and Regulatory Affairs in the Office of Management and Budget to implement the Paperwork Reduction Act of 1980 (as amended by the Paperwork Reduction Act of 1986) and other functions delegated or assigned by the Director.

GUARANTY RESERVE FUND

If during fiscal year [1990] *1991 and any fiscal year thereafter,* the funds available in the Guaranty Reserve Fund (Fund) are insufficient to enable the Secretary of Defense (Secretary) to discharge his responsibilities, as guarantor of loans guaranteed pursuant to section 24 of the Arms Export Control Act (AECA) or pursuant to the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1988, under the heading "Foreign Military Sales Debt Reform", the Secretary shall issue to the Secretary of the Treasury notes or other obligations in such forms and denominations, bearing such maturities, and subject to such terms and conditions, as may be prescribed by the Secretary of the Treasury. Such notes or obligations may be redeemed by the Secretary from appropriations and other funds available, including repayments by the borrowers of amounts paid pursuant to guarantees issued under section 24 of the AECA. Such notes or other obligations shall bear interest at a rate determined by the Secretary of the Treasury, taking into consideration the average market yield on outstanding marketable obligations of the United States of comparable maturities during the month preceding the issuance of the notes or other obligations. The Secretary of the Treasury shall purchase any notes or other obligations issued hereunder and for that purpose he is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, and the purposes for which securities may be issued under the Second Liberty Bond Act are extended to include any purchase of such notes or obligations. The Secretary of the Treasury may at any time sell any of the notes or other obligations acquired by him under this heading. All redemptions, purchases, and sales by the Secretary of the Treasury of such notes or other obligations shall be treated as public debt transactions of the United

States. *(Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1990.)*

The International Bank for Reconstruction and Development (World Bank) finances development projects in less developed countries. By applying banking principles to the achievement of development goals, it promotes increased economic productivity and helps developing economies meet more of the basic needs of their people. Since its founding in 1945, the Bank has made loan commitments of approximately $171 billion.

The Bank's 1989 lending program included 119 loan commitments to 37 countries for a total of $16.4 billion. More than twice this amount was contributed to these projects by recipient countries, commercial lenders, and other multilateral or bilateral agencies.

The Administration's request for 1991 consists of: $110.6 million in budget authority for paid-in capital subscriptions and $4.6 billion in program limitations for callable capital subscriptions to complete the first, second, and third installments on the U.S. share of a $74.8 billion general capital increase.

The International Development Association (IDA), a member of the World Bank Group, provides development financing on highly concessional terms to the world's poorest nations. IDA is the largest source of multilateral lending extended on concessional terms to developing countries. Projects have to meet the same economic and financial standards as other World Bank projects.

By June 30, 1989, IDA had extended credits totaling $52.7 billion for development projects in 90 countries. IDA assistance is concentrated overwhelmingly in the poorest countries—mainly those with an annual per capita gross national product of less than $400 in 1985 dollars. In 1989, IDA's lending program included 106 credits to 42 countries for a total of $4.9 billion.

The Ninth Replenishment of IDA will provide resources of nearly $14.8 billion. The United States has pledged $3.180 billion to the replenishment and the $1,064 million requested in 1991 is to pay $1,060 million for the first IDA-9 payment and $4 million to complete IDA-8.

The Inter-American Development Bank (IDB) promotes the economic and social development of Latin America and the Caribbean through loans and technical assistance. In its 28 years of operation, the Bank has lent nearly $41.3 billion for projects that represent a total investment of more than $118 billion.

The Bank lends money through: (1) the ordinary capital window that lends at near-market rates; (2) the Fund for Special Operations (FSO) which makes loans on concessional terms to the region's poorest nations; and (3) the Inter-American Investment Corporation (IIC), which will make loans and equity investments for small and medium sized private enterprises.

The 1991 request includes: (1) budget authority of $135,957 for paid-in capital subscriptions to complete the U.S. share of the Sixth Replenishment of the Bank's capital; (2) budget authority of $274,016 to complete the U.S. share of the current replenishment of the Fund for Special Operations (FSO); (3) budget authority of $25.5 million to complete the U.S. share of the initial capitalization of the Inter-American Investment Corporation; (4) budget authority of $57.3 million for paid-in capital subscriptions for the first U.S. payment to the Seventh Replenishment of the Bank's capital; and (5) budget authority of $20.6 million for the first U.S. payment to the Seventh Replenishment of the Fund for Special Operations.

The African Development Bank (AFDB) makes loans at near-market rates for the economic and social development of its African members. Membership in the Bank was restricted to African nations until 1982 when non-regional countries were allowed to join. The U.S. became a member of the Bank in 1983 with an initial subscription of $360 million of AFDB capital.

In 1988, the AFDB lent $1.4 billion for development projects in 18 countries. The Bank expects to lend about $1.6 billion in 1989.

The 1991 request of $10.1 million of paid-in capital and $135.4 million of program limitations for callable capital subscriptions is to complete the third installment and pay the fourth installment on the $719 million U.S. share of the $13 billion increase in AFDB capital.

Development Programs.—This program provides economic resources to developing countries with the aim of bringing the benefits of development to the poor. The program promotes broad-based, self-sustaining economic growth in developing countries by supporting appropriate policy changes. Assistance under this program is concentrated in those areas in which the United States has special expertise and which promise the greatest opportunity for the poor to better their lives.

Among other activities, funds are provided to: support developing country efforts to improve the productivity and income of small farmers, create greater rural employment opportunities, enhance rural infrastructure and the environment, improve nutrition and remove impediments to equitable economic growth; support efforts of developing countries to reduce population growth rates and to provide families with effective options in choosing the number and spacing of their children; assist developing countries to increase access to health care and nutrition services, to make safe water and adequate sanitation more widely available, to reduce the incidence of debilitating tropical diseases, malnutrition, diarrheal infections, measles and other preventable diseases, and to increase governmental capacity to plan and manage their health resources; provide funds for programs designed to deal directly with the special health needs of children and mothers including oral rehydration therapy to combat the effects of diarrheal diseases, immunization and other primary health care efforts aimed at cutting in half infant and child mortality rates in developing countries; support the efforts of developing countries to provide basic education for children, improve the fundamental life skills of adults, and improve the management skills and performance of managers of development programs; provide assistance to enable developing countries to better contend with national energy problems, to cope with employment and income problems in urban areas, to mitigate the problems of rapid urban migration, and to improve environmental management and resource planning; encourage private enterprise development and the stimulation of competitive markets which are vital to the promotion of self-sustaining, broad-based economic growth in developing countries; support new and innovative research on problems of development and assists developing countries in improving their scientific and technological capacities; and provide assistance for the prevention and control of AIDS through the World Health Organization (WHO) Special Programme on AIDS and through bilateral activities in A.I.D.-assisted countries in support of country programs designed in conjunction with WHO.

The Sub-Saharan Africa account is a single account resource designed to allow A.I.D. greater effectiveness in meeting Africa's development requirements. Resources are used in both project and non-project modes to address shared development program and policy commitments of reform-oriented African countries. The account assures availability of resources for Africa and provides greater flexibility in supporting the objective of growth with equity in Africa. No-year funding is proposed for this development program.

The Sahel development program helped promote food self-sufficiency and self-sustaining economic growth in the Sahel region of Africa. Assistance was furnished in accordance with a long-term, multidonor development plan based on equitable burden sharing with other donors and the assisted African countries.

In 1988, the Administration placed all new funding for Africa in the Sub-Saharan Africa, Development Assistance account.

Legislation will be proposed to provide funds to support democracy and economic restructuring in Eastern European countries.

This account provides funds for extraordinary assistance in countries undertaking economic reforms. The Special Assistance Initiatives were inaugurated in 1990 with $160 million for the initial U.S. contribution to the Philippines Multilateral Assistance Initiative (MAI). This initiative by multilateral and bilateral donors with the private sector will provide assistance to the Philippines to support democracy and economic restructuring. Obligation of U.S. resources will be based on agreement with the Philippine government on specific programs, projects and economic and administrative reforms.

These funds provide assistance to schools, libraries, and hospitals abroad founded or sponsored by U.S. citizens that serve as demonstration centers for American ideas and practices in education and medicine. Emphasis is given to geographic dispersion of the program, with special priority to institutions in less developed countries. Grants generally finance new physical facilities, special medical and training programs, and the procurement of equipment.

For 1991, the Administration proposes to bring into the appropriation process spending for the Zablocki Wing of the American Children's Hospital in Poland. Under existing legislation, $3 million in convertible Polish currency is estimated to be spent in FY 1990 on the project. Beginning in FY 1991, the Administration proposes funding the Zablocki project from the American Schools and Hospitals Abroad appropriation.

TRADE CREDIT INSURANCE PROGRAM—Continued

Related Programs Appropriations Act, 1990; additional authorizing legislation to be proposed.)

The Trade Credit Insurance Program is a secondary guaranty program designed to promote recovery of the private export sector in Central America. Given the continuation of the weak financial position of the Central American economies, which limits their access to the Export-Import Bank's regular credit programs, new authority of $200 million to commit to guarantee or insure loans is sought for 1991. In addition, commitment authority is sought for a similar program in Poland that was authorized by section 304 of the *Support for East European Democracy (SEED) Act of 1989.*

The Housing Guaranty program extends guaranties to U.S. private investors who make loans to developing countries to assist them in formulating and executing sound housing and community development policies that meet the needs of lower income groups. Activities to be carried out will emphasize: (1) sites and services and core housing projects providing homesites and shelter for poor families; (2) slum upgrading projects designed to conserve and improve existing shelter; (3) low-income shelter projects designed for demonstration or institution building purposes; and (4) project-related community facilities and services. A new sector policy, adopted in 1988, is being used to encourage more rapid utilization of funds. A program level of $100 million is adequate in 1991 given the need to implement the large pipeline of authorized but uncontracted commitments. The borrowing authority in 1991 is to replenish the Housing Guaranty reserve, depleted as a result of increased loan reschedulings.

Section 608 of the Foreign Assistance Act of 1961, as amended, created a revolving fund to finance the acquisition and rehabilitation at minimal cost of U.S. Government-owned excess property for purchase by friendly countries and eligible organizations, for use in conjunction with economic development programs. Excess property, most of it obtained from the Department of Defense, includes heavy construction equipment, vehicles, heavy machinery, electrical generating equipment, and medical equipment and supplies. The program is self-financed from service fees and reimbursements by equipment purchasers ultimately funded from development assistance appropriations to the Agency for International Development.

PEACE CORPS—Continued

Peace Corps operating expenses provide direct and indirect support for approximately 6,800 Americans engaged in voluntary services in over 70 countries worldwide. The volunteers help fill the trained manpower needs of developing countries and encourage self-sustaining development of skilled manpower. The Peace Corps promotes mutual understanding between the peoples of the developing world and the United States and focuses the attention of the American people on the concepts of voluntarism and self-help at the grassroots level.

Volunteer operations.—The financial resources associated with this budget activity provide for the placement, training and direct support of Peace Corps Volunteers overseas. These resources will fund nearly 5,500 volunteer years of service worldwide in 1991.

Recruitment and development education.—This activity provides for volunteer recruitment and selection, development education, and related activities of the Peace Corps. In 1991, approximately 3,350 trainees qualified to enter Peace Corps service will be selected.

Program development and support.—This activity funds the administrative expenses and general overhead costs associated with the Peace Corps program, including reimbursements to the Department of State for administrative support overseas.

OVERSEAS PRIVATE INVESTMENT CORPORATION

The Overseas Private Investment Corporation is authorized to make such expenditures within the limits of funds available to it and in accordance with law (including not to exceed $35,000 for official reception and representation expenses), and to make such contracts and commitments without regard to fiscal year limitations, as provided by section 9104 of title 31, United States Code, as may be necessary in carrying out the program set forth in the budget for the current fiscal year.

During the fiscal year [1990] *1991* and within the resources and authority available, gross obligations for the amount of direct loans shall not exceed [$20,000,000] *$23,000,000.*

During the fiscal year [1990] *1991,* total commitments to guarantee loans [shall not exceed $215,000,000 of contingent liability for loan principal: *Provided,* That not less than $40,000,000 of such amount shall be used for projects for Poland, notwithstanding any other provision of law] *may be made only to the extent that the total loan principal subject to an OPIC guarantee, any part of which is to be guaranteed, shall not exceed $185,000,000.*

[Except as provided in this Act, no provision of any other Act not enacted into law by May 19, 1988, shall be construed to require the exercise of authority to provide direct loans or to make commitments to guarantee loans contrary to the limitations contained under this heading.] *(Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1990.)*

The African Development Foundation is a public Corporation authorized to provide grants, loans, and loan guarantees directly to African organizations and individuals for self-help development activities aimed at improving the living standards and conditions of disadvantaged people. Organizations and individuals receiving support must demonstrate their commitment to self-help development programs by encouraging the substantive participation of the poor in all phases of the development process, particularly in design, implementation, and management of projects. Grants range from $700 to $250,000 in the following project sectors—agriculture, cottage industry development, vocational skill training, resource conservation, education, credit, communications, and energy. The Foundation is currently funding development projects and research in 23 African countries.

As of September 30, 1989, the current dollar value of the U.S. quota denominated in Special Drawing Rights (SDR), the IMF's unit of account, was $22,932 million. Use by the IMF of the quota commitment does not result in net budget outlays because the United States receives an increase in its international monetary reserves corresponding to any transfer of dollars to the IMF under the U.S. quota subscription. The United States can use these reserves automatically to meet a balance of payments financing need.

Members of the IMF are obligated to maintain the value of their currency, held by the IMF, in terms of the SDR—the unit of account of the IMF. When the dollar appreciates (depreciates) against the SDR, the cost of maintaining these holdings decreases (increases), and an appropriate adjustment is made in the U.S. account with the IMF. This valuation adjustment occurs at the end of the IMF fiscal year, April 30th. Budget authority is provided in years when the maintenance of value adjustment results in an increase in the value of IMF dollar holdings, but such adjustments do not result in any immediate cash transfers to the IMF. In fiscal year 1989, the maintenance of value adjustment resulted in a decrease in the dollar value of IMF dollar holdings equivalent to $957 million. No budget authority was provided in fiscal year 1989 because the adjustment indicated that no additional dollars were needed to maintain the value of IMF holdings.

The Supplementary Financing Facility (SFF) was created in 1979 to augment the ability of the IMF to assist member countries with serious balance-of-payments problems. The United States and other countries agreed to finance the facility by making available to the IMF lines of credit totaling 7,784 million Special Drawing Rights (SDR). The U.S. commitment was SDR 1,450 million (but not to exceed $1,831 million appropriated). By March 1981, the IMF had fully committed the resources available under the SFF, and by end-1983 had fully drawn the U.S. commitment. As of September 30, 1989, U.S. claims on the IMF under the SFF had declined to SDR 57.7 million ($74 million) as a consequence of repayments by the IMF. In 1990, U.S. claims on the IMF under the SFF are expected to be fully repaid by the IMF.

The General Arrangements to Borrow (GAB) were established in 1962 by 10 industrial countries, including the United States, as a means of supplementing the IMF's resources when needed to forestall or cope with an impairment of the international monetary system. Each participant agreed to provide specific amounts of its currency to help finance drawings from the IMF by another GAB participant. GAB members agreed in early 1983 to increase their financial commitments to the GAB and to allow the IMF, in certain strictly defined circumstances, to activate the GAB to provide financing for any IMF member. Total GAB commitments were increased from SDR 6.3 billion to SDR 17 billion, with the U.S. share rising from $2.0 billion to SDR 4.250 billion, approximately $5.4 billion at the September 30, 1989 exchange rate. Financing extended by the United States under the GAB does not result in any net budget outlays because the United States receives an increase in its international reserve assets corresponding to any transfer to the IMF under the U.S. credit line.

During 1989, no calls were made on the U.S. commitment under the GAB, and no U.S. loans were outstanding at the end of the fiscal year.

The Enhanced Structural Adjustment Facility (ESAF) was created in 1987 to enable the International Monetary Fund to provide balance of payments assistance on concessional terms to low-income developing countries with protracted payments problems which are prepared to adopt multi-year economic and structural reform programs. It is a critical element of international efforts to address the serious economic problems confronting the poorest countries, particularly in Sub-Saharan Africa.

The resources of the ESAF are being provided through loans and special interest subsidy contributions by member countries. Loans will be disbursed over a three-year period with repayments in 10 equal semiannual installments beginning 5½ years and ending 10 years from the date of disbursement. It is envisaged that total loans will amount to SDR 6 billion (nearly $8 billion) and that interest subsidy contributions will help achieve a concessional interest rate of ½ of 1 percent.

The proposed U.S. contribution will take the form of a payment to the ESAF interest subsidy account. The request level of $10.6 million in 1991 will bring the total U.S. contribution to $150 million. Actual disbursements from the U.S. contribution will occur over the period through fiscal year 2001, roughly the final period for interest payments on ESAF loans.

This revolving fund finances the acquisition of defense articles and defense services in anticipation of their transfer to foreign countries and international organizations. The fund enhances the ability of the United States to respond to urgent requirements of allied and friendly governments for military equipment while minimizing the adverse impact on U.S. forces due to diversions from production or U.S. military stocks. The account was capitalized by foreign military sales receipts.

GLOBAL WARMING INITIATIVE

Sec. [534] *523.* (a) Tropical Forestry Assistance.—(1) In order to achieve the maximum impact from activities relating to tropical forestry, the Agency for International Development [shall focus tropical forestry assistance programs on the key middle- and low-income developing countries (hereinafter "key countries")] *should emphasize, where appropriate, tropical forestry assistance in those countries* which are projected to contribute large amounts of greenhouse gases related to [global warming] *climate change* as a result of industrialization and the burning of fossil fuels, and destruction of tropical forests.

(2) Funds appropriated to carry out the provisions of sections 103 and 106 of the Foreign Assistance Act of 1961, as amended, may be used by the Agency for International Development, notwithstanding any other provision of law, for the purpose of supporting tropical forestry programs [aimed at reducing emissions of greenhouse gases with regard to the key countries in which deforestation makes a significant contribution to global warming] *under subsection (a),* except that such assistance shall be subject to sections 116, 502B, and 620A of the Foreign Assistance Act of 1961.

(3) In providing assistance relating to tropical forests, the Administrator of that Agency shall, to the extent feasible and appropriate, assist countries in developing a systematic analysis of the appropriate use of their total tropical forest resources, with the goal of developing a national program for sustainable forestry.

(b) Energy Assistance.—(1) In order to achieve the maximum impact from activities relating to energy, the Agency for International Development shall focus, *where appropriate,* energy assistance activities on [the key countries, where assistance would have the greatest impact on reducing emissions from greenhouse gases. Such assistance shall be focused on] improved energy efficiency, increased use of renewable energy resources and national energy plans (such as least-cost energy plans) which include investment in end-use efficiency and renewable energy resources.

(2) Funds appropriated to carry out the provisions of sections 103 and 106 of the Foreign Assistance Act of 1961, as amended, may be used by the Agency for International Development, notwithstanding any other provision of law, for the purpose of supporting energy programs [aimed at reducing emissions of greenhouse gases related to global warming with regard to the key countries] *under subsection*

(b), except that such assistance shall be subject to sections 116, 502B, and 620A of the Foreign Assistance Act of 1961.

[(2)] *(c)* Of the funds appropriated to carry out the provisions of sections 103 and 106 of the Foreign Assistance Act of 1961, as amended, the Agency for International Development may use such amounts as may be necessary [to reimburse United States Government agencies, agencies of State governments, and institutions of higher learning] for the full costs of employees *or individuals* detailed *to* or assigned [to] *by* the Agency for International Development *(including the operations of such staff)* for the purpose of carrying out activities relating to forestry and energy programs aimed at reducing emissions of greenhouse gases related to global warming *or other environmental programs.* [Personnel who are detailed or assigned for the purposes of this section shall not be included within any personnel ceiling applicable to any United States Government agency during the period of detail or assignment.]

The Office of the Secretary covers the overall planning, coordination, and administration of the Department's programs. This includes the Secretary, Deputy Secretary, Under Secretaries, Assistant Secretaries, and their immediate staffs, who provide top policy guidance for the Department; maintain relationships with agricultural organizations and others in the development of farm programs; and provide liaison with the Executive Office of the President and Members of Congress on all matters pertaining to agricultural policy.

In 1990 the Congressional Relations function was transferred into the Office of the Secretary. That function replaces the Governmental and Public Affairs office within the Office of the Secretary. Also in 1990 the press function was transferred from the immediate Office of the Secretary into the Office of Public Affairs.

As in past years, the Administration has requested combining the individual appropriations for each major policy office into one appropriation. This will enable the Secretary to more effectively manage his own staff resources.

Personnel.—This activity provides general liaison, direction, leadership coordination and monitoring of the personnel management program in the Department. Department policies and procedures relating to all personnel functions are promulgated, and operational services are provided to the Office of the Secretary, Office of the General Counsel, Office of Public Affairs, Office of Budget and Program Analysis, and those staff offices under Departmental Administration reporting to the Assistant Secretary for Administration.

Finance and management.—This activity provides Departmental leadership, development, and evaluation of programs in finance, accounting, Federal assistance, occupational safety and health, productivity improvement, management improvement, audit resolution and follow up activities, and for the management and operation of the National Finance Center. The Director serves as the Department's chief financial officer, management improvement officer, and comptroller of the Working Capital Fund. Finance and Management also provides budget, accounting, and fiscal services for the Departmental staff offices, Office of the General Counsel, Office of Public Affairs, and the Office of the Secretary.

Operations.—This activity provides staff and support services in the management of real and personal property, procurement, contracts, transportation, supplies, motor vehicles and internal energy conservation to the USDA agencies, including those in the Washington, D.C., complex.

Information resources management.—This activity designs, implements, and revises systems, processes, work methods and techniques to improve the management of information resources and the operational effectiveness of USDA. The Director serves as the Department's clearance officer for statistical reporting and information collection. This activity also provides telecommunications and ADP services to USDA agencies and staff offices, including the operation of computer centers in Fort Collins, Colorado and Kansas City, Missouri.

Advocacy and enterprise.—This activity provides leadership, direction and coordination for the Department's programs for civil rights, which include program delivery, compliance and equal employment opportunity, and for efforts to further participation of minority colleges and universities in Departmental programs. It provides oversight of all procurement activities to assure maximum participation of small and disadvantaged business in the process and directs and monitors agency compliance in promoting full and open competition in procurement.

Administrative law judges and judicial officer.—The administrative law judges hold hearings on new regulations and orders and on disciplinary complaints filed by the Department or on some petitions filed by private parties. Final administrative decisions in regulatory proceedings are rendered by the Judicial Officer.

National communications system.—This item provides funding for USDA's proportional share of the communications system being developed as part of the National Security and Emergency Preparedness Program. Participation in the NCS is required under National Security Directive 201 of December 1985.

Budget and program analysis.—Beginning in 1990, the Office of Budget and Program Analysis will be shown as a separate account within the Departmental Administration bureau.

Under the Comprehensive Environmental Response, Compensation, and Liability Act and the Resource Conservation and Recovery Act, the Department has the responsibility to meet the same standards for storage and disposition of hazardous wastes as private businesses. Since the Department may have substantial commitments under these Acts, a central fund has been established so that resources may be allocated to the Department's agencies. Allocations will be made according to objective criteria.

This fund finances by advances or reimbursements certain central services in the Department of Agriculture, including duplicating and other visual information services, art and graphics, video services, supply, centralized accounting systems, centralized automated data processing systems for payroll, personnel, and related services, voucher payments services, and ADP systems. The capital consists of $400 thousand appropriated (7 U.S.C. 2235), and accumulated earnings of $2,388 thousand as of September 30, 1989. Earnings are kept at a low level through adjustments in rates charged for services to maintain as nearly as possible the nonprofit nature of the fund. The 1991 budget includes an appropriation request of $3.75 million for the acquisition of computer equipment.

Public affairs.—This activity provides general direction, leadership, and coordination of the Department's information program. The major objective is to provide a balanced and useful information program that reports on USDA's research, action, and regulatory activities using all communications media in order to enable the general public and the agricultural industry to have a better understanding of agriculture's services to farmers and to society.

At the beginning of 1990, the press function was transferred to the new Office of Public Affairs from the immediate Office of the Secretary.

Congressional relations.—This activity includes responsibility for maintaining liaison with the Congress and the White House on legislative matters of concern to the Department and for the coordination of all Congressional matters except Congressional appropriation. At the beginning of 1990, this activity was transferred to the Office of the Secretary.

Intergovernmental affairs.—This activity provides for overall direction and coordination in the development and implementation of policies and procedures applicable to the Department's intra- and intergovernmental relations.

The Agricultural Research Service conducts research to provide the means for a safer, more economical supply of agricultural products for the Nation and to provide producers with technologies to competitively supply these products. The Service uses coordinated, interdisciplinary approaches to perform basic and applied research on soil and water conservation, plant and animal sciences, commodity conversion and delivery, human nutrition, and integrated agricultural systems. The 1991 budget proposes increases to improve the quality of the Nation's agricultural soil and water resources, enhance plant productivity, improve food safety and quality, and improve the production efficiency of high quality livestocks and poultry. In addition, the 1991 budget includes increases for the ARS portion of the U.S. Global Change Research Program being coordinated by the Federal Coordinating Council on Science, Engineering, and Technology's Committee on Earth Sciences.

Research on soil and water conservation.—Research is conducted to improve soil and water management, irrigation, and conservation practices; to protect natural resources from harmful effects of soil, air, and water pollutants and to minimize certain agricultural pollution problems; and to determine the relation of soil types and water to plant, animal, and human nutrition. Additional funds are proposed for research to support the development of crop production systems which minimize adverse impacts on water quality in the Midwest Corn Belt and other areas. Funds for this work are part of a coordinated, government-wide research and technical assistance initiative.

Research on plant science.—Research is conducted to increase plant productivity by improving plant varieties, developing new crop resources, and improving crop production practices, including methods to control plant diseases, nematodes, insects, and weeds. Increases in 1991 are for a coordinated program to map important crop plant genes to be jointly funded through the proposed National Research Initiative. Plant germplasm preservation and evaluation programs will also be enhanced.

Research on animal science.—Research is conducted to increase livestock productivity (including poultry) through improved breeding, feeding, and management practices, and to develop methods for controlling diseases, parasites, and insect pests affecting these animals. The increases proposed for 1991 are to improve diagnostic methods for animal diseases, and enhance animal germplasm preservation.

Research on commodity conversion and delivery.—Research is conducted to develop new and improved foods, feeds, products, and processes for agricultural commodities and to improve the processing, transportation, storage, wholesaling, and retailing of products. Research is also conducted on problems of human health and safety, including means to insure the safety of food and feed supplies, control insect pests of man and his belongings, and reduce the hazards to human life resulting from pesticide residues and other causes. The increase proposed in 1991 is to reduce bacterial and mycotoxin contamination and drug and pesticide residues in foods and food products.

Human nutrition research.—Research is conducted on subjects such as human nutritional requirements and the composition and nutritive value of foods, to promote optimum human health through improved nutrition.

Integration of agricultural systems.—Research is conducted to develop integrated systems for efficiently producing, processing, and marketing agricultural products, and to develop alternative agricultural systems that are less dependent upon nonrenewable resources and that are productive, efficient, and sustainable in the long term.

Repair and maintenance of facilities.—Funds are used to restore, upgrade, and maintain Federal facilities to meet OSHA and EPA requirements, provide suitable workspace for in-house research programs, and to retrofit existing structures for better energy utilization.

Pest control.—Funds available to meet urgent needs that develop unexpectedly during the year when such needs cannot be met by redirection of resources from other projects.

Construction of facilities.—Unobligated balances are used for this purpose. Construction proposals for 1991 are included under Buildings and Facilities.

Reimbursements.—Agricultural Research Service performs program research activities and services for other USDA, Federal, and non-Federal agencies. These activities and services are paid for on a reimbursable basis.

Cooperative State Research Service participates in a nationwide system of agricultural research program planning and coordination between State institutions and the U.S. Department of Agriculture. It assists in maintaining cooperation among the State institutions, and between the State institutions and their Federal research partners. The Agency administers grants and payments to State institutions to supplement State and local funding for agricultural research and higher education.

Payments under the Hatch Act.—Funds under the Hatch Act are allocated on a formula basis to agricultural experiment stations of the land-grant colleges in the 50 States, the District of Columbia, Puerto Rico, Guam, the Virgin Islands, American Samoa, Micronesia, and Northern Mariana Islands.

Cooperative forestry research.—These funds are allocated by formula to land-grant colleges or agricultural experiment stations in the 50 States, Puerto Rico, Guam, the Virgin Islands, and other State-supported colleges and universities having a forestry school and offering graduate training in forestry sciences.

General and special funds—Continued

COOPERATIVE STATE RESEARCH SERVICE—Continued

[BUILDINGS AND FACILITIES]—Continued

Payments to 1890 colleges and Tuskegee University.—Funds support agricultural research at the 1890 land-grant colleges, including Tuskegee University.

Special research grants.—This program targets research to problems of national interest. Funding is proposed for seven national interest grants, including a category for water quality research. This is the university research component of a coordinated Federal initiative in water quality and will provide funds to focus on agriculture-related water quality concerns in the Midwest Corn Belt and other regions. Funding is also proposed for related grants in pesticide impact assessment and integrated pest management. A new grant program for global change is also being requested for research at universities as part of a coordinated Federal initiative.

Competitive research grants.—Funding is being proposed for a new National Initiative for Research on Agriculture, Food, and the Environment. Research scientists throughout the U.S. scientific community compete for funding under this program. These grants support research in plant and animal systems; natural resources and the environment; and nutrition, food quality, and health. This Initiative includes $15 million for a plant genome mapping program to be managed by the Agricultural Research Service and $9.4 million for global change research that is part of a government-wide program developed by the Committee on Earth Sciences.

Animal health and disease research.—Funds, distributed by formula, support livestock and poultry disease research in colleges of veterinary medicine and in eligible agricultural experiment stations. Funding for animal health and disease research for 1991 is proposed within the competitive research grants programs.

Federal administration.—A coordinating and review staff assists in maintaining cooperation within and among the States, and between the States and their Federal research partners. This staff also administers research grants and payments to States. Federal administration is funded from a combination of program set-asides from formula and grant programs and from direct appropriation for administration. Funding is proposed for a capacity building program at the 1890 institutions as part of a USDA initiative to strengthen these institutions.

Higher education.—Funding is proposed for graduate training grants and competitive challenge grants.

Buildings and facilities.—Funds support the acquisition of land, construction, repair, improvement, extension, alteration, and purchase of fixed equipment or facilities and grants to States and other eligible recipients as necessary to carry out the agricultural research, extension and teaching programs of the Department of Agriculture. No funding is proposed in 1991.

Reimbursable program.—Funds support basic and applied agriculture research and activities performed for other USDA, Federal, and non-Federal agencies.

The Extension Service-USDA, States, and localities comprise the Cooperative Extension System. This nationwide system provides out-of-school, applied education, information, and technology transfer to the public on national issues and concerns.

Federal funds are distributed primarily by formula to States, Puerto Rico, Guam, the Virgin Islands, Micronesia, Northern Marianas and American Samoa, on the basis of population and other factors. Funds are used primarily for the employment of State, area, and county extension workers and paraprofessionals who work with individuals, families, community organizations, marketing concerns, and others by providing advice and assistance in the application of improved methods for agricultural production, marketing, nutrition, family living, youth programs, and community development. Most of these funds are matched by the States and provide the Federal share of costs associated with program activities specifically undertaken with these matched funds.

Initiatives proposed for 1991 will provide resources to assist Extension professionals to address priority National concerns in water quality, youth-at-risk, and food safety. Increased funding for water quality education is part of a coordinated Federal initiative and will allow Extension to assist agricultural producers and others adopt new technologies to minimize adverse impacts on water resources. Funding for youth-at-risk programs will be developed to assist communities and families in the areas of high-risk youth and school-age children. Food safety will target education programs to producers and cooperative efforts with other Federal Agencies. Increases are proposed for the 1890 institutions and Tuskegee University to strengthen the capabilities of those institutions to address priority issues. Funds are also proposed for low income nutrition education and an increase in the pesticide impact assessment program is proposed consistent with Federal pesticide regulatory activity levels.

The Extension Service provides leadership and assistance to States, Puerto Rico, Guam, the Virgin Islands, the District of Columbia, American Samoa, Northern Marianas and Micronesia, in developing extension programs, improving teaching methods, efficient use of available resources, evaluation of programs, and administrative services. These responsibilities are funded from a combination of program set-asides for administering payments to States and from direct appropriations for the Federal Extension Administration.

The primary purpose of the National Agricultural Library (NAL) is to acquire, preserve, and disseminate a comprehensive collection of reliable information in all phases of the agricultural and allied sciences.

Agricultural information and library services.—The NAL provides a variety of information products and services through: (1) the administration of a unique collection of books, journals, and other information materials about food and agriculture to ensure accessibility to their contents; (2) the development and maintenance of cooperative efforts in the library and related information areas, with other Federal agencies and with educational institutions in each State; and (3) an active program of information dissemination. Increases are proposed for 1991 for additional networking to improve library services, increases in purchase costs of library materials, and to strengthen ongoing NAL programs.

Repairs and maintenance of facilities.—These funds are used for maintaining the library building.

Crop and livestock estimates.—The Service provides the official National and State estimates of acreage, yield, and production of crops, stocks, and value of farm commodities, and numbers of inventory values of livestock items. Data on approximately 120 crops and 45 livestock products are covered in some 300 reports issued each year. Data collected and published on prices paid and received by farmers are basic to computation of parity prices.

The work under this activity is conducted through 45 State offices serving the 50 States; most of these offices are operated as joint State and Federal services. Cooperative arrangements with State agencies provide additional State and county data. The major program modifications in 1991 are: an increase of $1,850,000 for improved labor data collection; $2,400,000 for improved list frame; and $7,000,000 for a pesticide use survey under the food safety initiative.

Statistical research and service.—This activity is designed to improve crop and livestock estimating techniques by improving sample survey designs and procedures and by testing new forecasting and estimating techniques, such as the use of satellite data.

The World Agricultural Outlook Board (WAOB) was established to provide a single focal point for the Nation's economic intelligence related to domestic and international food and agriculture.

The objectives of the WAOB are to improve the consistency, objectivity, and reliability of outlook and situation material being disseminated to the public and to integrate and coordinate USDA domestic and international economic information assistance.

The WAOB carries out these objectives through daily market surveillance and special analyses of international and domestic agricultural developments, direct participation in the planning of research programs supporting outlook and situation activities, and coordination of all departmental activities relating to weather and climate and remote sensing. The 1991 budget includes funds for economic meteorological data base expansion/remote sensing inventory, improved operation of agricultural weather systems, ADP maintenance and replacement of obsolete equipment, and management support.

The Foreign Agricultural Service mission is to help American farmers and traders take maximum advantage of increased opportunities to sell U.S. agricultural commodities abroad and to help increase U.S. farm income.

Activities are conducted within three program areas:

Foreign agricultural affairs.—The Service maintains agricultural counselors, attachés, or trade officers at 75 foreign posts to assist overseas development of markets for U.S. farm commodities. They work closely with numerous U.S. agricultural trade groups and maintain significant contacts with foreign governments and traders to promote market access for U.S. farm products. They also file annually about 5,000 comprehensive reports regarding foreign agricultural production,

supply, demand, marketing, and trade policy developments to keep U.S. agriculture, industry, and Government currently informed.

Foreign market information and access.—Under this broad program heading, the Service initiates, directs, and coordinates the Department's formulation of trade policies and programs with the goal of maintaining and expanding world markets for U.S. agricultural products. The Service is responsible for the development and maintenance of the USDA statistical data base encompassing foreign production estimates, trade data, export forecasts, economic indicators, price data and export sales reporting. These data are collected, analyzed, and disseminated to U.S. farm and trade groups providing ready access to reliable information to assess short-term changes in world agricultural supply and demand conditions by commodity.

The analyses of world commodity conditions provide the information necessary to develop export marketing strategies that can be used by the Department not only to gain market access but to enhance the long term market development plans for major U.S. commodities.

Foreign market development.—This program provides funding support to 47 commodity associations (cooperators), 2 contractors participating in the export incentive program, 4 regional groups (representing 47 State departments of agriculture) and the National Association of State Departments of Agriculture. Under FAS guidance and supervision, these organizations conduct an extensive worldwide market development program on behalf of the U.S. farm sector. In addition, the Service develops and operates a worldwide system of multicommodity promotional programs utilizing product exhibits, trade teams, trade services, market information programs, and trade referral services to expand overseas markets. Historically, FAS contributes approximately one-third of the total annual cost of this program.

The mission of the Office of International Cooperation and Development (OICD) is to promote U.S. agriculture and to advance the agriculture of developing countries as parts of a complementary global agricultural system capable of providing ample food and fiber for all people.

International agricultural development.—OICD analyzes agricultural policy issues related to USDA's international agricultural development efforts, and supports the International Science and Education Council. The Agency also reviews food aid development activities supported by Public Law 480 Titles I and III agreements.

International scientific and technical cooperation.—OICD manages the Department's bilateral exchange and cooperative research programs with foreign governments and institutions in order to strengthen the role of science and technology in the ongoing effort to stabilize world food supplies and to increase the efficiency with which world resources are used. Priorities and criteria for these programs are based on domestic research priorities, potential benefits to U.S. agricultural production, and the availability of desired technologies. OICD coordinates USDA's and the U.S. Government's participation in approximately 30 international organizations concerned with food, agriculture, and rural development.

Reimbursable program.—OICD, using USDA and university expertise, provides technical assistance and training to developing countries at the request of the Agency for International Development and international organizations. OICD manages technical assistance projects in over 80 countries, focusing on land and water management, crop and livestock production and marketing, forestry, pest control, resource conservation and other areas. OICD offers a technical and management training program in agriculture and rural development to participants from foreign countries and designees of international organizations.

FOREIGN ASSISTANCE PROGRAMS

Facilities and funds of the Commodity Credit Corporation may, by law, be used in carrying out programs for exporting agricultural commodities.

Included in this category are the following activities carried out under the Agricultural Trade Development and Assistance Act of 1954, Public Law 480, as amended: Financing sales of agricultural commodities for dollars on credit terms, for convertible foreign currency on credit terms, or for convertible foreign currency for use under section 108 of the Act; furnishing commodities to carry out the Food for Progress Act of 1985 (titles I and III); and for dispositions abroad (title II).

No agreements to finance sales under the authority of title I or programs of assistance under title II may be entered into after December 31, 1990.

Financing the sale of agricultural commodities for convertible foreign currencies and for dollars on credit terms; for convertible foreign currency for use under section 108; and furnishing commodities to carry out the Food for Progress Act of 1985 (titles I and III).—The Commodity Credit Corporation finances through Public Law 480 appropriations and repayments of loans all sales made pursuant to agreements concluded under the authority of title I, and may serve as the purchasing or shipping agent, or both, if the purchaser so requests. Sales are made to friendly countries—as defined in section 103(d) of the act—and must not displace expected commercial sales for cash dollars (secs. 103 (c) and (n)).

Agreements may not be made under title I in any calendar year which call for an appropriation to reimburse the Corporation in excess of $1.9 billion, plus unused prior years' authorizations.

Whenever practicable, terms of agreements must require payment at time of delivery of not less than 5% of the purchase price in dollars or in currencies convertible to dollars. These initial payments are applied against costs to reduce appropriation requests.

When U.S.-flag vessels are required to ship commodities under this title, the Corporation will pay the difference between U.S.-flag rates and foreign-flag rates. In limited cases, full transportation costs to port of entry or point of entry abroad may be included along with the cost of the commodity in the amount financed by CCC in order to ensure that U.S. food aid would reach the most needy recipients.

Use of foreign currency (title I).—Certain U.S. uses of foreign currencies are subject to the appropriation process. The Corporation is reimbursed for the dollar value of currencies so used. Proceeds from sales of foreign currencies and from dollar repayments of foreign currency loans are applied as a reduction in appropriation requests.

Financing sales of agricultural commodities for dollars or convertible foreign currencies on credit terms (title I).—Agreements are made with friendly countries for delivery in annual installments for not more than 10 years from the date of the agreement subject to the availability of the commodity.

Credit terms are to be no less favorable than those required by section 122 of the Foreign Assistance Act of 1961, as amended, for loans made under that section.

Terms of repayment under dollar credit agreements are not more than 20 years with a grace period of not more than 2 years on repayment of principal. Convertible foreign currency terms permit repayment of up to 40 years with deferral of principal payments for up to 10 years. As payments are received each year, they are applied against current costs to reduce appropriation requests.

Financing sales of agricultural commodities for convertible foreign currencies to be used pursuant to section 108 (title I).—Title I sales may be financed for convertible foreign currencies, which are then loaned to financial intermediaries in the recipient country pursuant to agreements whereby the intermediaries would reloan the funds to promote private enterprise. Funds repaid by the financial intermediaries may be used to finance additional private enterprise investment, develop new markets, pay U.S. obligations, or be converted to dollars.

Furnishing commodities to carry out the Food for Progress Act of 1985 (title I).—Funds appropriated to carry out title I may be used to furnish commodities to carry out the Food for Progress Act of 1985. Such commodities may be furnished on credit terms or on a grant basis in order to assist countries that have made a commitment to introduce and expand free enterprise elements in their agricultural economies.

Total title I agreements made since inception of the program to September 30, 1989, amount to $18,337.6 million cost value, including ocean freight for shipment on U.S. ships. Major commodities are wheat, cotton, oils, rice, and feed grains. Payments received during the period amount to $5,328.5 million, of which $3,199.7 million was applied to principal and $2,128.8 million to interest.

The following table reflects the composition of the combined appropriations (in thousands of dollars):

Commodities supplied in connection with dispositions abroad (title II).—Under title II, agricultural commodities are furnished to developing countries to meet famine or other emergency relief needs and to combat malnutrition. They are furnished through friendly governments, private voluntary agencies, foreign nonprofit voluntary agencies if no such U.S. agency is available, and intergovernmental organizations such as the United Nations World Food Program.

The Corporation is authorized to pay the costs of acquisition, packaging, processing, enrichment, preservation, fortifi-

cation, transportation, handling, and other incidental costs incurred up to the time of delivery to U.S. ports. The Corporation also pays ocean freight charges, and pays transportation costs to points of entry other than ports in the case of landlocked countries, where carriers to a specific country are unavailable, where ports cannot be used effectively, or where a substantial saving in costs or time can be obtained, and pays general average contributions arising from ocean transport. In addition, transportation costs from designated points of entry or ports of entry abroad to storage and distribution sites and associated storage and distribution costs may be paid for commodities made available to meet urgent and extraordinary relief requirements.

Up to $7.5 million each year may be used to buy foreign currencies accruing under title I of this act to meet costs directed to community and other self-help activities designed to alleviate the causes of the need for such aid. Such costs may not include personnel and administrative costs of cooperating sponsors, distributing agencies and recipient agencies.

Through September 30, 1989, appropriations totaling $20,850 million were authorized. Beginning October 1, 1985, no programs of assistance shall be undertaken under this title during any fiscal year that call for an appropriation of more than $1 billion to reimburse the Corporation. This limitation applies to costs incurred, including its investment in commodities (but only on the basis of a price not greater than the export market price of commodities acquired under a price support program), plus any amount by which programs of assistance undertaken under this title in the preceding fiscal year have called or will call for appropriations in amounts less than authorized during the preceding year. This limitation may be waived if the President determines that a waiver is necessary to undertake programs to meet urgent humanitarian needs. Any incidental sales proceeds and proceeds from loss, damage, and other claims are applied against costs to reflect a reduction in appropriation requests.

The following reflects the composition of the appropriations (in thousands of dollars):

This account includes funds to cover expenses of programs administered by, and functions assigned to, the Service. The funds consist of transfers from the Commodity Credit Corporation (CCC), user fees, and miscellaneous advances from other sources. This is a consolidated account for administrative expenses of national, commodity, State, and county offices.

Program formulation and appraisal.—The supply adjustment, conservation, and commodity support programs, and the management and merchandising of commodities acquired under the support program, have a tremendous impact on the national and (to a lesser extent) the international economy. This activity provides for constant review of the effectiveness of those programs. It also provides for the analysis of data to formulate more effective programs.

Operation of supply adjustment, conservation, and price support programs.—This activity includes all functions dealing with the administration of programs carried out through the farmer committee system, including: (a) developing program regulations and procedures; (b) holding meetings with employees and producers to discuss new programs or changes in existing programs; (c) collecting and compiling basic data for individual farms; (d) establishing individual farm allotments, bases, and yields; (e) notifying producers of established allotments, bases, and yields; (f) determining farm marketing quotas; (g) handling appeals; (h) conducting referendums and certifying results; (i) accepting farmer certifications and checking compliance; (j) accepting producer applications for participation in commodity price stabilizing programs; (k) issuing marketing cards so that production from the allotted acreage can be marketed without penalty; (l) processing producer requests for conservation cost-sharing and issuing conservation reserve rental payments; (m) processing commodity loan and storage facility loan documents and issuing checks; (n) processing disaster, deficiency, and diversion payments and issuing checks and commodity certificates; and (o) certifying payment eligibility and monitoring payment limitations.

Inventory management and merchandising.—This activity includes: (a) overall management of CCC-owned commodities; (b) purchasing commodities; (c) donating commodities; (d) selling commodities; (e) processing the redemption of commodity certificates for CCC inventory; and (f) accounting for loans and commodities.

Warehouse examination.—This activity provides for the examination of warehouses licensed under the U.S. Warehouse Act and non-licensed warehouses storing CCC-owned or pledged commodities. ASCS examiners perform periodic examinations of the facilities and the warehouse records to ensure protection of depositors against potential losses of the stored commodities and to ensure compliance with the U.S. Warehouse Act and any CCC storage agreements.

This experimental Rural Clean Water Program, authorized by Public Law 96–108 and Public Law 96–528, is a cooperative endeavor among farmers, various USDA agencies, and other organizations to develop and test means of controlling agricultural nonpoint source water pollution in rural areas.

Recommended project areas were developed by local and State committees and approved by the Secretary of Agriculture in consultation with the Administrator of the Environmental Protection Agency. Full funding has been provided in previous budgets for all approved projects.

The 1991 budget requires no additional funding for implementing this program.

AGRICULTURAL CONSERVATION PROGRAM

(INCLUDING TRANSFERS OF FUNDS)

For necessary expenses to carry into effect the program authorized in sections 7 to 15, 16(a), 16(f), and 17 of the Soil Conservation and Domestic Allotment Act approved February 29, 1936, as amended and supplemented (16 U.S.C. 590g–590o, 590p(a), 590p(f), and 590q), and sections 1001–1004, 1006–1008, and 1010 of the Agricultural Act of 1970, as added by the Agriculture and Consumer Protection Act of 1973 (16 U.S.C. 1501–1504, 1506–1508, and 1510[(i)]), and including not to exceed $15,000 for the preparation and display of exhibits, including such displays at State, interstate, and international fairs within the United States, [$184,935,000] *$176,000,000*, to remain available until expended [(16 U.S.C. 590o)], for agreements, excluding administration but including technical assistance and related expenses *(16 U.S.C. 590o)*, except that no participant in the Agricultural Conservation Program shall receive more than $3,500 per year, except where the participants from two or more farms or ranches join to carry out approved practices designed to conserve or improve the agricultural resources of the community, or where a participant has a long-term agreement, in which case the total payment shall not exceed the annual payment limitation multiplied by the number of years of the agreement: *Provided*, That no portion of the funds for the current year's program may be utilized to provide financial or technical assistance for drainage on wetlands now designated as Wetlands Types 3 (III) through 20 (XX) in United States Department of the Interior, Fish and Wildlife Circular 39, Wetlands of the United States, 1956: *Provided further*, That such amounts shall be available for the purchase of seeds, fertilizers, lime, trees, or any other conservation materials, or any soil-terracing services, and making grants thereof to agricultural producers to aid them in carrying out approved farming

The primary objectives of the program are to conserve soil and water resources. Along with annual agreements, cost sharing is authorized for long-term agreements of 3–10 years.

The program is administered by ASC county committees, with review and approval by State ASC committees and the Secretary. Technical assistance is provided by the Soil Conservation Service and the Forest Service.

The 1990 program level of $182,369 thousand will be allocated to States based on the highest priority soil and water resource problems, and is expected to serve 7.8 million acres. Practices are expected to prevent approximately 41.6 million tons of soil erosion and save 539,000 acre-feet of water.

The 1991 budget proposes funding for activities consistent with the Government-wide water quality initiative as well as practices that help solve soil and water conservation problems identified in State and county ACP plans.

COLORADO RIVER BASIN SALINITY CONTROL PROGRAM

For necessary expenses for carrying out a voluntary cooperative salinity control program pursuant to section 202(c) of title II of the Colorado River Basin Salinity Control Act, as amended (43 U.S.C. 1592(c)), to be used to reduce salinity in the Colorado River and to enhance the supply and quality of water available for use in the United States and the Republic of Mexico, [$10,420,000] *$14,783,000,* to be used for investigations and surveys, for technical assistance in developing conservation practices and in the preparation of salinity control plans, for the establishment of on-farm irrigation management systems, including related lateral improvement measures, for making cost-share payments to agricultural landowners and operators, Indian tribes, irrigation districts and associations, local governmental and nongovernmental entities, and other landowners to aid them in carrying out approved conservation practices as determined and recommended by the county *ASC* committees, approved by the State *ASC* committees and the Secretary, and for associated costs of program planning, information and education, and program monitoring and evaluation: *Provided,* That the Soil Conservation Service shall provide technical assistance and the Agricultural Stabilization and Conservation Service shall provide administrative services for the program, including but not limited to, the negotiation and administration of agreements and the disbursement of payments: *Provided further,* That such program shall be coordinated with the regular Agricultural Conservation Program and with research programs of other agencies. *(Rural Development, Agriculture, and Related Agencies Appropriations Act, 1990.)*

This program carries out the purposes of section 202(c) of title II of the Colorado River Basin Salinity Control Act (43 U.S.C. 1592(c)), as amended, by providing cost-share assistance to landowners and others in the Colorado River Basin. The main objective is to enhance the supply and quality of water in the Colorado River for delivery to downstream users in the U.S. and Mexico.

Practices are recommended by the ASC county committees and approved by the State committees and the Secretary of Agriculture. Technical assistance is provided by the Soil Conservation Service. Education and information activities are provided by the Extension Service.

The 1990 program will focus on six projects in Colorado, Nevada, Utah, and Wyoming.

The 1991 budget will provide financial assistance in promoting the Government-wide water quality initiative. The funding level of $14.8 million will fund six existing projects and three additional projects.

Under this program, 30 percent of ASCS cost-share funds will be reimbursed to the U.S. Treasury by the Colorado River Basin States.

The Conservation Reserve Program (CRP) was mandated by sections 1231–1244 of the Food Security Act of 1985 (Public Law 99–198) to establish permanent cover on highly erodible cropland. The primary objectives of the CRP are to help farmers control critical soil erosion that occurs on about a third of America's cropland and to decrease production of some surplus agricultural commodities.

The CRP is authorized in all 50 States, Puerto Rico, and the Virgin Islands, on all croplands meeting the eligibility criteria of eroding at three times the soil loss tolerance or higher, or twice the soil loss tolerance with serious gully erosion or with an erosion predominance of 66⅔ percent of the field if planted to grass or an erosion predominance of 33⅓ percent if the area is planted to trees. In addition, to increase water quality benefits, eligible land includes areas adjacent to lakes and streams that can be devoted to filter strips, cropped wetlands, and cropland subject to overflow and suffering from scour erosion. The 1991 budget proposes funding for 40 million acres of highly erodible cropland in the reserve.

The program is administered through the Commodity Credit Corporation (CCC) by State and local ASC committees working under the general direction of ASCS. Technical assistance is provided by the Soil Conservation Service, the Forest Service, the Cooperative Extension Service, and others.

Under the Food Security Act, authority is provided to enter into CRP contracts through the 1990 crop year. Appropriations needed to make annual payments will be requested through 2000.

Since program inception in 1986, nine signup periods have been held through 1989, enrolling approximately 34 million acres including about 4 million 1990 crop acres enrolled in advance during 1989.

The 1990 program is expected to enroll 6.0 million additional acres of highly erodible cropland. These 1990 crop acres, together with 1990 crop acres enrolled in advance during 1989, would bring total crop-year 1990 enrollment to approximately 10 million acres. Total participation through 1990 is projected to meet the minimum requirement of 40 million acres established by the Act.

The appropriation requested for 1991 would be used for annual rental payments due on all contracts, and for cost-sharing assistance on 1990 and prior crop years' contracts.

The objectives of the Water Bank Program are to conserve water; preserve, maintain, and improve the Nation's wetlands; increase waterfowl habitat in migratory waterfowl nesting, breeding, and feeding areas in the United States; and secure recreational and environmental benefits for the Nation. The program was authorized by the Water Bank Act of 1970, as amended by Public Law 96-182, approved January 2, 1980.

The Secretary of Agriculture, through designated ASCS county offices, uses program funds to enter into 10-year agreements with landowners and operators for the conservation of specified wetlands. Provisions exist to renew agreements for additional periods, to make annual payments on agreements, and under certain conditions to increase payment rates in the fifth year of a contract or at the time of renewal.

Legislation is being proposed to authorize program participants the option of receiving a one-time payment in exchange for a permanent easement on wetlands or adjacent lands or continuing to participate in 10-year agreements. The budget includes a request under proposed legislation to authorize permanent easements and a request under current law for 10-year agreements. The 1991 appropriation request under current law would provide new 10-year agreements comparable to the 1989 program level.

This proposal would amend existing law to authorize the purchase of conservation easements from Water Bank Program participants. A one-time payment would be made to Water Bank Program participants in exchange for a permanent easement on wetlands or adjacent lands.

This proposal would enable the Department to operate a dual program and to assess the costs of and producer interest in permanent easements while ensuring that the Nation's wetlands continue to be preserved. Participants could choose either option within the total program level proposed for 1991.

This program was authorized by the Agricultural Credit Act of 1978 (16 U.S.C. 2201–05). It provides funds for sharing the cost of emergency measures to deal with cases of severe damage to farms and rangelands resulting from natural disasters.

Under the 1989 program, cost-sharing assistance was provided in 38 States to treat farmlands damaged by floods, tornadoes, and drought. The 1990 program is expected to rehabilitate approximately 894,000 acres of farmland damaged by natural disaster.

The 1991 budget proposes no funding for this program.

The Dairy Indemnity Program was authorized under 78 Stat. 508 in 1964, and has been extended through September 30, 1990, by the Food Security Act of 1985 (Public Law 99-198). Payments are made to farmers and manufacturers who are directed to remove their milk or milk products from commercial markets because they contain residues of: chemicals that have been registered and approved for use by the Federal Government; other chemicals; nuclear radiation; or nuclear fallout. The authority also provides that indemnification may be paid for cows producing such milk.

In 1990, an estimated $336 thousand will be paid to producers and manufacturers who file claims under the program.

Due to the emergency nature of this program, funding is requested as needs arise. Since sufficient carryover funds are available to operate a program in a normal year, the 1991 budget requests no additional funding for this program.

This program was authorized by the Cooperative Forestry Assistance Act of 1978 (16 U.S.C. 2101). The objectives of the program are to bring private, nonindustrial forest land under intensified management, to increase timber production, to ensure adequate supplies of timber products, and to enhance other forest resources.

The Forestry Incentives Program shares up to 65 percent of the cost of tree planting and timberstand improvement. The percentage cost-shared depends on the rate set in a particular State and county by the Agricultural Stabilization and Conservation Committee, after consulting with the State forester. The program is available in designated counties based on a Forest Service survey of total eligible private timberland available for production of timber products. The program is administered by ASCS. Technical assistance is provided by Forest Service.

Under the 1990 program, cost-sharing will be provided to farmers for planting trees on 165,000 acres and improving the timberstand on 35,000 acres of forest.

The 1991 program will provide cost-sharing for tree planting on 159,300 acres and timberstand improvement on 33,650 acres.

This appropriation finances the administrative and operating expenses of the Corporation to provide funds to establish and maintain rates and coverages for 21,300 county programs in over 3,000 counties.

The major portion of administrative and operating expenses is to support delivery systems that rely heavily on the private sector as provided by the Federal Crop Insurance Act of 1980 under section 507(c). The delivery systems are:

(a) Reinsured companies that enable insurance companies to provide the insurance marketing, distribution, servicing, training, quality control, and loss adjustment functions. The companies also share with the Federal Crop Insurance Corporation, to a limited extent, in both profits and losses; and

(b) Agency sales and service agreement, also known as the "master marketing agreement." Under this type of agreement, private insurance companies and associations are offered the opportunity to contract with FCIC to provide insurance sales and services. They are compensated on a commission basis.

In addition, in areas where an adequate private sales and service force is not available, FCIC may ask other USDA agencies to sell and service multiple peril crop insurance through existing county offices.

Legislation will be proposed to eliminate the FCIC in 1991. Currently the Corporation projects the same level of business in 1991 as the 1990 estimate.

The Federal Crop Insurance Corporation, a wholly owned Government corporation, was created on February 16, 1938 (7 U.S.C. 1501–1520), to carry out the provisions of the Federal Crop Insurance Act, as amended. The purpose of this Act is to promote the national welfare by improving the economic stability of agriculture through a sound system of crop insurance, and to provide the means for the research and experience helpful in devising and establishing such insurance.

Crop insurance offered to agricultural producers by the Corporation provides protection from losses caused by natural hazards, such as insect and wildlife damage, plant diseases, fire, drought, flood, wind, and other weather conditions. It does not indemnify producers for losses resulting from negligence or failure to observe good farming practices.

Budget program.—The program for crop year 1990 will provide crop insurance protection to farmers amounting to approximately $10.9. billion on the following commodities: Almonds, apples, barley, beans (dry and C&P), citrus, citrus trees, corn, cotton, ELS cotton, cranberries, figs, flax, forage production, forage seeding, grain sorghum, grapes, table grapes, hybrid seeding, macadamia nuts, macadamia trees, nursery stock, oats, onions, peaches, peanuts, pears, peas (dry and green), peppers, popcorn, potatoes, prevented planting, prunes, raisins, rice, rye, safflower, soybeans, stonefruit (CA only—apricots, nectarines and peaches), sugar beets, sugarcane, sunflowers, C&P sweet corn, sweet corn (fresh), tobacco, tomatoes (fresh), C&P tomatoes, walnuts, and wheat.

The 1989 appropriation provided sufficient funding for crop year 1989 to insure 99.9 million acres with an estimated $800.0 million in total premium income, including $200.0 million in premium subsidy.

Legislation will be proposed to eliminate the Federal Crop Insurance Corporation in 1991. The following table compares the scope of the insurance operations planned for 1990 and projected for 1991, as compared with 1989. Amounts in the 1989 column are as of September 30, 1989, and pertain to the 1989 crop year.

The Corporation's budget is presented in accordance with generally accepted accounting principles, the Financial Accounting Standards Board (FASB) Statement No. 60, "Accounting and Reporting by Insurance Enterprises," and Statement No. 5, "Accounting for Contingencies."

[1] Includes amounts that will appear on the books of the reinsured companies. The Corporation records will only reflect the net reinsurance income and net reinsurance loss.

Financing.—The Corporation is authorized under the Federal Crop Insurance Act, as amended, to use funds from the issuance of capital stock which provides working capital for the Corporation.

Receipts, which are for deposit to this fund, come mainly from premiums paid by farmers. The principal payments from this fund are for indemnities to insured farmers, the direct cost of adjusting crop losses, and agents' commissions. However, an appropriation will be requested in subsequent years for payments made from premium income used for loss adjustment costs and/or agents' commissions as provided by section 516(a) of the Federal Crop Insurance Act, as amended.

Premium subsidies are authorized by section 508(b) of the Federal Crop Insurance Act, as amended. The purpose of the subsidy is to encourage the broadest possible participation of farm producers in the crop insurance program. Subsidies are paid by the Corporation based upon 30 percent of each producer's premium (reduced, where applicable, for hail and fire exclusion or State agency subsidy) on any coverage, under the Corporation's policy of insurance of up to a maximum of 65 percent of the recorded or appraised average yield, as adjusted.

In 1989, the Corporation received a transfer of $400 million from the Commodity Credit Corporation as a reserve against heavy losses in crop years 1988 and 1989.

[1] These amounts will appear on the books of the reinsured companies. The Corporation records will only reflect the net reinsurance income and net reinsurance losses.

The annual appropriation for the administrative and operating expenses of the Corporation is presented earlier in the budget.

Operating results and financial condition.—As of September 30, 1989, the Corporation reflected a deficit of $3,392.0 million. This compares with a deficit of $2,504.1 million at September 30, 1988.

For crop years 1948 through 1988, indemnities ($4,888.2 million) exceeded premium income ($3,130.6 million) by $1,757.6 million; the loss ratio for the period was 1.56. Indemnity costs exceeded premiums in 23 of the 40 years.

COMMODITY CREDIT CORPORATION

Federal Funds

General and special funds:

COMMODITY CREDIT CORPORATION

REIMBURSEMENT FOR NET REALIZED LOSSES

For fiscal year [1990] *1991,* such sums as may be necessary to reimburse the Commodity Credit Corporation for net realized losses sustained, but not previously reimbursed [(estimated to be $4,800,000,000 in the President's fiscal year 1990 Budget Request (H. Doc. 101–4)), but not to exceed $4,233,000,000], pursuant to section 2 of the Act of August 17, 1961, as amended (15 U.S.C. 713a–11).

[Such funds are appropriated to reimburse the Corporation to restore losses incurred during prior fiscal years. Such losses for fiscal years 1988 and 1989 include $1,969,000,000 in connection with carrying out the Export Enhancement Program (EEP), $264,000,000 in connection with carrying out the Targeted Export Assistance Program (TEA), $1,500,000,000 in connection with carrying out the Federal Crop Insurance Program, and $31,831,000,000 in connection with carrying out the commodity programs.]

SHORT-TERM EXPORT CREDIT

The Commodity Credit Corporation shall make available not [less] *more* than $5,000,000,000 in credit guarantees under its export credit guarantee program for short-term credit extended to finance the export sales of United States agricultural commodities and the products thereof, as authorized by section 1125(b) of the Food Security Act of 1985 (Public Law 99–198).

INTERMEDIATE EXPORT CREDIT

The Commodity Credit Corporation shall make available not [less] *more* than $500,000,000 in credit guarantees under its export guarantee program for intermediate-term credit extended to finance the export sales of United States agricultural commodities and the products thereof, as authorized by section 1131(3)(B) of the Food Security Act of 1985 (Public Law 99–198). *(Rural Development, Agriculture, and Related Agencies Appropriations Act, 1990.)*

The Corporation was created to: stabilize, support, and protect farm income and prices; help maintain balanced and adequate supplies of agricultural commodities, their products, foods, feeds, and fibers; and help in their orderly distribution (15 U.S.C. 714–714p). It may make available materials and facilities required in connection with the production and marketing of agricultural commodities and it may be used to administer and to temporarily finance numerous special activities.

The Corporation's capital stock of $100 million is held by the United States Treasury. Under present law, up to $30 billion may be borrowed from the U.S. Treasury to finance operations.

The 1991 estimate includes savings from improving the control and timing of disbursements and handling of cash collections as part of continuing budget management reforms. Current, indefinite appropriation authority is requested to cover all net realized losses. Appropriations to the Corporation for net realized losses have no effect on budget authority as they are used to redeem debt directly with the Treasury.

Budget assumptions.—The following general assumptions form the basis for the Corporation's 1990 and 1991 budget estimates: (a) National income will rise both in 1990 and 1991 from the present level; (b) 1990 crop production will rise from 1989 crop levels; (c) generally, exports of agricultural commodities in 1991 are expected to be slightly higher than 1990 levels; (d) yields for the 1990 crops are based on recent averages adjusted for trend; (e) acreage allotments and marketing quotas will be in effect for the 1990 crops of certain kinds of tobacco; (f) poundage quotas will be in effect for the 1990 crop of peanuts.

It is difficult to forecast with accuracy requirements for the year ending September 30, 1991, since the projections are subject to complex and unpredictable factors such as weather, other factors which affect the volume of production of crops not yet planted, feed and food needs here and overseas, and available dollar exchange.

Appropriations are made to reimburse the Corporation for net realized losses sustained in carrying out its operations:

PROGRAMS OF THE CORPORATION

Price support and related stabilization programs.—The Corporation conducts programs to support farm income and prices and stabilize the market for agricultural commodities. Price support is provided to producers of agricultural commodities through loans, purchases, payments, and other means. This is done mainly under the Commodity Credit Corporation Charter Act, as amended (15 U.S.C. 714 et seq.), the Agricultural Act of 1949, as amended (7 U.S.C. 1421 et seq.), and the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1281 et seq.).

Price support is mandatory for the basic commodities—corn, cotton, wheat, rice, peanuts, and tobacco. The Agricultural Act of 1949, as amended, also requires support of the following nonbasic commodities: honey, milk, barley, oats, rye, grain sorghum, sugar and soybeans. The National Wool Act of 1954, as amended (7 U.S.C. 1781–87), requires support for wool and mohair. Support for other nonbasic commodities is discretionary. The support program may also include operations to remove and dispose of surplus agricultural commodities in order to stabilize prices at levels not in excess of those permissible by law.

The principal methods of providing support are loans to and purchases from producers. With limited exceptions, loans made on commodities are nonrecourse. The commodities serve as collateral for the loan and on maturity the producer may deliver or forfeit such collateral to satisfy the loan obligation without further payment.

Direct purchases are also made from processors as well as producers, depending on the commodity involved. Also, special purchases are made under various laws for the removal of surpluses; for example, the Act of August 19, 1958, as amended (7 U.S.C. 1431 note), and section 416 of the Agricultural Act of 1949, as amended (7 U.S.C. 1431).

Set-aside program and acreage limitation program.—The Agricultural Act of 1949, as amended, authorizes the Secretary to establish, through the Corporation, acreage limitation programs for the 1986 through 1990 crops of upland cotton, rice, and ELS cotton. In addition, the Secretary is authorized to implement a set-aside or acreage limitation program for the 1986 through 1990 crops of wheat and feed grains.

Land diversion payments.—Land diversion programs were also required for certain crops in years prior to 1989.

Producer eligibility.—Producers of feed grains and wheat must comply with acreage limitation provisions or acreage set-aside provisions, and normal crop acreage (NCA) requirements, if in effect, in order to be eligible for price support loans and purchases and deficiency payments. Producers of rice must comply with acreage limitation provisions, if in effect, in order to be eligible for price support loans and purchases and deficiency payments. Producers of cotton must comply with acreage limitation provisions, if in effect, in order to be eligible for price support loans and deficiency payments.

Deficiency payments.—The Agricultural Act of 1949, as amended, establishes: (1) minimum established "target" prices for the 1986 through 1990 crops of the following commodities—wheat, corn, upland cotton, rice, and ELS cotton; (2) minimum price support loan and purchase levels for wheat, feed grains, and rice; and (3) minimum price support loan levels for upland cotton and ELS cotton. Deficiency payments for each of the commodities are required when the target price for the commodity exceeds the national average market price or the price support loan level, whichever is higher. The target prices for grain sorghum and oats and, if designated by the Secretary, barley, are established at a level which is fair and reasonable in relation to the target prices established for corn. These payments may be paid by cash or on a non-cash basis, including payments in the form of commodities or commodity certificates that may be exchanged for commodities owned by CCC.

Disaster Assistance.—The Disaster Assistance Act of 1988, Public Law 100–387, provides assistance to producers who experienced livestock or crop losses on program and nonprogram crops in 1988 due to drought, hail, or excessive moisture that occurred in 1988. Assistance is also made available with respect to tree and forage losses.

The Disaster Assistance Act of 1989, Public Law 101–82, provides assistance to producers of program and nonprogram crops for losses in 1989 due to adverse weather in 1988 and 1989 in much the same manner as the Disaster Assistance Act of 1988. Assistance is also made available to eligible orchardists and tree farmers.

Marketing loan and certificate programs.—The Agricultural Act of 1949, as amended, authorizes a mandatory marketing loan program for each of the 1986 through 1990 crops of rice and upland cotton and a discretionary marketing loan program for each of the 1986 through 1990 crops of wheat, feed grains, and soybeans. Under a marketing loan program, a producer may repay a price support loan at a level that is lower than the original loan rate. The Agricultural Act of 1949, as amended, also provides that the Secretary may allow honey producers to repay price support loans at a level that is lower than the original loan rate. The Agricultural Act of 1949, as amended, provided for payments, in the form of negotiable marketing certificates, to persons holding free stocks of upland cotton as of August 1, 1986, and to first handlers of upland cotton (persons regularly engaged in buying or selling upland cotton). The Food Security Act of 1985, as amended, provides for a marketing certificate program for rice producers and sellers.

The following table itemizes CCC certificate payments by program:

Grain reserves.—The Agricultural Act of 1949, as amended, authorizes a producer-owned grain reserve program for wheat and feed grains that provides 3-year extended loans to producers. Producers receive annual storage payments under the contract. Program provisions establish when interest is charged. Storage payments cease and producers may repay their loans when market prices reach the higher of 140 percent of the nonrecourse loan rate for the commodity or the established price for the commodity.

Dairy.—The Agricultural Act of 1949, as amended, provided for a revised dairy price support program. During the period April 1, 1989, through June 30, 1989, the support price in effect was increased by 50 cents per hundredweight. As of July 1, 1989, the support price was $10.60 again. The Secretary may also, on January 1 of calendar year 1990, reduce the support price in effect by 50 cents per hundredweight if estimates of CCC purchases of milk or milk products for the twelve-month period beginning on such date is in excess of five billion pounds milk equivalent. In addition, if the Secretary estimates on January 1 in the calendar years 1989 and 1990 that the level of purchases of milk and milk products by CCC for such calendar year will not exceed 2.5 billion pounds, the Secretary must increase the support price in effect on such date by 50 cents per hundredweight. The Secretary was required to provide for a reduction of 2½ cents per hundredweight in the support price received on all milk marketed for commercial use by producers to be made during the period January 1, 1988 through December 31, 1988.

Storage facilities.—Pursuant to sections 4(h) and 5(b) of the Commodity Credit Corporation Charter Act, as amended, the Corporation has authority to make secured loans for the purchase, construction, or remodeling of facilities for storage and care of commodities on the farm.

Payment limitations.—The Food Security Act of 1985, as amended, provides that the total amount of deficiency and land diversion payments, excluding any deficiency payment received as the result of a reduction of the wheat or feed grain price support loan level, that a person is entitled to receive under one or more of the annual programs for feed grains, wheat, upland cotton, ELS cotton, and rice for each of the 1987 through 1990 crops of these commodities shall not exceed $50 thousand. For each of the 1987 through 1990 crops, the total amount of: (1) deficiency payments, land diversion payments, disaster payments, loan deficiency payments, inventory reduction payments and gains realized from a marketing loan repayment with respect to wheat, feed grains, upland cotton, ELS cotton, rice, and honey; and (2) gains realized by a producer from repaying a loan at less than the original loan level with respect to other commodities, that a person shall be entitled to receive under one or more of the annual programs for such commodities shall not exceed $250 thousand, except as otherwise may be authorized by the Secretary. Annual rental payments made under the Conservation Reserve Program are limited to $50,000 per person. Combined disaster and emergency livestock payments made under the Disaster Assistance Act of 1988 or the Disaster Assistance Act of 1989 are limited to $100,000 per person, under each Act. The total amount of benefits that a person may receive annually under one or more of the emergency livestock assistance programs is limited to $50,000. Payments under the Forage Assistance Program are limited to $3,500 per person and under the Tree Assistance Program to $25,000 per person.

Supply and foreign purchase.—The Corporation can procure from domestic and foreign sources food, agricultural commodities, and products and related materials to supply the needs of Federal agencies, foreign governments, and private and international relief agencies, under sections 5 (b) and (c) of the Commodity Credit Corporation Charter Act, as amended.

Commodity export.—The Corporation promotes the export of agricultural commodities and products through sales for dollars or foreign currency, payments, extension of credit, assumption of certain risks, and conduct of other operations

with respect to the exportation of commodities. Such commodities and products may be those held in private trade channels as well as those acquired by the Corporation. These programs are carried out under the Corporation's charter and other specific legislation.

Foreign donations.—Under the authority of section 416(b) of the Agricultural Act of 1949, as amended, the Corporation may furnish eligible commodities for carrying out programs of assistance in developing and friendly countries and may pay costs associated with making the commodities available. Such commodities may also be used to carry out the Food for Progress Act of 1985 or furnished under title II of the Agricultural Trade Development Act of 1954, as amended.

Operating expenses.—The Corporation carries out its functions through utilization of employees and facilities of other Government agencies. Administrative expenses are incurred for the services of: the Agricultural Stabilization and Conservation Service; General Sales Manager; and other agencies of the Department engaged in the Corporation's activities; and the General Accounting Office for audit. Additional expenses are incurred for ASCS county offices for work related to programs of the Corporation, other ASCS expenses offset by revenue, custodian, and agency expenses of the Federal Reserve banks and lending agencies, and miscellaneous costs.

Expenses are incurred for acquisition, operation, maintenance, improvement, or disposition of property that the Corporation owns or in which it has an interest. These expenses are treated as program expenses. Such program expenses include inspection, classing and grading work performed on a fee basis by Federal employees or Federal- or State-licensed inspectors; work relating to Commodity Credit Corporation programs performed on a contract or fee basis by Agricultural Stabilization and Conservation Service; and special services performed by other Federal agencies within and outside this Department. Most of these general expenses, including storage and handling, transportation, inspection, classing and grading, and producer storage payments, are included in program costs. They are shown in the program and financing schedule in the entries entitled "Storage, transportation, and other obligations not included above," and "Producer storage payments."

The Corporation receives reimbursement for grain requisitioned pursuant to Public Law 87-152 (7 U.S.C. 447-449) by the States from Corporation stocks to feed resident wildlife threatened with starvation through the appropriation reimbursement for net realized losses. There have been no requisitions in recent years, however.

SPECIAL ACTIVITIES

These activities are carried out under authority of section 5(g) of the Corporation's charter act and specific statutory authorizations or directives with respect thereto that are currently in effect or which may subsequently be enacted.

A summary of such current activities not included under other designated activities is as follows:

[In thousands of dollars]

Item	*1991 estimate*	
	Gross obligations	*Outlays (reimbursable)*
(1) Sale of agricultural commodities for foreign currencies	29,425	−20,575
(2) Financing sales of agricultural commodities for convertible foreign currencies and for dollars on credit terms	787,575	403,575
(3) Commodities supplied in connection with dispositions abroad	646,000	646,000
(4) National Wool Act	120,229	120,229
(5) Conservation Reserve Program	1,878,038	1,991,500
Total	3,461,267	3,140,729

The Corporation receives appropriations or reimbursement for cost of these activities as described under each.

Activities currently being carried out are as follows (see Foreign Assistance programs for details of items (1), (2), (3) and (4) and see Conservation Reserve Program for details of item (5)):

(1) Sale of agricultural commodities for foreign currencies *(title I, Public Law 480).*

(2) Financing sales of agricultural commodities for convertible foreign currencies and for dollars on credit terms *(titles I and III, Public Law 480).*

(3) Commodities supplied in connection with dispositions abroad *(title II, Public Law 480).*

(4) *National Wool Act.*—Under the National Wool Act of 1954, as amended, support of wool and mohair prices is mandatory. The Corporation makes payments to producers in order to bring the national average price received by all producers up to the support price required under the act.

(5) *Conservation Reserve Program.*—The Food Security Act of 1985, as amended, provides that the Secretary shall carry out a Conservation Reserve Program by entering into 10- to 15-year contracts with owners and operators of highly erodible cropland to assist them in conserving and using the soil and water resources of their farms. In return for placing land in the reserve, farmers receive cost-share and rental payments, as well as technical assistance from USDA agencies. Beginning in 1988, a separate appropriation for advance to CCC was provided to carry out the program.

[1] Deductions from producer payments for promotional advertising and selected marketing development activities.

Total payments made under the National Wool Act cannot at any time exceed an amount equal to 70 percent of the accumulated totals, as of the same date, of the gross receipts from import duties collected on and after January 1, 1953, on wool and wool manufactures. Actual or estimated payments compared with this limitation are as follows:

[In thousands of dollars]

Item	*1989 actual*	*1990 est.*	*1991 est.*
70% of customs receipts on wool and wool manufactures, cumulative from Jan. 1, 1953, to end of preceding calendar year	4,367,696	4,676,131	4,988,066
Cumulative incentive payments on marketings to end of preceding calendar year	1,888,428	2,004,228	2,119,428
Balance of limitation available for payments in succeeding marketing years	2,479,268	2,671,903	2,868,638

Funds of the Corporation are used to carry on this program. For the purpose of reimbursing the Corporation, section 705 of the act appropriates each fiscal year an amount equal to amounts expended by the Corporation during the preceding year and to amounts expended in prior fiscal years not previously reimbursed, but not to exceed an amount equal to 70 percent of the gross receipts from duties collected on wool and wool manufactures during the calendar year preceding the fiscal year. However, for 1988, Congress appropriated specified amounts for various activities of the Corporation in lieu of providing reimbursement for the Corporation's losses. This included $126,108,000 for the National Wool Act, which was applied to 1988 expenditures to reduce the amount that was appropriated under section 705 in 1989.

FINANCING

Borrowing authority.—The Corporation has an authorized capital stock of $100 million held by the United States and, effective in 1988, authority to borrow up to $30 billion.

Funds are borrowed from Treasury and may also be borrowed from private lending agencies and others. The Corporation reserves a sufficient amount of its borrowing authority to purchase at any time all notes and other obligations evidencing loans made by such agencies and others. All bonds, notes, debentures, and similar obligations issued by the Corporation are subject to approval by the Secretary of the Treasury as required by the Act of March 8, 1938 (15 U.S.C. 713a–4).

Interest on borrowings from the Treasury (and on capital stock) is paid at a rate based upon the average interest rate of all outstanding marketable obligations (of comparable maturity date) of the United States as of the preceding month. Interest is also paid on other notes and obligations at a rate prescribed by the Corporation and approved by the Secretary of Treasury.

The Department of Agriculture and Related Agencies Appropriation Act, 1966, made provision for terminating interest after June 30, 1964 on the portion of the Corporation's borrowings from the Treasury equal to the unreimbursed realized losses recorded on the books of the Corporation after the end of the fiscal year in which such losses are realized.

POSITION WITH RESPECT TO BORROWING AUTHORITY, END OF YEAR

[In thousands of dollars]

Item	*1989 actual*	*1990 est.*	*1991 est.*
Statutory borrowing authority	30,000,000	30,000,000	30,000,000

Net statutory borrowing authority available	16,293,989	11,343,617	5,020,344

Note.—Accounts payable, accrued liabilities and other outstanding obligations not reflected on this table do not become charges against the statutory borrowing authority until they result in borrowings from the Treasury.

Contract authority.—Price support and other programs required by statute may result in the Corporation incurring obligations in excess of available funds and borrowing authority. Such obligations are liquidated from subsequent appropriations and other funds that may become available to the Corporation. Any increase in obligations in excess of available fund resources is reported as contract authority in the year involved; a decrease is reported as the application of appropriations and other funds to liquidate the authority.

Appropriations.—Under section 2 of Public Law 87–155 (15 U.S.C. 713a–11), annual appropriations are authorized for each fiscal year to reimburse the Corporation for net realized losses incurred as of the close of each year. However, for 1988, Congress appropriated specified amounts for various activities of the Corporation in lieu of providing reimbursement for the Corporation's losses.

The special activities are financed as indicated in the program descriptions above. In addition to certain reimbursements from other agencies, appropriations are made for the National Wool Act (see above), foreign assistance programs, and the Conservation Reserve Program.

Deficit.—The net realized losses of the Corporation have previously been reimbursed as follows:

The Rural Electrification Administration (REA), under authority of the Rural Electrification Act of 1936, as amended, makes direct loans and guarantees loans made by other qualified lenders to suppliers of electric and telephone service in rural areas. REA also makes grants and loans for the purpose of promoting rural economic development and job creation projects.

In order to administer the REA loan programs and to ensure that construction and operation projects conform to approved standards, REA furnishes, without cost to the borrower, business management and technical assistance on a regular basis. This objective is carried out through regulations, personal visits to the borrowers, and training. REA has personnel in the Washington office and a field staff who have expertise in the electric or telephone industry and who are available to assist borrowers in specialized areas.

The Administration proposes to gradually convert the electric direct loan program to partially guaranteed, privately originated loans. A small amount of direct electric loan authority is maintained in the 1991 budget. All telephone direct and guaranteed loans will be made by the Rural Telephone Bank. Staff resources necessary to carry out these programs are also requested.

The Rural Electrification Act of 1936, as amended, authorizes appropriations for the purchase of Class A stock in the Rural Telephone Bank (RTB) by the U.S. Government.

No appropriation is requested for 1991. The Federal Government has already provided $564 million in subsidized capital (2 percent interest) to the Bank—$264 million over the amount in the original statute establishing the Bank. Many RTB borrowers are financially strong and compare favorably to investor-owned companies. Therefore, further capitalization of the Rural Telephone Bank is not necessary.

The Rural Communication Development Fund was established pursuant to the Secretary's Memorandum No. 1988, approved May 22, 1979. This memorandum transferred certain financing authorities under the Consolidated Farm and Rural Development Act (7 U.S.C. 1921 et seq.) from the Farmers Home Administration to the Rural Electrification Administration for the purpose of financing and administering community antenna television services or facilities in rural areas. A reimbursement is required for operating losses sustained in 1989 that are not wholly funded by annual collections of principal and interest.

The Rural Electrification Administration conducts two loan programs: (1) the rural electrification program; and (2) the rural telephone program.

Direct electric and telephone loans from the Rural Electrification and Telephone Revolving Fund (RETRF) bear an interest rate of 5 percent. Some loans may be made at a lesser rate. RETRF loans must be repaid within a period not to exceed 35 years. REA also guarantees loans made directly by the Government through the Federal Financing Bank (FFB) at long-term Treasury rates plus 12.5 basis points or by other qualified lenders at rates agreed upon by the lender and the borrower.

Loans from the RETRF are financed from available receipts or, when necessary, by interim Treasury borrowings. Long-term RETRF borrowing is financed through the FFB based on loan collateral held in the form of certificates of beneficial ownership. The 1991 budget proposes to shift the majority of electric and telephone borrowers from direct Federal loans to partial guarantees of private loans. Most REA borrowers have the financial resources to afford private financing terms.

Rural electrification.—This loan program is financed through REA direct and guaranteed loans for the operation of generating plants, electric transmission, and distribution lines or systems. The 1991 budget will gradually phase-out RETRF direct loans and terminate the 100 percent loan guarantee program. It will be replaced by a new partial REA loan guarantee program. A small amount of direct loan authority is included in each of the next 5 years for electric borrowers who cannot afford private sector financing.

The Rural Telephone Bank (RTB) provides a supplemental source of financing for rural telephone borrowers. The Bank charges an interest rate based on the cost of money to the Bank, as prescribed by law, but not less than 5 percent per annum. The composite interest rate on cumulative loans through September 30, 1989, was 7.586 percent. The interest rate on advances for loans approved since October 1, 1987, is 5 percent.

Equity capital of the Bank consists of class A stock purchased by the United States of $564 million with a 2 percent dividend and classes B and C stock purchased by bank borrowers, organizations eligible to become borrowers and organizations controlled by borrowers. The Bank has borrowed $759 million from the Treasury. The $564 million purchase of capital stock has been financed through appropriations.

Administrative support is provided without charge for the general operations of the Bank by REA employees and the Office of the General Counsel. Administrative expenses, such as expense of the elected members of the Board of Directors, postage fees and the audit by the General Accounting Office, are paid by the Bank.

Bank loans totaled $177 million in 1989. After almost 17 years in operation, loans to 600 borrowers have been approved, totaling over $2.526 billion. Bank loans are $177 million for 1990 and $125 million annually from 1991 through 1995. The Administration will propose increasing interest rates on RTB loans, which would permit the accumulation of equity necessary to repurchase 51 percent of Class A stock and privatize the RTB, as authorized, beginning in FY 1996. The Bank will provide both direct and partially guaranteed private-sector financing to telephone borrowers previously financed by RETRF.

Legislation will be proposed to change RTB interest rates such that the net charge to borrowers equals yields on Treasury rates of comparable maturity. Proposed legislation will also allow the Bank to provide partial guarantees of telephone loans made by the private sector. A loan origination fee of one percent will be charged on guaranteed private-sector loans in 1991 to offset administrative and default costs. The fee will increase by one-half percent each year, reaching three percent in 1995.

The 1991 budget also proposes to allow telephone systems with an average subscriber density of three or fewer per mile access to RTB.

These funds are used to administer the loan, guaranteed loan, and grant programs of the Farmers Home Administration. Activities include reviewing applications, servicing the loan portfolio and providing technical assistance and guidance to borrowers; and to assist in extending other Federal programs to people in rural areas.

The 1991 budget proposes an additional 525 staff years to increase FmHA's loan servicing efforts and prudently dispose of inventory property. New staff will be focused on States with high loan delinquency rates or large work backlogs due to Agricultural Credit Act loan restructurings.

In 1990, Congress separately funded the administrative costs for the Office of the Administrator. Separate funding is eliminated in 1991 and the Administrator's costs once again are funded from the Salaries and Expenses appropriation.

The following tables show total administrative funding available to FmHA and personnel:

This grant program is authorized by subtitle A of the Consolidated Farm and Rural Development Act, as amended. Grants are authorized to be made to associations, including nonprofit corporations, public and quasi-public agencies, and certain Indian tribes to finance storage, treatment, purification, or distribution of water or the collection, treatment, or disposal of waste in rural areas. The amount of any development grant may not exceed 75 percent of the eligible development cost of the project.

The major objectives of the rural water and waste disposal grant program are: (1) to provide assistance to attain basic human amenities; (2) to alleviate health hazards; (3) to promote stability of rural areas by meeting the need for new and improved rural water and waste disposal systems; and (4) to meet national safe drinking water and clean water standards.

This assistance was authorized by section 7 of the Cooperative Forestry Assistance Act of 1978. Grants are made to public bodies to organize, train, and equip local firefighting forces, including those of Indian tribes or other native groups, to prevent, control, and suppress fires threatening human lives, crops, livestock, farmsteads or other improvements, pastures, orchards, wildlife, rangeland, woodland, and other resources in rural areas. In 1989, 3,364 grants were obligated for a total of $3.057 million. It is anticipated that in 1990, 3,000 grants will be obligated for a total of $3.091 million. No program is proposed for 1991.

This is a new program proposed for implementation in 1991. Funding under this proposal will help 8,000 rural, low-income households to obtain adequate housing for a 5-year period. These vouchers more than offset the reduction in the Rural Housing Insurance Fund's subsidized direct loans to rental property developers.

Prior year outlays reflect funding for rental assistance for newly constructed units provided in limited amounts in 1984 and 1985. Since 1986, rental assistance for newly constructed units, as well as existing rental assistance contract renewals and additional servicing assistance for existing projects, has been funded under the Rural Housing Insurance Fund.

The benefits of this voucher program accrue to the renting household. With vouchers, families have the opportunity to choose from any apartment or house that is suitable to their needs. To help pay for housing, the government will cover the difference between 30 percent of the recipient's income and the median rental cost in that residential area.

This proposal is authorized under section 8(o) of the United States Housing Act of 1937, as amended. As practiced by the Department of Housing and Urban Development, FmHA will distribute vouchers to low-income households through a nation-wide network of public housing authorities.

Rural Development Grants.—This assistance is authorized by section 310B(c) of the Consolidated Farm and Rural Development Act, as amended. The Farmers Home Administration provides rural development grants to facilitate the development of business and industry. Grants are made to qualified public or private nonprofit organizations to assist in financing industrial sites in rural areas including the acquisition and development of land, and the construction, conversion, enlargement, repair or modernization of buildings, plants, equipment, access streets and roads. Grants may also be used for utility lines, parking areas, necessary water supply and waste disposal facilities, refinancing, services, and fees. Grants are limited to communities having populations of 50,000 or less with priority given to communities of less than 25,000. No program is requested for 1991.

The Agricultural Credit Insurance Fu[illegible] and its associated loan programs are authorized by title [illegible] the consolidated Farm and Rural Development A[illegible]ded. The state mediation grant program is authorized by title V of the Agricultural Credit Act of 1987.

The Agricultural Credit Insurance Fund is used to insure or guarantee farm ownership, soil and water, farm operating, and emergency loans to individuals. Associations, Indian tribes and tribal corporations are eligible for the following types of loans: Indian land acquisition, watershed protection, flood prevention, and resource conservation and development.

Funding for the 1991 budget is proposed to be limited to farm ownership, farm operating and emergency disaster loans and state mediation grants. The 1991 budget also proposes a new interest subsidy for guaranteed farm ownership and farm operating loans with a corresponding reduction in direct loans. This will enable FmHA to utilize private sector resources to make and service loans while it provides a financial guarantee to encourage private sector participation, plus an interest subsidy to enhance participation in the guarantee program by borrowers who are not able to pay private sector rates without financial assistance. In addition, the budget proposes to limit eligibility for farm operating direct loans to seven years for any one borrower.

The following table shows the 1989 actual and estimated 1990 and 1991 number of loans and grants and program levels. The guaranteed program levels reflect the full principal amount of the loan of which part is guaranteed by the U.S. Government. In addition, financed sales of inventory property amount to $62 million in 1989, $75 million in 1990, and $100 million in 1991.

RURAL HOUSING INSURANCE FUND

From funds in the Rural Housing Insurance Fund, and for insured loans as authorized by title V of the Housing Act of 1949, as amended, [$1,932,490,000] *$1,007,350,000*, of which not less than [$1,881,920,000] *$1,007,350,000* shall be for subsidized interest loans to low-income borrowers, as determined by the Secretary, and for subsequent loans to existing borrowers or to purchasers under assumption agreements or credit sales, and for loans to finance sales or transfers to nonprofit organizations or public agencies of not more than [5,000] *3,000* rental units related to prepayment; and not to exceed $10,000,000 to enter into collection and servicing contracts pursuant to the provisions of section 3(f)(3) of the Federal Claims Act of 1966 (31 U.S.C. 3718). *During fiscal year 1991, commitments to guarantee loans may be made only to the extent that the total loan principal, any part of which is to be guaranteed, shall not exceed $594,000,00. Further, $362,460,000 is appropriated from the general fund solely for the purpose of reducing the interest rate, by no more than an average of 5 percent, on guarantees totaling $397,000,000. No other funds may be added to this amount for the purpose of reducing interest rates.*

For rental assistance agreements entered into or renewed pursuant to the authority under section 521(a)(2) of the Housing Act of 1949, as amended, total new obligations shall not exceed [$300,310,000] *$258,000,000*, to be added to and merged with the authority provided for this purpose in prior fiscal years: *Provided*, That of this amount not less than [$124,918,000] *$92,900,000* is available for newly constructed units financed by section 515 of the Housing Act of 1949, as amended, and not more than [$5,082,000] *$5,100,000* is for newly constructed units financed under sections 514 and 516 of the Housing Act of 1949: *Provided further*, That [$170,310,000] *$153,000,000* is available for expiring agreements and for servicing of existing units without agreements: *Provided further*, That agreements entered into or renewed during fiscal year [1990] *1991* shall be funded for a five-year period, although the life of any such agreement may be extended to fully utilize amounts obligated[: *Provided further*, That agreements entered into or renewed during fiscal years 1986, 1987, 1988 and 1989, may also be extended beyond five years to fully utilize amounts obligated].

For an additional amount to reimburse the Rural Housing Insurance Fund for interest subsidies and losses sustained in prior years, but not previously reimbursed, in carrying out the provisions of title V of the Housing Act of 1949, as amended (42 U.S.C. 1483, 1487(e), and 1490a(c)), including [$1,317,000] *$40,000* as authorized by section 521(c) of the Act, also including not to exceed [$5,000,000] *$11,000,000* for debt forgiveness or payments for eligible households as authorized by section 502(c)(5)(D) of the Act, and not to exceed $10,000 per project for advances to nonprofit organizations or public agencies to cover direct costs (other than purchase price) incurred in purchasing projects pursuant to section 502(c)(5)(C) of the Act; [$2,677,897,000] *$2,667,106,000*. For an additional amount as authorized by section 521(c) of the Act, such sums as may be necessary to reimburse the fund to carry out a rental assistance program under section 521(a)(2) of the Housing Act of 1949, as amended. *(Rural Development, Agriculture, and Related Agencies Appropriations Act, 1990.)*

Rural housing insurance fund.—This fund was established in 1965 (Public Law 89–117) pursuant to section 517 of title V of the Housing Act of 1949, as amended. This fund may be used to insure or guarantee rural housing loans for single family homes, rental and cooperative housing, farm labor housing, and rural housing sites and to make rental assistance payments authorized by section 521(a). Loan programs are limited to rural areas that include towns, villages, and other places which are not part of an urban area and that have a population not in excess of 2,500 inhabitants, or is in excess of 2,500 but not in excess of 10,000 if rural in character, or has a population in excess of 10,000 but not more than 20,000 and is not within a standard metropolitan statistical area and has a serious lack of mortgage credit for low- and moderate-income borrowers.

Public enterprise funds—Continued

RURAL HOUSING INSURANCE FUND—Continued

The 1991 budget proposes a new subsidized and nonsubsidized guaranteed section 502 loan program with a corresponding reduction in direct loan levels under this account. The guaranteed program will enable FmHA to utilize private sector resources for the making and servicing of loans while the Agency will provide a financial guarantee to encourage private sector activity, plus an interest subsidy where it is required to enhance affordability for low and very-low income borrowers. The direct programs, both section 502 and section 515, will be targeted to benefit very-low income borrowers and previously under-served areas. Rural housing vouchers are proposed elsewhere at an 8,000 unit level to augment the Agency's loan and grant programs. Vouchers will enable families now living in substandard housing to rent decent, well equipped rental housing of their choice rather than specific FmHA financed units.

The major programs currently funded through the Rural housing insurance fund are: section 502 very low and low to moderate income home ownership loans; section 504 very low-income housing repair loans; section 514 domestic farm labor housing loans; section 515 rural rental housing loans; section 521 rural rental assistance; section 502(c)(5)(D) rental assistance; and section 524 rural housing site loans.

In 1987, the FmHA sold rural housing section 502 loan assets without recourse to institutional and individual investors. The agency proposes to sell, during 1990, its investment in subordinated securities acquired as part of the proceeds from the 1987 sale, realizing net proceeds of $390 million.

The following table shows 1989 actual and estimated 1990 and 1991 number of units and program levels. In addition, financed sales of inventory property amounted to $407.6 million in 1990, $340 million in 1990, and $413 million in 1991.

The Rural Development Insurance Fund (RDIF) was established on October 1, 1972, pursuant to section 116 of the Rural Development Act of 1972 (Public Law 92-419).

The fund is used to insure or guarantee loans for water systems and waste disposal facilities, community facilities, and industrial development in rural areas. Communities unable to afford low interest loans for water and waste disposal facilities are also able to obtain FmHA grants.

The 1991 budget proposes additional loans in the Rural Development Loan Fund while terminating the RDIF's business and industry guarantee program. Though the switch lowers total loan levels, this change actually increases the level of subsidy for rural businesses and concentrates aid to locally led business development.

The following table shows the number of loans and the program levels for 1989 actual and estimated for 1990 and 1991. The guaranteed program levels reflect the full principal amount of the loans of which part is guaranteed by the U.S. Government.

Loans from the Rural Development Loan Fund are made to intermediary borrowers (i.e., small investment groups), who in turn relend the funds to small rural businesses, community development corporations, or other organizations for the purpose of improving economic opportunities in rural areas. Through the use of local intermediaries, this program is able to serve small-scale enterprises and give preference to those communities with the greatest need.

The following table shows the number of loans and the program levels for 1989 actual and estimated for 1990 and 1991.

Technical assistance.—Technical assistance is provided through 2,941 conservation districts to land users and decisionmakers, including individual landowners and operators, community groups, units of government, Indian tribes, and others for the planning of conservation programs and installation of needed conservation systems on the land, including design, layout, installation, and consultation services.

Combinations of needed soil and water conservation systems are planned in relation to each other to achieve well-balanced conservation programs. Technicians of the Soil Conservation Service explain the various soil conditions, develop alternative uses and treatments, help to evaluate the costs and returns of conservation work, and furnish onsite assistance to farmers, ranchers, and others in applying the needed treatments. About 70 percent of the total annual investment in conservation practices applied through the conservation technical assistance program is made by private landusers. During 1991, personnel funded within this account will continue to provide technical assistance to implement the Conservation Reserve Program and the highly erodible land and wetland conservation provisions of the Food Security Act of 1985. The 1991 budget also proposes to increase technical assistance as part of the Government-wide water quality initiative.

MAIN WORKLOAD FACTORS

	1989 actual	*1990 est.*	*1991 est.*
Decisionmakers receiving technical services	1,283,365	1,300,000	1,300,000
Acres treated with conservation technical assistance	62,961,426	63,000,000	63,000,000
Tons of soil erosion reduced	353,929,831	240,000,000	240,000,000

Also included in this item are the inventory and monitoring, resource appraisal, and program development activities carried out by the Service. Resource inventories are conducted to provide soil, water, and related resource data for evaluating land-use changes and trends; and for guidance in the development and implementation of Federal, State, and local resource conservation programs. Resource appraisal and program development provides for periodic reports to the public and Congress as required by the Soil and Water Resources Conservation Act of 1977 as amended.

Soil surveys.—Soil surveys and investigations are made of the Nation's soil resources, with interpretations and publications that provide physical land facts needed for program development, resource conservation planning, installation of planned practices, and for use by other Federal, State, and local agencies in making land-use decisions. National leadership is provided for digitizing soil surveys in cooperation with States, and other users of soil survey data.

Acres mapped annually	34,769,906	40,000,000	40,000,000
Soil surveys ready for publication (number)	79	72	72

Snow survey water forecasting.—Water supply forecasts prepared from snow surveys in western states are used in making efficient seasonal use of water for irrigation, flood control, fish and wildlife, recreation, power generation, municipal and industrial water supply, and water quality management.

Operation of plant materials centers.—The selection and evaluation of plant materials are made at 24 plant materials centers through field trials to determine their suitability for erosion control, conservation, and other environmental improvements.

The Department makes surveys of proposed small watershed projects, and work plans are prepared in cooperation with local sponsors. These plans outline the soil and water management problems in the watershed, the steps that have been or are authorized to be taken to alleviate these problems, the proposed works of improvement to be installed, the estimated benefits and costs, cost sharing, and operation and maintenance arrangements, and other information necessary to justify Federal participation in project development.

These programs provide for cooperation between the Federal Government and States and their political subdivisions to reduce damage from floodwater, sediment, and erosion, for the conservation, development, utilization, and disposal of water, and for the conservation and proper utilization of land.

The budget assumes enactment of legislation requiring non-Federal project sponsors to pay an increased portion of small watershed project costs attributable to flood prevention. This legislation has no budgetary impact. Consistent with the provisions in the Water Resources Development Act, the non-Federal cost share will not be less than 25 percent or more than 50 percent, with a minimum 5 percent in cash. An ability to pay provision will also be proposed as a part of the legislation.

Watershed operations authorized by Public Law 534.—The Department cooperates with soil conservation districts and other local organizations in planning and installing works of improvement for flood prevention in 11 watersheds authorized by the Flood Control Act of 1944. The Federal Government shares the cost of works of improvement for flood prevention, agricultural water management, recreation, and fish and wildlife development.

Within the 11 authorized projects, 403 subwatershed areas have been identified for planning purposes. Installation progress in these subwatersheds is as follows:

MAIN WORKLOAD FACTORS

	1989 actual	*1990 est.*	*1991 est.*
Projects in preconstruction, end of year	22	19	19
Projects in construction, start of year	86	91	91

Projects not started, end of year	70	68	68
Total subwatershed projects	403	403	403

Emergency watershed protection operations.—This program authorizes the Secretary of Agriculture to undertake such emergency measures for runoff retardation and soil erosion prevention as may be needed to safeguard life and property from floods and the products of erosion on any watershed whenever natural elements or force causes a sudden impairment of that watershed. An emergency is considered to exist when a watershed is suddenly impaired by flood, fire, wind, earthquake, or other natural cause and consequently life and property are endangered by floodwater, erosion, or sediment discharge. The emergency area need not be declared a national disaster area to be eligible for emergency watershed protection. Emergency watershed protection is applicable to small scale, localized disasters as well as large scale disasters. State environmental, natural resource, fish and game, and other agencies participate in planning and coordinating emergency work.

Small watershed operations authorized by Public Law 566.—The Department provides technical and financial assistance to local organizations to install measures for watershed protection, flood prevention, agricultural water management, recreation, and fish and wildlife enhancement.

Watershed work plans are prepared by sponsoring local organizations with the Department's assistance or through State and local resources. After work plans are approved by the Department or Congress (projects where the estimated Federal contribution will exceed $5 million require congressional approval), technical services and financial assistance are provided for specific works of improvements.

The following tabulation shows the status of Public Law 566 projects:

MAIN WORKLOAD FACTORS

	1989 actual	*1990 est.*	*1991 est.*
Status of projects approved for operations:			
Projects in preconstruction	203	213	223
Projects under construction, start of year	365	344	353

Projects not requiring funds	163	163	163
Projects completed in prior years	697	711	731
Total approved projects	1,481	1,511	1,531

Loan services.—Loans are made to local sponsoring organizations to finance the local cost of installing works of improvement in Public Law 534 and approved Public Law 566 watershed projects. Repayment with interest is required within 50 years after the principal benefits of improvements first become available. Loans are made from funds available for this purpose from the Agricultural Credit Insurance Fund of the Farmers Home Administration. Loan services related to processing and making loans are financed from this appropriation.

The 1991 budget proposes no new Agricultural Credit Insurance Fund loans for watershed projects.

This program provides cost-share and technical services to participating landowners or operators in the Great Plains area in the development and installation of long-term conservation plans and practices for their land under contracts entered into in prior years. It is a voluntary program in 518 designated counties of 10 Great Plains States. Contracts with individual landowners range in time from 3 to 10 years.

MAIN WORKLOAD FACTORS

Program participants:	*1989 actual*	*1990 est.*	*1991 est.*
Number of new contracts during year	953	975	1,110
Number of contracts serviced during year	6,012	6,104	6,539
Number of acres under contracts	15,618,705	16,473,700	17,713,500

As of September 30, 1989, there were 5,129 active contracts on hand. Co-landowners or operators finance the entire cost of installing recurring management-type practices and pay a specified part of the cost-shared practices installed on their land. Program regulations provide that cost-share rates offered in any contract shall not exceed 80 percent of the cost of installing eligible practices within the designated county. There is a cost-sharing limitation of $35 thousand for any contract.

Under this program, the Department assists States, local units of government, groups and individuals in developing area plans for resource conservation and development (RC&D). It will play a supportive role in the Department's Rural Revitalization Program.

RC&D areas are provided technical and financial assistance to help States and local units of government prepare plans for resource development and economic improvement and to plan and install community-type conservation projects or measures. Financial contributions, loans, and other Federal assistance are used to help carry out measures specified in RC&D area plans. Loans have previously been made through the Farmers Home Administration to qualified local organizations to help finance their share of the costs of installing the measures.

The RC&D program would be continued in 1991 with emphasis on technical assistance through RC&D coordinators, continued RC&D funded cost-sharing, and no new Farmers Home Administration Loans from the Agricultural Credit Insurance Funds.

The following tabulation shows the status of RC&D areas authorized to receive technical and financial assistance.

The major objectives of the Animal and Plant Health Inspection Service are to protect the animal and plant resources of the Nation from destructive pests and diseases. This mission is carried out through five major components:

Pest and disease exclusion.—The agency conducts inspection and quarantine activities at U.S. ports-of-entry to prevent the introduction of exotic animal and plant diseases and pests. APHIS develops and conducts preclearance programs to ensure that foreign agricultural products destined for the U.S. do not present a risk to U.S. agriculture. APHIS engages in cooperative programs in foreign countries to control pests of imminent concern to the United States. APHIS also certifies plants and plant products for export and regulates imports and exports of designated endangered plant species. User fees are proposed to fully recover the cost of the agricultural quarantine inspections service and partially recover the costs of the import/export service.

Plant and animal health monitoring.—The Agency conducts programs to assess animal and plant health and to detect endemic and exotic diseases and pests. The plant and animal health monitoring programs are primarily cooperative efforts of the Federal and State governments, and industry. The Agency also carries out surveys in cooperation with the States to detect harmful plant and animal pests and diseases and to determine if there is a need for pest eradication programs.

Pest and disease management programs.—The Agency carries out programs to control and eradicate infestations and animal diseases that threaten the United States; to reduce agricultural losses caused by predatory animals, birds, and rodents; to provide technical assistance to States, counties, farmer or rancher groups, and foundations; and to ensure compliance with interstate movement and disease control regulations. Interstate shipments of plants, livestock, and related materials are monitored and regulated to prevent the spread of disease. APHIS protects agriculture from detrimental animal predators through identification, demonstration, and application of the most appropriate methods of control.

Animal care.—The Agency conducts regulatory activities which ensure the humane care and handling of animals used in research, exhibition, or the wholesale pet trade. The Agency is also responsible for administering the Horse Protection Act, which prohibits the showing, selling, or exhibition of sore horses.

Scientific and technical services.—APHIS develops methods to control animals and pests that are detrimental to agriculture, other wildlife, and public safety. The agency regulates genetic research to guard against the release of potentially harmful organisms into the environment. APHIS also conducts veterinary diagnostic laboratory activities and biologic regulatory enforcement to ensure that the products developed for combatting disease are potent, safe, and pure. It also provides and directs technology development in coordination with other groups in APHIS and Plant Protection and Quarantine (PPQ) officials to support PPQ programs of the Agency and its cooperators at the State, national, and international levels. User fees are proposed in veterinary disagnostics to recover the costs for certain laboratory testing and reagent production.

The buildings and facilities fund provides for construction, repairs, and alterations, as needed, for APHIS operated facilities, which include animal quarantine stations, border inspection stations, sterile insect rearing facilities, and laboratories.

The 1991 budget proposes $25.4 million for this program, which consists of $4.4 million for repairs, alterations, and renovations for currently owned APHIS facilities; $4 million for constuction of a wildlife research center in Ft. Collins, Colorado, to replace the existing center in Denver, Colorado; $5 million for APHIS' share of improvements and repairs to facilities at the Plum Island animal disease center in New York; and $12.0 million for the National Germplasm Quarantine Center at Beltsville, Md.

The following services are financed by fees and miscellaneous contributions advanced by importers, manufacturers, States, organizations, individuals, and others:

Expenses and refunds, inspection, certification, and quarantine of animal products.—This includes inspection of animal hides and other animal materials to be exported. Fees are paid in advance for services to be rendered (7 U.S.C. 1621–1627) (21 U.S.C. 111).

Expenses, feed, and attendants for animals in quarantine.—Costs associated with the care of animals are paid from fees advanced by importers (21 U.S.C. 102).

Miscellaneous contributed funds.—Funds are received from States, local organizations, individuals, and others and are available for plant and animal quarantine inspection and cooperative plant and animal disease and pest control activities (7 U.S.C. 450b, 2220). Commencing with 1979, fees were collected for the importation of commercial birds.

The Federal Grain Inspection Service (FGIS) establishes official United States standards for grain, promotes the uniform application thereof by official inspection personnel, provides for an official inspection system for grain, and regulates the weighing and certification of the weight of grain shipped in interstate or foreign commerce as authorized by the U.S. Grain Standards Act (USGSA), as amended, and the regulations thereof, and the Agricultural Marketing Act of 1946 (AMA).

Standardization activities include establishing and updating U.S. grain standards, research and developing, and improving methods to ensure the accurate and uniform application of the standards.

The compliance activities ensure the accurate and uniform application of the USGSA and applicable provisions of the AMA. The compliance program functions include: (1) evaluating alleged violations and initiating preliminary investigations; initiating the implementation of corrective actions; (2) conducting management and technical reviews; (3) administering the designations and delegations of State and private agencies to perform official functions and monitoring the performance of the agencies; (4) identifying and, where appropriate, waiving and monitoring conflicts of interest; (5) licensing personnel of delegated States and designated agencies; (6) registering persons/firms engaged in the business of buying grain for sale in foreign commerce, and in the business of handling, weighing, or transporting of grain for sale in foreign commerce; (7) responding to audits of FGIS programs; and (8) reviewing and, when appropriate, approving official agencies' fee schedules.

The International Monitoring Staff briefs foreign buyers, assesses foreign inspection and weighing techniques, and responds to foreign quality and quantity complaints.

An advisory committee consisting of members from the grain industry exists to advise the Agency regarding efficient and economical implementations of the USGSA.

The Grain Quality Improvement Act of 1986 was enacted on November 10, 1986, to improve the quality of U.S. grain by prohibiting the introduction and reintroduction of dockage and foreign material to grain.

The Federal Grain Inspection Service provides a uniform system for the inspection and weighing of grain. Services provided under this system are financed through a fee supported revolving fund. This authority has been extended through September 1993.

Fee supported programs include direct services, supervision activities and administrative functions. Direct services include official grain inspection and weighing by FGIS employees at certain export ports as well as the inspection of U.S. grain shipped through Canada. FGIS supervises the inspection and weighing activities performed by its own employees. The agency also oversees the inspection and weighing of grain performed by employees of 8 delegated States and 77 designated State and private agencies. FGIS provides an appeal service of original grain inspections and a registration system for grain exporting firms. Through support from the Association of American Railroads and user fees, FGIS conducts a railroad track scale testing program. In addition, the agency provides grading services on request for rice and grain related products under the authority of the Agricultural Marketing Act of 1946 (AMA).

Agricultural Marketing Service activities assist producers and handlers of agricultural commodities by providing a variety of marketing services. These services continue to become more complex as the volume of agricultural commodities increases, as a greater number of new processed commodities are developed, and as the agricultural market structure undergoes extensive changes. Marketing changes include increased concentration in food retailing, direct buying, decentralization of processing, growth of interregional competition, vertical integration, and contract farming. The individual activities include:

Market news service.—The market news program provides the agricultural community with information pertaining to the movement of agricultural products. This nationwide service provides daily reports on the supply, demand and price of over 670 commodities throughout the country.

Inspection, grading and standardization.—Nationally uniform standards of quality for agricultural products are established and applied to specific lots of products to: promote confidence between buyers and sellers; reduce hazards in marketing due to misunderstandings and disputes arising from the use of nonstandard descriptions; encourage better preparation of uniform quality products for market; and furnish consumers with more definite information on the quality of products they buy. Grading services are provided for cotton and domestic and imported tobacco.

Continuous in-plant inspection of all plants manufacturing liquid, frozen or dried egg products is provided, with quarterly inspection of egg handlers and hatcheries to ensure the proper disposition of shell eggs unfit for human consumption. Imported egg products are controlled to make certain that the inspection systems in exporting countries have standards equal to those of the United States.

A uniform government food specification system is maintained to provide a more efficient Federal food procurement service.

Market protection and promotion.—This program consists of: (1) the research and promotion programs which are designed to improve the competitive position and expand markets for cotton, eggs, and egg products, honey, pork, beef, milk and dairy products, mohair, and potatoes; (2) the Federal Seed Act; and (3) the administration of the Capper-Volstead Act and the Agricultural Fair Practices Act.

Amendments to the 1985 Food Security Act provided legislative authority for the beef, pork, and watermelon research and promotion programs. Assessments on producers to fund the beef and pork programs began in 1986. The Watermelon

Research and Promotion Plan was issued in June 1989. Full implementation of the Plan is scheduled for March 1990.

Federal seed inspectors have conducted tests on samples to help ensure truthful labeling of agricultural and vegetable seeds sold in interstate commerce.

The Capper-Volstead Act and the Agricultural Fair Practices Act protect producers against discriminatory practices by handlers, permit producers to engage in cooperative efforts, and ensure that such cooperatives do not engage in practices that monopolize or restrain trade.

License fees are deposited in this special fund and are used to meet the costs of administering the Perishable Agricultural Commodities and the Produce Agency Acts (7 U.S.C. 491–497, 499a–499s). The current annual license fee is set at $300 plus $150 for each additional business facility operated by the applicant in excess of nine facilities, up to a maximum of $3,000.

The Acts are intended to ensure equitable treatment to farmers and others in the marketing of fresh and frozen fruits and vegetables. Commission merchants, dealers, and brokers handling these products in interstate and foreign commerce are licensed. Complaints of violations are investigated and violations dealt with by (a) informal agreements between the two parties, (b) formal decisions involving payment of reparation awards, and/or (c) suspension or revocation of license and/or publication of the facts.

A 1984 amendment to the Perishable Agricultural Commodities Act requires traders to have trust assets on hand to meet their obligations to fruit and vegetable suppliers. To preserve their trust and establish their rights ahead of other creditors, unpaid suppliers file notice with both the Department and their debtors that payment is due.

Under section 32 of the act of August 24, 1935, as amended (7 U.S.C. 612c), an amount equal to 30 percent of customs receipts collected during each calendar year is automatically appropriated for expanding outlets for nonbasic commodities. An amount equal to 30 percent of receipts collected on fishery products is transferred to the Department of Commerce. Most of the funds are transferred to the Food and Nutrition Service and are used to purchase commodities under section 6 of the National School Lunch Act and other authorities specified in the child nutrition appropriation. If unforeseen commodity surpluses should develop, unobligated reserve balances are available for surplus removal.

Expenses and refunds, inspection and grading of farm products.—The commodity inspection and grading programs provide grading, examination, and certification services for a wide variety of fresh and processed food commodities using federally approved grade standards and purchase specifications. Commodities graded include poultry, livestock, meat, dairy products, and fresh and processed fruits and vegetables. These programs use official grade standards which reflect the relative quality of a particular food commodity based on laboratory testing and characteristics such as taste, color, weight and physical condition. Producers voluntarily request grading and certification services which are provided on a fee for service basis.

Note.—The administration fund totals are comprised of 40 separate independent order accounts in 1989. The Marketing Service fund totals are comprised of 40 separate independent order accounts in 1989.

The Secretary of Agriculture is authorized by the Agricultural Marketing Agreement Act of 1937, as amended—under certain conditions—to issue Federal milk marketing orders establishing minimum prices which handlers are required to pay for milk purchased from producers.

Market administrators are appointed by the Secretary and are responsible for carrying out the terms of specific marketing orders. Their operating expenses, partly financed by assessments on regulated handlers and partly by deductions from producers, are reported in these schedules. These funds are collected locally, deposited in local banks, and disbursed directly by the market administrator.

The expenses of each local office are met from an administrative fund and a marketing service fund, which are prescribed in each order. The administrative fund is derived from prorated handler assessments. The marketing service fund of the individual order disseminates market information to producers who are not members of a qualified cooperative. It also provides for the verification of the weights, sampling, and testing of milk from these producers. The cost of these services is borne by such producers.

The maximum rates for administrative assessment and for marketing services are set forth in each order and adjustments below these rates are made from time to time upon recommendations by the market administrator and upon approval of the Agricultural Marketing Service to provide reserves at about a 6-month operating level. Upon termination of any order, the statute provides for distributing the proceeds from net assets pro rata to contributing handlers or producers as the case may be.

The Omnibus Budget Reconciliation Act of 1987 required that the Commodity Credit Corporation assess 2.5 cents per hundredweight during the applicable months on all milk produced in the forty-eight contiguous States and marketed by producers for commercial use. As of the end of the program in December 1988, the Agricultural Marketing Service, as agent for the Commodity Credit Corporation, had collected over $35.3 million. These funds were used to offset mandated cuts in dairy price support expenditures rather than through reductions in the purchase prices for cheese, butter, and nonfat dry milk.

The major objectives of the Food Safety and Inspection Service are to ensure that meat and poultry products are wholesome, unadulterated, and properly labeled and packaged, as required by the Federal Meat Inspection Act and the Poultry Products Inspection Act.

The Meat and Poultry Inspection program of the Food Safety and Inspection Service provides inplant inspection of all domestic plants preparing meat or poultry products for sale or distribution; reviews foreign inspection systems and establishments that prepare meat or poultry products for export to the United States; and provides technical and financial assistance to States which maintain meat and poultry inspection programs.

Under authority of the Agricultural Marketing Act of 1946, Federal meat and poultry inspection services are provided upon request and for a fee in cases where inspection is not mandated by statute. This service includes: certifying products for export beyond the requirements of export certificates; inspecting certain animals and poultry intended for human food where inspection is not required by statute, such as buffalo, rabbit, and quail; and inspecting products intended for animal consumption.

Legislation will be proposed to increase incomes of food stamp households through expanded child support enforcement activities. Higher incomes reduce needed benefits. Legislation will also be proposed to constrain employment and training expenditures for those States that exceed the 100 percent Federal funding cap.

Special Milk Program

For necessary expenses to carry out the special milk program, as authorized by section 3 of the Child Nutrition Act of 1966 (42 U.S.C. 1772), [$20,449,000] *$19,268,000*, to remain available through September 30, [1991] *1992*. Only final reimbursement claims for milk submitted to State agencies within sixty days following the month for which the reimbursement is claimed shall be eligible for reimbursement from funds appropriated under this Act. States may receive program funds appropriated under this Act only if the final program operations report for such month is submitted to the Department within ninety days following that month. Exceptions to these claims or reports submission requirements may be made at the discretion of the Secretary. *(Rural Development, Agriculture, and Related Agencies Appropriations Act, 1990.)*

The state child nutrition payments provide cash and commodity meal subsidies through the school lunch, school breakfast, summer food service and child and adult care food programs. Federal funds are also made available for nutrition education, studies, and State administrative expenses.

The poverty guidelines that determine program eligibility are updated annually and published in the Federal Register. Guidelines vary by family size. For school year 1989–1990, 100 percent of the poverty income guideline for a family of four is $12,100 for all States except Alaska and Hawaii.

Proposed legislation would better target subsidies by providing rate comparability for family day care homes and child care centers, and modifying the school lunch program by (1) increasing per meal subsidies by 20 cents for meals served to students with family incomes between 130 and 185 percent of poverty, and (2) discontinuing cash and commodity subsidies for meals served to students with household incomes above 350 percent of poverty. All students, regardless of income, will continue to benefit from bonus commodities.

The goal of this program is to ensure the integrity of the livestock, meat, and poultry markets and the marketplace in order to protect producers against unfair, deceptive, or discriminatory practices as well as those that are predatory or monopolistic in nature. Consumers and members of the livestock, poultry, and meat industries are also protected against unfair business practices in the marketing of livestock, meat and poultry, and from restrictions on competition which could unduly affect prices. The Agency also carries out the Secretary's responsibilities under Section 1324 of the Food Security Act of 1985 covering "central filing systems" established by States for pre-notification of security interests against farm products.

The Agricultural Cooperative Service provides the Secretary with research relating to farmer cooperatives. The agency provides cooperatives with research studies on economic, financial, organizational, managerial, legal, social, and policy related issues that affect cooperatives. Data on membership, business volume, and financial condition are collected to detect changes in the structure, operation, and growth trends of cooperatives.

The 156 National Forests, 19 National Grasslands, and 18 land utilization projects located in 44 States, Puerto Rico and the Virgin Islands are managed under multiple use and sustained yield principles. The natural resources of timber, minerals, range, wildlife, outdoor recreation, watershed, and soil are utilized in a planned combination that will best meet the needs of the Nation, without impairing productivity of the land or damaging the environment. These management and utilization principles are recognized in the Multiple-Use Sustained-Yield Act of June 12, 1960 (16 U.S.C. 528–531).

Land and resource protection.—Provides for the protection and/or maintenance of National Forest System users, resources, lands and facilities, including roads and trails.

Renewable resource management and utilization.—Provides for the management and utilization of the timber, mineral, range, recreation, wildlife, fisheries, watershed, and soil resources on National Forest System lands.

General administration.—This activity provides line managerial and administrative support to programs financed from National forest system, Construction, Forest research, State and private forestry, Firefighting, and Land acquisition appropriations.

General and special funds—Continued

CONSTRUCTION—Continued

Construction of facilities—

Recreation facilities.—Provides facilities necessary to safely meet recreation demand while protecting environmental values and other resource uses of the National Forests.

Other facilities.—Provides for construction and acquisition of fire, administrative, and other improvements and related facilities necessary to carry out National Forest and State and private forestry programs. Includes fire lookouts, offices, dwellings and barracks for employee housing, service, and storage buildings, insectories, tree nursery buildings, dams, and other forest resource management projects. Efforts to make buildings more energy efficient (retrofit) will be continued.

Research construction.—Provides for construction, alteration, and improvement of research laboratories and related facilities, and for procurement and installation of necessary initial equipment needed to put the facility into operating condition. Efforts to make research facilities more energy efficient (retrofit) will be continued.

Road and trail construction—

Road and trail construction.—Roads and trails are essential to the protection and management of the National Forest System, as well as providing access to National Forest System areas for recreation and utilization of their resources. Of the revenues received annually from National Forest activities, 10 percent is being transferred to the General Fund with a comparable amount appropriated to the construction program for road and trail construction activities.

Timber purchaser construction.—Roads may be constructed and/or reconstructed by a timber purchaser who in turn receives credit against timber value as a reimbursement. These roads are those required within a timber sale area specifically for the removal of the timber, but which will remain on the National Forest development road system for resource management purposes after the timber sale contract is completed. (16 U.S.C. 535, 1608.)

Research is conducted and disseminated through eight regional forest experiment stations and the Forest Products Laboratory and includes both in-house and extramural programs.

Timber management research.—Research is conducted to develop improved silvicultural alternatives and management guidelines to increase the productivity and multiple-use benefits of forest lands, maximize tree growth and quality, and maintain land productivity.

Forest products and harvesting research.—Research is conducted to provide technology to harvest and utilize timber more efficiently and in ways that are environmentally acceptable, to improve the performance of wood products, and to expand opportunities for wood products exports.

Forest protection research.—Research is conducted to understand the impact of forest fires, atmospheric factors, insects, and diseases on forest and range ecosystems; to improve methods for preventing, predicting, controlling, and reducing the effects of wildfire, insects, and diseases, and for using fire for resource management; and to acquire basic knowledge to monitor and predict atmospheric effects on forests.

Resource analysis research.—Research is conducted to provide inventory information on forest resources; to determine the effects of economic and institutional forces on forest product markets and forest management strategies; and to improve methods of managing outdoor recreation and wilderness.

Forest environment research.—Research is conducted to provide knowledge needed to manage forests and range nontimber resources; including wildlife and fish habitats, watersheds, and forage.

For 1991, forest research will focus on basic research thus allowing the private sector to concentrate on developmental and applied research.

Fire Management and Presuppression.—Provides on a discretionary basis for management, program planning, and presuppression costs for the Forest Service's fire program. The program management subactivity includes all permanent, full-time staff; automatic detection and other systems; communications; and fire prevention, training and interagency coordination. Presuppression includes activities associated with preparing for the annual fire season (e.g., hiring seasonal firefighters and purchasing equipment), and with reducing hazardous conditions (including costs of eliminating unnatural or hazardous levels of accumulated fuel, either by controlled fire or other means).

Emergency Operations.—Provides on a mandatory basis for the emergency and unpredictable aspects of the Forest Service's firefighting programs: wildfire suppression and emergency rehabilitation. Suppression includes the costs of emergency suppression of wildfires or for escalated presuppression funding based on abnormally extreme fire potential, and of monitoring natural fires permitted to burn within preestablished fire prescription criteria. Rehabilitation includes the costs incurred to prevent land degradation, resource losses, and other situations caused by damage by fire (e.g., reseeding, felling damaged trees).

The Budget Reconciliation Act, Public Law 100-203, established a special receipt account to be made available for resource protection, research, interpretation, and maintenance activities related to resource protection in recreation areas. The funds transferred to this account, after the States receive their share, are available for appropriation the following fiscal year.

Proposed legislation will increase receipts by designating those areas currently not designated for fee purposes.

The Working Capital Fund is a self-sustaining revolving fund that provides services to National Forests, research experiment stations, and when necessary, to other Federal agencies, and as provided by law, to State and private agencies and persons who cooperate with the Forest Service in fire control and other authorized programs.

The forestry related supply and support services include:

Equipment Services.—The fund owns, operates, maintains, replaces, and repairs common use motor driven and similar equipment. This equipment is rented to administrative units, that is, National Forests, research experiment stations, and other units, and in some cases to the other agencies, at rates which recover the cost of operation, repair and maintenance, management, and depreciation. The rates also include an increment which provides additional cash which, when added to depreciation earnings and the residual value of equipment, provides sufficient funds to replace the equipment.

Aircraft Services.—The fund operates, maintains, and repairs Forest Service owned aircraft used in fire surveillance and suppression and in other Forest Service programs. The aircraft are rented to National Forests, research experiment stations, and in some cases to other agencies, at rates which recover the cost of depreciation, operation, maintenance, repair, and improvements in the airworthiness of the aircraft. Aircraft replacement costs are financed from either appropriated funds or the Forest Service Working Capital Fund, or a combination of both.

Supply Services.—The fund operates the following common services:

Photo reproduction laboratories that store, reproduce, and supply aerial photographs, aerial maps, and other photographs of National Forest lands. The photographic reproductions are sold to National Forests, experiment stations, and others at cost.

Sign shops that manufacture and supply special signs for the National Forests for use in regulating traffic and as information to the public and other users of the National Forests. The signs are sold to National Forests and experiment stations at cost.

Subsistence services that prepare and serve meals to Forest Service crews working in areas where adequate public restaurant facilities are not available.

Seed supply services that provides tree seed for direct seeding or sowing in nurseries for the production of trees. Includes purchase or collection of cones, extraction of seeds, cleaning and testing, and storage and delivery. Operates in conjunction with tree nurseries.

Tree nurseries that operate forest tree nurseries and cold storage facilities for storage of tree seedlings. Tree seedlings are sold to National Forests, State foresters, and other cooperators at cost.

Authority for Mount St. Helens National Monument was made available by the Department of the Interior and Related Agencies Appropriations Act, 1987, as included in Public Laws 99-500 and 99-591. An additional amount was appropriated in the Department of the Interior and Related Agencies Appropriations Act, 1989 as included in Public Law 100-446.

ADMINISTRATIVE PROVISIONS, FOREST SERVICE

Appropriations to the Forest Service for the current fiscal year shall be available for: (a) purchase of not to exceed [185] *202* passenger motor vehicles of which [11] *27* will be used primarily for law enforcement purposes and of which [169] *170* shall be for replacement only, of which acquisition of [132] *144* passenger motor vehicles shall be from excess sources, and hire of such vehicles; operation and maintenance of aircraft, the purchase of not to exceed two for replacement only, and acquisition of [43] *97* aircraft from excess sources; notwithstanding other provisions of law, existing aircraft being replaced may be sold, with proceeds derived or trade-in value used to offset the purchase price for the replacement aircraft; (b) services pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $100,000 for employment under 5 U.S.C. 3109; (c) uniform allowances for each uniformed employee of the Forest Service, not in excess of $400 annually; (d) purchase, erection, and alteration of buildings and other public improvements (7 U.S.C. 2250); (e) acquisition of land, waters, and interests therein, pursuant to the Act of August 3, 1956 (7 U.S.C. 428a); (f) for expenses pursuant to the Volunteers in the National Forest Act of 1972 (16 U.S.C. 558a, 558d, 558a note); and (g) for debt collection contracts in accordance with 31 U.S.C. 3718(c).

[None of the funds made available under this Act shall be obligated or expended to change the boundaries of any region, to abolish any region, to move or close any regional office for research, State and private forestry, or National Forest System administration of the Forest Service, Department of Agriculture, without the consent of the House and Senate Committees on Appropriations and the Committee on Agriculture, Nutrition, and Forestry in the United States Senate and the Committee on Agriculture in the United States House of Representatives.]

Any appropriations or funds available to the Forest Service may be *advanced to the Forest Service Firefighting appropriation and may be* used for forest firefighting and the emergency rehabilitation of burned-over lands under its jurisdiction.

[The appropriation structure for the Forest Service may not be altered without advance approval of the House and Senate Committees on Appropriations.]

Notwithstanding any other provision of law, any appropriations or funds available to the Forest Service may be used to reimburse employees for the cost of State licenses and certification fees pursuant to their Forest Service position and that are necessary to comply with State laws, regulations, and requirements.

Funds appropriated to the Forest Service shall be available for assistance to or through the Agency for International Development and the Office of International Cooperation and Development in connection with forest and rangeland research, technical information, and assistance in foreign countries, and shall be available to support forestry and related natural resource activities outside the United States and its territories and possessions, including technical assistance, education and training, and cooperation with United States and international organizations.

[Funds previously appropriated] *All funds received* for timber salvage sales may be [recovered from receipts deposited for use by the applicable national forest and] credited to the Forest Service Permanent Appropriations to be expended for timber salvage sales from any national forest, and for timber sales preparation to replace sales lost to fire or other causes, and sales preparation to replace sales inventory on the shelf for any national forest to a level sufficient to maintain new sales availability equal to a rolling five-year average of the total sales offerings, and for design, engineering, and supervision of construction of roads lost to fire or other causes associated with the timber sales programs described above: *Provided*, That notwithstanding any other provision of law, moneys received from the timber salvage sales program in fiscal year [1990] *1991* shall be considered as money received for purposes of computing and distributing 25 per centum payments to local governments under 16 U.S.C. 500, as amended[*: Provided further*, That amounts necessary shall be available from deposits into the salvage sale fund for salvage of timber damaged by Hurricane Hugo to the maximum extent possible without regard to the geographic origin of the funds].

[None of the funds made available to the Forest Service under this Act shall be subject to transfer under the provisions of section 702(b) of the Department of Agriculture Organic Act of 1944 (7 U.S.C. 2257) or 7 U.S.C. 147b unless the proposed transfer is approved in advance by the House and Senate Committees on Appropriations in compliance with the reprogramming procedures contained in House Report 99-714.]

No funds appropriated to the Forest Service shall be transferred to the Working Capital Fund of the Department of Agriculture without the approval of the Chief of the Forest Service.

Notwithstanding any other provision of law, any appropriations or funds available to the Forest Service may be used to provide nonmonetary awards of nominal value to private individuals and organizations that make contributions to Forest Service programs.

[Funds available to the Forest Service shall be available to conduct a program of not less than $1,000,000 for high priority projects within the scope of the approved budget which shall be carried out by the Youth Conservation Corps as if authorized by the Act of August 13, 1970, as amended by Public Law 93-408.]

Notwithstanding the provisions of the Federal Grant and Cooperative Agreements Act of 1977 (31 U.S.C. 6301-6308), the Forest Service is authorized to negotiate and enter into cooperative arrangements with public and private agencies, organizations, institutions, and individuals to continue the Challenge Cost-Share Program.

[None of the funds made available to the Forest Service in this Act shall be expended for the purpose of issuing a special use authorization permitting land use and occupancy and surface disturbing activities for any project to be constructed on Lewis Fork Creek in Madera County, California, at the site above, and adjacent to, Corlieu Falls bordering the Lewis Fork Creek National Recreation Trail until the studies required in Public Law 100-202 have been submitted to the Congress: *Provided*, That any special use authorization shall not be executed prior to the expiration of thirty calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain) from the receipt of the required studies by the Speaker of the House of Representatives and the President of the Senate.]

[Notwithstanding any other provision of law, the Secretary of the Treasury is directed to make available to the Secretary of Agriculture, to remain available until expended, all National Forest Fund timber receipts received by the Treasury during fiscal year 1989 from the harvesting of National Forest Timber in excess of $920,000,000, the 1989 National Forest Fund timber receipts contained in the President's Budget proposal for fiscal year 1990: *Provided*, That such excess amount made available for the overall purposes of this section shall not exceed $65,000,000: *Provided further*, That an additional $32,000,000 shall not be subject to the per centum allocations of subsequent provisions of this section and shall be made separately available solely for implementation of the timber sales program included in this Act as described in the accompanying statement of the managers and shall be used solely for the necessary expenses of such timber sales program including, but not limited to, timber sales administration and management (including all timber support costs) and construction and design of roads: *Provided further*, That the $32,000,000 shall only be provided after all other sources of funds, appropriated and nonappropriated, have been utilized to the fullest extent possible: *Provided further*, That this estimate of 1989 receipts shall not be adjusted for the purposes of this section: *Provided further*, That such funds shall be made available during fiscal year 1990, and shall be in addition to any funds appropriated in this Act: *Provided further*, That this transaction will be made without reductions for the payments to be made in accordance with the provisions of the Act of May 23, 1908, as amended (16 U.S.C. 500) or the Act of July 10, 1930 (16 U.S.C. 577g): *Provided further*, That funds made available to the Secretary of Agriculture pursuant to this provision shall be used for the necessary expenses, including support costs of the National Forest System programs as follows: 6 per centum for National Forest trail maintenance; 4 per centum for National Forest trail construction; 20 per centum for wildlife and fish habitat management; 20 per centum for soil, water, and air management; 5 per centum for cultural resource management; 5 per centum for wilderness management; 10 per centum for reforestation and timber stand improvement; and 30 per centum for timber sales administration and management, including all timber support costs, for advanced preparation work for fiscal year 1991 and fiscal year 1992 timber sale offerings: *Provided further*, That not later than 30 days after the submission of the President's fiscal year 1991 budget, the Chief of the Forest Service shall provide a report to the House and Senate Committees on Appropriations on the final amount and distribution of funds made available under this section and shall include an assessment of National Forest resource outputs to be produced in fiscal year 1990, fiscal year 1991, and subsequent years, using funds made available under this section, and a comparison of the outputs achieved in fiscal year 1990 and proposed for fiscal year 1991, with the output levels for the program areas listed described in the Forest Service resource management plans in effect at the time of the report required by this section.]

Any money collected from the States for fire suppression assistance rendered by the Forest Service on non-Federal lands not in the vicinity of National Forest System lands shall be used to reimburse the applicable appropriation and shall remain available until expended as the Secretary may direct in conducting activities authorized by 16 U.S.C. 2101 (note), 2101–2110, 1606, and 2111.

Of the funds available to the Forest Service, [$1,500] *$2,500* is available to the Chief of the Forest Service for official reception and representation expenses.

[Notwithstanding section 705(a) of the Alaska National Interest Lands Conservation Act (16 U.S.C. 539d(a)), $52,441,000 shall be available for timber supply, protection and management, research, resource protection, and construction on the Tongass National Forest in fiscal year 1990: *Provided*, That all of the funds available from the Tongass Timber Supply Fund in fiscal year 1990 pursuant to section 705(a) of Public Law 96–487 shall be deemed obligated as of October 1, 1989 and shall remain available until expended: *Provided further*, That this funding limitation shall not include those funds available to the Forest Service as National Forest System (except for timber sales administration and management funds), Trust Funds, Permanent Funds (other than the Tongass Timber Supply Fund), Timber Receipts, or Purchaser Road Construction.]

[Notwithstanding any other provision of law, the Forest Service is directed to compensate Davis Sheep Company, Monteview, Idaho, for reasonable expenses incurred as a result of mortality of permitted animals and moving permitted animals from one location to another as directed by the Forest Service: *Provided*, That in no event should expenses be less than $85,0[illegible] *Provided further*, That up to an additional $27,500 is authorized if the Forest Service, in conjunction with Davis Sheep Company, determines additional losses were incurred: *Provided further*, That no funds provided in this title may be expended by the Forest Service to implement a new fee schedule or increase the fees charged for communication site use of lands administered by the Forest Service above the levels in effect on January 1, 1989.] *(Department of the Interior and Related Agencies Appropriations Act, 1990.)*

Sec. 641 ...... Requirement that the Department submit a financial report, within a specified time period, on the procurement of advisory and assistance services to Congress, copied to the Comptroller General of the United States.

Sec. 601. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive Order issued pursuant to existing law.

Sec. 602. Within the unit limit of cost fixed by law, appropriations and authorizations made for the Department of Agriculture for the fiscal year [1990] *1991* under this Act shall be available for the purchase, in addition to those specifically provided for, of not to exceed [514] *612* passenger motor vehicles, of which [508] *607* shall be for replacement only, and for the hire of such vehicles.

Sec. 603. Funds in this Act available to the Department of Agriculture shall be available for uniforms or allowances therefore as authorized by law (5 U.S.C. 5901–5902).

Sec. 604. Not less than $1,500,000 of the appropriations of the Department of Agriculture in this Act for research and service work authorized by the Acts of August 14, 1946 and July 28, 1954, and (7 U.S.C. 427, 1621–1629), and by chapter 63 of title 31, United States Code, shall be available for contracting in accordance with said Acts and chapter.

Sec. 605. No part of the funds contained in this Act may be used to make production or other payments to a person, persons, or corporations upon a final finding by court of competent jurisdiction that such party is guilty of growing, cultivating, harvesting, processing or storing marijuana, or other such prohibited drug-producing plants on any part of lands owned or controlled by such persons or corporations.

Sec. 606. Advances of money to chiefs of field parties from any appropriation in this Act for the Department of Agriculture may be made by authority of the Secretary of Agriculture.

Sec. 607. The cumulative total of transfers to the Working Capital Fund for the purpose of accumulating growth capital for data services and National Finance Center operations shall not exceed $2,000,000: *Provided*, That no funds in this Act appropriated to an agency of the Department shall be transferred to the Working Capital Fund without the approval of the agency administrator.

Sec. 608. New obligational authority provided for the following appropriation items in this Act shall remain available until expended: Public Law 480; [Mutual and Self-Help Housing;] Watershed and Flood Prevention Operations; Resource Conservation and Development; Colorado River Basin Salinity Control Program; Animal and Plant Health Inspection Service, *buildings and facilities, and* $4,500,000 for the contingency fund to meet emergency conditions [, $5,000,000 for the Grasshopper and Mormon Cricket Control Programs, and buildings and facilities]; Agricultural Stabilization and Conservation Service, salaries and expenses funds made available to county committees; the Federal Crop Insurance Corporation Fund; Agricultural Research Service, buildings and facilities[, and up to $10,000,000 of funds made available for construction at the Beltsville Agricultural Research Center; Cooperative State Research Service, buildings and facilities; Scientific Activities Overseas (Foreign Currency Program); Dairy Indemnity Program; $2,852,000]*; $4,000,000* for higher education training grants under section 1417(a)(3)(B) of Public Law 95–113,- as amended (7 U.S.C. 3152(a)(3)(B)); *$11,000,000 for a program of capacity building grants to colleges eligible to receive funds under the Act of August 30, 1890, including Tuskegee University;* and buildings and facilities, Food and Drug Administration.

Sec. 609. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

Sec. 610. Not to exceed $50,000 of the appropriation available to the Department of Agriculture in this Act shall be available to provide appropriate orientation and language training pursuant to Public Law 94–449.

Sec. 611. Notwithstanding any other provision of law, employees of the agencies of the Department of Agriculture, including employees of the Agricultural Stabilization and Conservation county committees, may be utilized to provide part-time and intermittent assistance to other agencies of the Department, without reimbursement, during periods when they are not otherwise fully utilized, and ceilings on full-time equivalent staff years established for or by the Department of Agriculture shall exclude overtime as well as staff years expended as a result of carrying out programs associated with natural disasters, such as forest fires, droughts, floods, and other acts of God.

Sec. [616] *612*. No funds appropriated by this Act may be used to pay negotiated indirect cost rates on cooperative agreements or similar arrangements between the United States Department of Agriculture and nonprofit institutions in excess of 10 per centum of the total direct cost of the agreement when the purpose of such cooperative arrangements is to carry out programs of mutual interest between the two parties. This does not preclude appropriate payment of indirect costs on grants and contracts with such institutions when such indirect costs are computed on a similar basis for all agencies for which appropriations are provided in this Act.

Sec. [618] *613*. None of the funds in this Act shall be used to prevent or interfere with the right and obligation of the Commodity Credit Corporation to sell surplus agricultural commodities in world trade at competitive prices as authorized by law.

Sec. [619] *614*. Notwithstanding any other provision of this Act, commodities acquired by the Department in connection with Commodity Credit Corporation and section 32 price support operations may be used, as authorized by law (15 U.S.C. 714c and 7 U.S.C. 612c), to provide commodities to individuals in cases of hardship as determined by the Secretary of Agriculture.

Sec. [621] *615*. None of the funds in this Act shall be available to reimburse the General Services Administration for payment of space rental and related costs in excess of the amounts specified in this Act; nor shall this or any other provision of law require a reduction in the level of rental space or services below that of fiscal year [1989] *1990* or prohibit an expansion of rental space or services with the use of funds otherwise appropriated in this Act. Further, no agency of the Department of Agriculture, from funds otherwise available, shall reimburse the General Services Administration for payment of space rental and related costs provided to such agency at a percentage rate which is greater than is available in the case of funds appropriated in this Act.

Sec. [623] *616*. Funds provided by this Act may be used for translation of publications of the Department of Agriculture into foreign languages when determined by the Secretary to be in the public interest.

Sec. [625] *617*. Provisions of law prohibiting or restricting personal services contracts shall not apply to veterinarians employed by the Department to take animal blood samples, test and vaccinate animals, and perform branding and tagging activities on a fee-for-service basis.

Sec. [627] *618*. Funds provided in this Act may be used for one-year contracts which are to be performed in two fiscal years so long as the total amount for such contracts is obligated in the year for which the funds are appropriated.

Sec. [628] *619*. Funds appropriated by this Act shall be applied only to the objects for which appropriations were made except as otherwise provided by law, as required by 31 U.S.C. 1301.

Sec. [629] *620*. None of the funds in this Act shall be available to restrict the authority of the Commodity Credit Corporation to lease space for its own use or to lease space on behalf of other agencies of the Department of Agriculture when such space will be jointly occupied. *(Rural Development, Agriculture, and Related Agencies Appropriations Act, 1990.)*

This appropriation provides agency-wide audit and investigative functions to identify and recommend corrections for management and administrative deficiencies which create conditions for existing or potential instances of fraud, waste and mismanagement. The audits function provides internal audit, contract audit, and inspections services. Contract audits provide professional advice to agency contracting officials on accounting and financial matters relative to negotiation, award, administration, repricing, and settlement of contracts. Internal audits review and evaluate all facets of agency operations.

General and special funds—Continued

OFFICE OF THE INSPECTOR GENERAL—Continued

Inspections services provide detailed technical evaluations of agency operations. The investigative function provides for the detection and investigation of improper and illegal activities involving programs, personnel, and operations.

ECONOMIC DEVELOPMENT ADMINISTRATION

Federal Funds

General and special funds:

[Salaries and Expenses] *Grants and Loans Administration*

[For necessary expenses of administering the economic development assistance programs as provided for by law, $25,475,000 of which not to exceed $494,000 shall be available for the Office of Chief Counsel: *Provided*, That these funds may be used to monitor projects approved pursuant to title I of the Public Works Employment Act of 1976, as amended, title II of the Trade Act of 1974, as amended, and the Community Emergency Drought Relief Act of 1977: *Provided further*, That notwithstanding any other provision of law, not to exceed $4,016,618 of the funds appropriated by this Act for "Economic Development Assistance Programs" shall be available for the purpose of paying the Economic Development Administration for any debt that arises due to the expenditure of funds under grant number 06–19–01498 as described in Inspector General Final Audit Report No. D-184-8-024 and that none of the funds appropriated by this Act shall delay or otherwise adversely affect any grant application for fiscal year 1990 by the City of Chicago as a result of negotiations on the grant described in such audit report: *Provided further*, That none of the funds appropriated by this Act shall be available to enable the Economic Development Administration, Department of Commerce, to delay or otherwise adversely affect any grant application for fiscal year 1990 by the State of Oregon, or to which the State of Oregon will contribute funds, on the basis that the contribution by the State of Oregon does not conform with law or regulation. Notwithstanding any other provision of this Act or any other law, funds appropriated in this paragraph shall be used to fill and maintain forty-nine permanent positions designated as Economic Development Representatives out of the total number of permanent positions funded in the Salaries and Expenses account of the Economic Development Administration for fiscal year 1990, and such positions shall be maintained in the various States within the approved organizational structure in place on December 1, 1987, and where possible, with those employees who filled those positions on that date: *Provided further*, That none of the funds may be used to formulate or implement any action, activity, guideline, program, project, policy or regulation which alters the practice of making grants directly to planning and development districts which was in effect on December 31, 1988, or which results in denial of funding to any planning and development district on the basis of the number of years such district has received economic development assistance program funding or on the basis of the geographic area such district encompasses or on the basis of the population situated in the geographic area such district encompasses or a combination of any of these factors.] *For necessary expenses of administering outstanding grants, loans, and loan guarantees for discontinued programs assigned to the Secretary of Commerce, $20,000,000. (42 U.S.C. 3218, 3219, 5184, and 6701(c); Department of Commerce Appropriations Act, 1990.)*

The activities of this appropriation provide for the collection, compilation, and publication of a broad range of current statistics dealing with economic, demographic, and social data.

Current economic statistics programs—

Business statistics.—This program provides current information on sales and related measures of retail and wholesale trade and selected service industries. The 1991 increase will improve the methods of reducing non-sampling problems in the Advanced Retail Sales Survey, and expand the collection of corporate financial data, as well as collect annual detail for additional service industries. In addition, the increase will improve the measurement of services purchased by industry and small company financial data and will allow the Census Bureau to identify and publish new data for specific growth industries and to assign a unique industrial classification to these emerging industries.

Construction statistics.—Reports are provided on significant construction activity such as housing permits and starts, value of new construction, residential alterations and repairs, and quarterly price indexes for new, single-family houses. The 1991 initiative will improve the monthly series on housing starts, and develop a set of price indexes for nonresidential buildings.

Manufacturing statistics.—Surveys of key industrial commodities and manufacturing activity provide current statistics on the quantity and value of industry output. The 1991 increase will improve the quantity and quality of responses to the Manufacturers' Shipments Inventories and Orders (M3) Survey. It will also provide an annual investment survey to collect new and anticipated investment data from all business sectors at the national level. It will complement Census' responsibility to collect actual data on investments and investment plans.

General economic statistics.—This subactivity provides a Standard Statistical Establishment List (SSEL) of all U.S. business firms and their establishments, uniform classification data, annual county business data, and corporate financial data. The 1991 initiative will provide for Standard Industrial Classification research, and will fund additional data source activities in the National Trade Data Bank.

Foreign trade statistics.—Monthly, cumulative, and annual reports are published on the quantity, shipping weight, and dollar value of imports and exports, by mode of transportation, detailed commodity category, customs district, and country of origin or destination. Commodity classifications are being improved for comparability and other activities in support of the Trade Act of 1974. The 1991 enhancement will enhance the quality of foreign trade statistics through educational efforts and follow-up programs.

Government statistics.—Reports are published annually regarding the revenue, expenditures, indebtedness and debt transactions, financial assets, employment, and payrolls of State and local governments. Quarterly information on State and local tax revenue is furnished on the national level by type of tax and governmental level, and information is provided on financial assistance programs of the Federal Government.

Agriculture statistics.—Information on cotton ginnings and production is compiled and published. Assistance is provided on using the information from the census of agriculture.

Current demographic statistics programs—

Demographic surveys.—This program provides information on the number, the geographic distribution and the social and economic characteristics of the population. The 1991 budget reflects the phase-down of the introduction of computer-assisted telephone interviewing to the current population survey. The 1991 enhancement will modernize the Current Population Survey (CPS) processing system, and will begin the restoration of the SIPP sample by introducing a new panel of 14,000 households.

Demographic reports.—This program provides current reports on the geographic distribution and on the demographic, social, and economic characteristics of the population, as well as current estimates and future projections of the population of the United States. The program also provides special analyses of demographic, social, and economic trends. The 1991 increase provides for a review of the metropolitan statistical area concepts.

International statistics.—This program provides estimates of population, labor force, and economic activity, including spatial distribution, and analyses concerning aspects of demographic policies, economic policies, and trends for various countries.

Housing statistics.—This program compiles statistics on the Nation's housing inventory and provides national and regional estimates of housing vacancy rates.

Other programs and publications—

Statistical abstract and supplements.—The *Statistical Abstract,* prepared annually, summarizes Government and private statistics of the industrial, social, political, and economic activities of the United States.

General research.—Research is conducted on survey methods and techniques to find ways of improving the efficiency, accuracy, and timeliness of statistical programs.

Data systems development.—This program provides advanced data capture, data processing, and information retrieval technology to meet Bureau program requirements.

Reimbursable program.—The Bureau of the Census undertakes work for other governmental agencies when it is more appropriate or efficient to have the work performed by the Bureau. Significant work includes collection of labor force and consumer expenditure data for the Bureau of Labor Statistics, national health and education program data for the Department of Education and the Department of Health and Human Services, and annual housing data for the Department of Housing and Urban Development.

This appropriation funds legislatively mandated censuses of economic and demographic areas once or twice each decade and other authorized periodic activities.

Economic statistics programs—

Economic censuses.—The economic censuses provide data on manufactures, mineral industries, retail and wholesale trade and service industries, construction, and transportation. The censuses are taken every fifth year, covering calendar years ending in two and seven.

FY 1991 is the second year in the six year cycle of the 1991 Economic Censuses. Planning and preparatory activities will establish the scope, coverage, content and methodologies that will be employed in the collection, processing, and publication of the censuses.

Census of governments.—This census collects State and local government data on taxes, tax valuations, governmental receipts, expenditures, indebtedness, and number of employees. This census is taken every fifth year for calendar years ending in two and seven.

The FY 1991 budget provides for planning of the content, collection, and processing of data for the government finance, public employment, governmental organization and taxable property value phases of the Census of Governments.

Census of agriculture.—This census covers the agricultural sector of the economy and includes the census of irrigation.

FY 1991 is the second year in the six year cycle of the 1991 Census of Agriculture. Funds provide for activities which include evaluating, installing and testing of new processing equipment and procedures; developing the census mail list; and planning for the five year censuses of Puerto Rico, Guam, Northern Mariana Islands, and the Virgin Islands.

Demographic statistics programs—

Intercensal demographic estimates.—This program provides updated population and per capita income estimates for general purpose governmental units for use in the equitable allocation of funds by various Federal programs and for other purposes.

Decennial census.—In 1991, the Census Bureau will complete all data collection activities for the Nation's bicentennial census, provide the population counts for apportionment of the House of Representatives to the President by December 31, 1990, provide data for redistricting to the states by April 1, 1991, close most remaining temporary offices, and begin the release of data products.

Sample redesign.—This program provides for revisions to the statistical samples used for monthly, quarterly and annual surveys.

Geographic support.—This activity provides for the geographic requirements of the various periodic programs and involves accurate identification of both political and statistical areas, preparation of maps, and maintenance of geographic base files.

Data processing systems.—This program provides the resources necessary to improve the data processing installation of the Bureau of the Census.

Economic analysis.—The objective of this activity is to provide a clear picture of the state of the economy through the preparation, development, and interpretation of the economic accounts of the United States. The principal programs are:

National economic accounts.—The national income and product accounts, summarized by the gross national product (GNP), provide an up-to-date overall view of national production, its distribution, and its use as shown by the interrelated receipts and expenditures of producers, consumers, investors, government, and the foreign customers of the United States. In 1991, increases are provided to maintain the quality of the GNP estimates, to modernize and extend the U.S. national economic accounts and to implement improvements recommended by the Economic Policy Council Working Group on Economic Statistics.

Analysis of business trends.—This work includes econometric models of the U.S. economy, a system of business cycle indicators, and analyses of the economic situation.

International economic accounts.—The balance of payments accounts provide a comprehensive and detailed view of economic transactions between the United States and foreign countries. Work on international investment consists of the preparation, development, and analysis of estimates of U.S. direct investment abroad and foreign direct investment in the United States. In 1991, increases are provided to maintain the quality of the balance of payments estimates and to improve international investment data.

Regional economic accounts.—Regional economic measurement consists of the preparation, development, and analysis of economic accounts that show detail by region, State, metropolitan area, and county. Work on regional economic analysis consists of the preparation of analyses and projections of States and local areas.

Analysis of economic trends.—This work consists of the preparation, development, and analysis of econometric model forecasts and simulations and of a system of leading, coincident, and lagging business cycle indicators and related data that help to depict current and future economic activity.

Policy support.—The objective of this activity is to support the Secretary, Under Secretary for Economic Affairs, and other Government officials in interpreting the state of the economy, and on matters relating to economic policy. In 1990, the Office of Strategic Resources was transferred to the Technology Administration.

Productivity, technology, and innovation.—In 1990, this activity was transferred to the Technology Administration.

Japanese technical literature.—In 1990, this activity was transferred to the Technology Administration.

Reimbursable.—ESA provides economic and statistical data and analyses on a reimbursable and advance payment basis to other Federal agencies, individuals, and firms requesting such information. Funds received for these services cover the cost of performing this work. ESA is authorized to perform these services under 31 U.S.C. 1535, 1536 and 15 U.S.C. 1526.

The activities of the International Trade Administration in the Department of Commerce are intended to develop the export potential of U.S. firms in a manner consistent with national security and foreign and economic policy and to promote an improved trade posture for U.S. industry.

Trade development.—The trade development program assesses the competitiveness of various U.S. industries; performs trade and investment analyses in support of industry programs and trade policy; and conducts export promotion programs directed toward industry sectors. Trade Adjustment Assistance to firms is proposed for termination in 1991.

In 1991, an increase of 1 position and $130,000 is requested to integrate the International Economic Data System into the National Trade Data Bank. Also, a decrease of 5 positions and $314,000 reflects the projected completion of the General Agreement on Tariffs and Trade Uruguay Round negotiations in 1990.

International economic policy.—This program develops regional and multilateral economic policies; provides marketing services directly and through the Foreign Commercial Service which assist U.S. businesses in expanding exports; identifies long range trade and investment problems and develops remedial strategies.

In 1991, an increase of $100,000 is requested to address the challenges presented by the economic restructuring in Eastern Europe and the Soviet Union. Also, 154,000 is requested to improve outreach to small and medium-sized firms to take advantage of increased export opportunities generated by the 12-country European Community becoming a single integrated market.

Finally, a decrease of 10 positions and $541,000 reflects the projected completion of the General Agreement on Tariffs and Trade Uruguay Round negotiations in 1990.

Import Administration.—Import Administration investigates antidumping and countervailing duty cases to ensure compliance with applicable U.S. statutes and administers certain other statutory programs relating to imports and foreign trade zones.

In 1991, an increase of 15 positions and $900,000 is requested for Import Administration to support implementation of provisions of the 1988 Trade Act as they relate to Department of Commerce administration of the antidumping and countervailing duty laws.

Additionally, in 1991, an increase of 24 positions and $1,287,000 is requested to enable the timely processing of an increased antidumping/countervailing duty caseload. An increase of 4 positions and $160,000 is requested for the timely processing of Foreign Trade Zone applications.

Finally an increase of 6 positions and $484,000 will enable Import Administration to continue to safeguard the U.S. steel industry against unfair foreign trade prices either through negotiating, an international consensus on steel trade practices and enforcing voluntary restraint agreements or the processing of unfair trade cases. Also, a decrease of 1 position and $38,000 reflects the projected completion of the General Agreement on Tariffs and Trade (GATT) Uruguay Round negotiations in 1990.

U.S. and foreign commercial service.—The U.S. and foreign commercial service counsels U.S. businesses on exporting through 48 District Offices in the United States and overseas offices in 65 countries. The program's goals are to increase the number of U.S. firms that export and the number of foreign markets to which they export; to provide export market information; to promote and facilitate participation of U.S. firms in trade shows; and to encourage and sponsor additional involvement by private, State and local organizations.

Furthermore, in 1991, ITA will continue its counseling services to U.S. businesses through its automated Commercial Information Management System (CIMS) that will provide customized and proactive export assistance to U.S. businesses. ITA will continue to charge fees to businesses who wish to take advantage of this system. An increase of $850,000 is requested to adequately fund this system.

An increase of $850,000 is requested for physical security of overseas staff and 106 positions and $7,912,000 to increase staff overseas to assist U.S. businesses capitalize on expanded export opportunities for U.S. companies' goods and services.

Finally an increase of $570,000 is requested to reallocate existing positions at U.S. and foreign commercial service domestic offices.

Reimbursable program.—This account includes receipts for services rendered to other Federal agencies and receipts received on a cost recovery basis from private entities for trade events and export information services.

The activities of the Bureau of Export Administration are designed to enforce U.S. export trade laws consistent with national security, foreign policy, and short supply objectives. The program strives to achieve a balance between the interests of U.S. exporters, the U.S. economy and U.S. national security requirements.

Management and policy coordination.—The management and policy coordination program controls the development, analysis, coordination, and consolidation of policy initiatives and responses within the Bureau of Export Administration. A decrease of $642,000 is being proposed to partially offset budget increases proposed in other parts of the budget.

Export administration.—The Export Administration program assures that export activity is consistent with national security and foreign policy requirements. In 1991, we are proposing an increase of 10 positions and $410,000 to collocate field staff in existing Department of Commerce offices in Portland, Oregon and San Jose, California and to open a new field office in the Boston, Massachusetts/Nashua, New Hampshire area. We are also proposing an increase of 9 positions and $888,000 to address additional responsibilities related to the Commodity Control List, Cocom review and decontrol issues.

Export enforcement.—The export enforcement program detects and prevents the illegal distribution of controlled U.S. goods and technical data in violation of the export administration provisions of the U.S. Code. Responsibilities also include enforcement of prohibitions against participating in unsanctioned boycotts against countries friendly to the United States.

Industrial resource administration.—Ensures the availability of industrial resources for national defense under the authority of the Defense Production Act.

In 1991 an increase of 11 positions and $835,000 is being proposed to meet legislatively mandated requirements related to the review of offsets in defense trade, defense Memoranda of Understanding, and direct foreign investments in U.S. defense-related industries.

In its leadership role of developing private market opportunities and coordinating Federal minority business development programs, the Minority Business Development Agency (MBDA) assists minority citizens in becoming involved in American business. In 1991, MBDA's goals are designed to increase opportunities and encourage the creation and expansion of competitive minority businesses. MBDA will support greater business participation rates through cooperation with other Federal, State and local governments and private sector organizations in support of minority business development.

Enterprise Development.—Within this activity is MBDA's primary service delivery system—the Minority Business Development Centers (MBDC). The MBDC component is designed to coordinate, within approximately 90 Metropolitan Statistical Areas (MSA's), all resources available for business assistance to minorities, and to provide client firms with direct management and technical assistance. Increases are provided to improve the quality of services provided by the Minority Business Development Centers, fund an additional three Indian Business Development Centers and implement a rural services program.

Resource Development.—MBDA's private sector component assists minority firms in taking advantage of expanded market, capital, and management opportunities available through private corporations. Trade associations provide support to minority firms by facilitating access to information and services. Another component of the Resource Development activity is the public sector program. The Public Sector program coordinates all Federal activities regarding procurement and other goals for minority business assistance and works with local Minority Business Opportunity Committees. Increases are provided to develop a strong public/private partnership with Corporate America as well as other private and public entities and reestablish its State and local programs.

Advocacy, Research, and Information.—Within this activity, MBDA provides advocacy efforts, a research program, and information systems for formulating policy decisions and for reducing information barriers to improve the participation rate of minority-owned businesses in the U.S. economy. Increases are provided to establish a policy function within the agency and enhance research activities; increase advocacy activities and provide on-line business information to the Business Development Centers.

The FY 1991 budget proposes to fund USTTA from direct appropriations. However, the Administration will repropose a Travel Promotion Fee to be assessed on airlines and cruise ship carriers for transportation of passengers to the United States. The fee proposal reflects the Administration's attempt to recover the costs of USTTA's programs from those who benefit from USTTA's activities. The fee will offset Department of Commerce operations. The activities to be supported fall into two broad categories:

International tourism trade development.—These activities include planning, developing and executing tourism export promotion programs designed to stimulate U.S. export earnings through trade and tourism and to facilitate the entry of medium and small American travel businesses into the international market.

Executive direction.—These activities include policy guidance, executive management, and administrative support in the areas of fiscal planning, program implementation, management and evaluation.

National Ocean Service.—The National Ocean Service provides for the management of ocean and coastal resources, particularly in the 200-mile Exclusive Economic Zone; improvements in the quality, quantity, geographic distribution and timeliness of ocean observations; the conservation, rational use, and charting of the Nation's coastal regions; production of aeronautical and nautical charts; and geodetic surveys. Increases are proposed to continue the integrated NOAA program in coastal ocean science which will continue to improve the monitoring, prediction, and understanding of the environmental degradation of the coastal oceans, for marine sanctuaries, and for ocean services. Other program changes involve decreases for multipurpose cadastre surveys, the wetlands demonstration project, and the Tampa Bay mapping project. Legislation will be proposed to augment the Harbor Maintenance Trust Fund. Certain monies from the fund will be used to support marine-related programs.

National Marine Fisheries Service.—These programs provide for the management and conservation of the Nation's living marine resources and their environment, including marine mammals and endangered species. Increases are proposed in certain areas to meet statutory requirements and marine resource conservation and management objectives. Consistent with NOAA priorities, decreases are proposed in those areas not essential to meeting conservation and management objectives in fiscal year 1991.

Oceanic and atmospheric research.—These programs provide: the understanding and technique development necessary to improve NOAA services (weather warnings and forecasts, solar-terrestrial services, climate predictions, and marine services); and the understanding of environmental systems necessary for national policy formulation (e.g., acid rain) and the enhanced use of ocean resources (e.g., fisheries, minerals). A proposed increase for an integrated NOAA program in Earth System Science will continue NOAA's coordinated approach to conducting research to improve predictions of global climate change initiated in 1989. The NOAA program is part of the coordinated government-wide, Global Change program. An increase is proposed for research, forecasting and monitoring of solar cycle activity. Other program changes principally involve decreases in research activities which primarily support State, regional or private sector interests.

National Weather Service.—These programs provide timely and accurate meteorologic, hydrologic, and oceanographic warnings, forecasts, and planning information to ensure the safety of the population, mitigate property losses, and improve the economic efficiency of the Nation. Additional funding is proposed for acquisition of Doppler weather radars, the automated surface observing system (ASOS), and an information processing and distribution system. These acquisitions are part of a comprehensive program to modernize the National Weather Service. This modernization effort will enable the National Weather Service to provide improved weather forecasts and severe weather warnings through a nationwide network of 115 enhanced Weather Forecast Offices by 1995. Specialized weather services which can be conducted by the private sector will be reduced or eliminated. Proposed decreases in 1991 reflect improved efficiency in field office operations. In addition, legislation will be proposed to provide for the collection of modest receipts from the beneficiaries of National Weather Service products and services.

National Environmental Satellite, Data, and Information Service.—These programs provide for the: operation of environmental polar-orbiting and geostationary satellites; subsidy of a commercially operated Landsat system; and global environmental data and information products and services to users in commerce, industry, agriculture, science and engineering, the general public and Federal, State and local agencies. 1991 funding will support procurement of replacement satellites for the polar-orbiting and geostationary systems.

The Administration is committed to operating the Landsat 4 and 5 satellites as long as they function and completing the development and launch of Landsat 6. For 1991, funding is requested to cover the launch of Landsat 6. No funds are proposed for operation of Landsat 6 because these costs will be covered by the contractor, the Earth Observation Satellite Company. No funding is requested for the Landsat 4 and 5 system because the satellites are expected to cease operating in 1990.

The Administration is considering options for continuing Landsat-type data after Landsat 6. No funds are required in 1991 for additional satellites, consistent with the expected lifetime of Landsat 6. The National Space Council will conduct a review of the management and configuration of a follow-on system. The Administration will report to Congress on the outcome of this study expeditiously.

Program support.—These programs provide for overall NOAA management, NOAA's share of the Regional Administrative Support Centers, and the operational and logistics support of ships, marine centers, and aircraft to support NOAA missions. An increase is proposed to continue the consolidation of selected NOAA facilities in the Washington, D.C. Metropolitan area in Silver Spring, MD, to initiate the replacement of navigation systems on NOAA's two WP-30 hurricane reconnaissance aircraft, to support a NOAA-wide program for facilities maintenance, to increase aircraft maintenance and flight hours, to increase the NOAA fleet days at sea, and to begin a program of fleet rehabilitation and modernization.

Legislation will be proposed to augment the Harbor Maintenance Trust Fund. Funds are proposed to be appropriated from the Harbor Maintenance Trust Fund to the Marine Waterways Trust Fund and then transferred to this account to support various marine-related programs currently funded by direct appropriations in the Operations, Research and Facilities account. These programs include marine weather, coastal mapping and charting, and tides and circulation studies.

This fund is financed through collections from foreign vessel owners who fish within the U.S. Fishery Conservation Zone. Collections to the fund are used by the Secretary of Commerce to pay the salaries of observers and program support personnel, and the costs of data management and analysis of the observer program. The observers collect scientific information on the foreign catch, and monitor compliance with the provisions of the Magnuson Fishery Conservation and Management Act (MFCMA) of 1976.

The Office administers laws governing the granting of patents for inventions and the registration of trademarks.

Public Law 100–703 provides for a portion of Office operating costs to be recovered through user fee revenues. Collections were $192.3 million in 1989 and are estimated to be $180.0 million in 1990 and $241.4 million in 1991.

The 1989 unobligated balance brought forward is $28.5 million, of which $13.8 million is reserved for trademark programs. Remaining funds will be utilized in 1990 for procurement actions delayed from 1989, for program requirements resulting from higher workloads and as directed to offset appropriation requirements.

An Automation Master Plan provides for the automation of the majority of the functions and operations of the Office by the 1990's. The Plan proposes a phased approach to complete the progressive development and installation of system capabilities. The 1991 funds provide for the implementation of the recommendations of the Industry Review Panel on the Automated Patent System. Automation resources are distributed among the four activities of the Office.

Patent process.—Applications are examined to determine inventor entitlements to a patent for the claimed invention. Patent application examination also includes quasi-judicial review in appeal and interference proceedings, and the publication of issued patents.

The 1991 increases support programs 1) to maintain patent application pendency time at 18.5 months while maintaining the quality of issuing patents, 2) to enhance and expand the Patent Academy, and 3) to provide patent examining office automation capabilities.

Key patent application workload and performance data are:

	1988 actual	*1989 actual*	*1990 est.*	*1991 est.*
Applications in Office (start of year)	230,551	240,347	244,734	257,817

Total pendency in Office, all applications (in months)	19.9	18.4	18.9	18.5

Trademark process.—This activity provides for the examination of applications to determine whether the statutory criteria for the Federal registration of the trademark or service mark have been met. When the criteria are met, a registration is printed and issued to the applicant. Examination also includes *inter partes* proceedings involving oppositions, cancellations, and interferences. The 1991 funding maintains the reduced pendencies in trademark examination and anticipates a continued increase in the receipt of applications due to the recently implemented Trademark Law Revision Act of 1988.

Key trademark application workload and performance data are:

	1988 actual	*1989 actual*	*1990 est.*	*1991 est.*
Applications in Office (start of year)	77,538	90,079	99,337	112,780

Information dissemination.—Materials and services which assist in the examination of patent and trademark applications and in the transfer of technological information are provided in this activity. Specific materials and services include art documents; maintenance of a scientific library and public search rooms; preparation of copies of patents, trademark registrations, and official documents; assignment of patents and trademark rights; and administration of printing.

The 1991 increases provide funds for the processing of increased volume of work; to clerically process an increase in original references; for increased classification of Japanese abstracts; for scientific library support through genetic sequencing and commercial data base; and for training for the International Patent Classification System.

Executive direction and administration.—Management and administration of the Office are provided by this activity. Administrative services, which maintain program support services, are expanded to keep pace with increased application filings and enhanced examiner production. The 1991 increases include funds to handle the increasing number of applicants desiring admittance to practice before the PTO. Management Planning has been increased to keep pace with the demands of the steadily increasing staffing levels of the PTO. Administrative services have been enhanced to provide essential program support. The Automation staff has been increased to support implementation of the Master Plan. Patent Quality Review has been increased to keep pace with the increased allowances from the patent examiners.

The National Institute of Standards and Technology (NIST) is responsible for the measurement foundation which supports U.S. industry, government, and scientific establishments. NIST efforts are organized into the following program activities:

Measurement and engineering research and standards.—

Measurement research and standards.—Research in physics, radiation, analytical chemistry, and chemical properties and processes produces fundamental measurements and data that are the foundation for U.S. industry, commerce, and science to achieve levels of accuracy and compatibility required to support technological development, efficient processing, research and development, process control and quality assurance, and equity in trade. Increases in 1991 will provide (1) measurement science for quality assurance of chemical measurements (2) long-term research for developing atomic scale devices, and (3) measurement techniques and data to support biochemical manufacturing processes.

Materials science and engineering.—Research in materials characterization, nondestructive evaluation, metallurgy, polymers, and ceramics produces measurement methods, standards, data and other technical information on processing, structure, properties, and performance of materials. These activities are in support of generic materials technologies which will permit industry to improve productivity and competitiveness in the manufacture of new advanced materials through increased reliability and quality at lower cost. The 1991 increases will expand the development of measurement methods and standards to produce and use advanced materials more reliably.

Engineering measurements and standards.—Research in electronic and electrical measurements, manufacturing engineering, mathematical sciences, construction and performance of buildings and fire protection produces new engineering knowledge, techniques, and databases for design, development, prediction, and control of industrial processes. In 1991, increases will: provide measurement, technology standards and services for the components of fiber optic systems, high temperature superconductors, advanced semiconductors, and intelligent machines and processes. Funding for studies in general toxicity and alternate refrigerants will not be continued in 1991.

Computer sciences and technology.—Research in computer science and engineering establishes government-wide automated data processing (ADP) standards and technical support for the development of national and international voluntary industry standards which lead to more productive use of computers and networks, and the maintenance of the competitive posture of the U.S. computer industry. The 1991 increases will address responsibilities assigned by the Computer Security Act of 1987, establish an emergency response capability to computer virus threats, and provide industry-wide coordination of standards for multivendor Integrated Services Digital Networks (ISDN).

Industrial technology services.—This program will support two major activities in 1991. Matching grants will be provided to universities and nonprofit organizations for use as seed money to establish Manufacturing Technology Centers which facilitate the transfer of new and innovative manufacturing technology to small and medium size businesses. The Advanced Technology Program provides grants to industry-led consortia to support development of generic, precompetitive technologies. Funds for state technology programs are not requested in 1991.

Research support activities.—This subactivity groups the centrally managed programs that provide support to all other NIST programs. This support includes developing technical competence in NIST mission oriented areas of research and services, providing scientists and engineers from industry and universities the opportunity to partici-

pate in the Research Associate program, providing computing support to NIST programs, maintaining a satisfactory facilities environment for conducting the NIST technical programs, and constructing a cold neutron research facility for advanced materials research. The 1991 increases will provide for upgrading the NIST scientific computer to meet rapidly expanding needs for scientific computing capability and for safety, system capacity, and obsolescence requirements of the NIST physical plant.

The National Telecommunications and Information Administration (NTIA) is the principal executive branch adviser to the President on domestic and international communications policy. Additionally, it manages the Federal Government's use of the radio frequency spectrum and performs extensive research in telecommunications sciences.

Domestic and international policies.—

Domestic policies.—In 1991, NTIA will continue to develop and advocate policies to decrease regulation and increase competition in the domestic telecommunications marketplace. NTIA will place special emphasis on emerging technologies, including advanced television systems, and will develop and advocate policies in the common carrier and mass media fields which offer increased consumer choices. Particularly, NTIA will conduct technical research which will assist the Federal Communications Commission in the development of a high definition television transmission and production standard.

International policies.—In 1991, NTIA will continue to develop and advocate policies for the advancement of U.S. interests in the international telecommunications area. In coordination with the Department of State, the agency will continue to discharge the Presidential responsibility for oversight of the Communications Satellite Corporation (COMSAT) in its role as the U.S. Signatory to INTELSAT.

Spectrum management.—

Spectrum plans and policies.—In 1991, NTIA will continue to prepare for, participate in, and implement the results of international, regional, and national conferences addressing spectrum allocation and utilization. In addition, NTIA will formulate, in coordination with the FCC, plans and policies for efficient use of the spectrum and continue its efforts in the identification and analysis of issues affecting emergency communications planning.

Spectrum management, analysis and operations.—In 1991, NTIA will continue to authorize frequency assignments, review and certify spectrum for proposed Federal radio communications systems, conduct frequency band studies and compliance activities and operate the necessary automated data facilities to support the above.

Telecommunication sciences research.—

Spectrum research and analysis.—In 1991, NTIA will continue to conduct applied research and analysis as a basis for developing spectrum use concepts and models that lead to more efficient use of the radio spectrum, and electromagnetic wave and propagation models that lead to improvement in radio systems performance.

Systems and networks research and analysis.—In 1991, NTIA will assess and develop domestic and international technical performance standards to facilitate competition in telecommunications products and services. Also, analytical methods and automated models will be employed to assist in the development of credible and defensible positions before international conferences and committees.

The public telecommunications facilities program has provided grants for planning and construction of noncommercial telecommunications facilities in areas not previously served by public television and radio. Since over 95 percent of the United States currently receives public broadcast programming, funding for this grant program is not requested in 1991.

GENERAL PROVISIONS—DEPARTMENT OF COMMERCE

The following sections are proposed for deletion and do not appear below:

Sec. 103	Prohibition on the sale of certain loans without the consent of the borrower.
Sec. 104	Provision authorizing the acceptance of funds by the National Institute of Standards and Technology for the construction of the cold neutron research facility.
Sec. 105	Limitation on the uses of the Departmental Working Capital Fund.

SEC. 101. During the current fiscal year, applicable appropriations and funds made available to the Department of Commerce by this Act shall be available for the activities specified in the Act of October 26, 1949 (15 U.S.C. 1514), to the extent and in the manner prescribed by said Act, and, notwithstanding 31 U.S.C. 3324, may be used for advanced payments not otherwise authorized only upon the certification of officials designated by the Secretary that such payments are in the public interest.

SEC. 102. During the current fiscal year, appropriations made available to the Department of Commerce by this Act for salaries and expenses shall be available for hire of passenger motor vehicles as authorized by 31 U.S.C. 1343 and 1344; services as authorized by 5 U.S.C. 3109; and uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902).

SEC. 103. Not to exceed 2 percent of any appropriation made available for the current fiscal year for Department of Commerce activities funded in this Act may be transferred between such appropriations, but no such appropriation, except as otherwise specifically provided, shall be increased or decreased by more than 2 percent by any such transfers. (Department of Commerce Appropriations Act, 1990.)

TITLE VI—GENERAL PROVISIONS

The following sections are proposed for deletion and do not appear below:

Sec. 605	Permanent provision authorizing collection of filing fees for use of the Federal Trade Commission and the Antitrust Division, Department of Justice.
Sec. 606	Reprogramming notification requirements.
Sec. 609	Conservation of sea turtles.
Sec. 610	Export license applications for launch of U.S.-built satellites on Soviet or Chinese-built launch vehicles.

SEC. 601. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes not authorized by the Congress.

SEC. 602. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 603. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

SEC. 604. If any provision of this Act or the application of such provision to any person or circumstances shall be held invalid, the remainder of the Act and the application of each provision to persons or circumstances other than those as to which it is held invalid shall not be affected thereby.

SEC. [607] *605.* Such sums as may be necessary for fiscal year [1990] *1991* pay raises for programs funded by this Act shall be absorbed within the levels appropriated in this Act.

SEC. [608] *606.* Funds appropriated to the Legal Services Corporation and distributed to each grantee funded in fiscal year [1990] *1991* pursuant to the number of poor people determined by the Bureau of the Census to be within its geographical area shall be distributed in the following order:

(1) grants from the Legal Services Corporation and contracts entered into with the Legal Services Corporation under section 1006(a)(1) shall be maintained in fiscal year [1990] *1991* at not less than $8.98 per poor person within the geographical area of each grantee or contractor under the 1980 census or 9 cents per poor person more than the annual per-poor-person level at which each grantee and contractor was funded in fiscal year [1989] *1990*, whichever is greater; and

(2) each such grantee shall be increased by an equal percentage of the amount by which such grantee's funding, including the increase under (1) above, falls below $16.68 per poor person within its geographical area under the 1980 census:

Provided, That none of the funds appropriated in this Act for the Legal Services Corporation shall be used to bring a class action suit against the Federal Government or any State or local government unless—

(1) the project director of a recipient has expressly approved the filing of such an action in accordance with policies established by the governing body of such recipient;

(2) the class relief which is the subject of such an action is sought for the primary benefit of individuals who are eligible for legal assistance; and

(3) that prior to filing such an action, the recipient project director has determined that the government entity is not likely to change the policy or practice in question, that the policy or practice will continue to adversely affect eligible clients, that the recipient has given notice of its intention to seek class relief and that responsible efforts to resolve without litigation the adverse effects of the policy or practice have not been successful or would be adverse to the interest of the clients:

except that this proviso may be superseded by regulations governing the bringing of class action suits promulgated by a majority of the Board of Directors of the Corporation [who have been confirmed in accordance with section 1004(a) of the Legal Services Corporation Act]: *Provided further*, That none of the funds appropriated in this Act made available by the Legal Services Corporation may be used—

(1) to pay for any publicity or propaganda intended or designed to support or defeat legislation pending before Congress or State or

local legislative bodies or intended or designed to influence any decision by a Federal, State, or local agency;

(2) to pay for any personal service, advertisement, telegram, other device, intended or designed to influence any decision by a Federal, State, or local agency, except when legal assistance is provided by an employee of a recipient to an eligible client on a particular application, claim, or case, which directly involves the client's legal rights or responsibilities;

(3) to pay for any personal service, advertisement, telegram, telephone communication, letter, printed or written matter, or any other device intended or designed to influence any Member of Congress or any other Federal, State, or local elected official—

(A) to favor or oppose any referendum, initiative, constitutional amendment, or any similar procedure of the Congress, any State legislature, any local council or any similar governing body acting in a legislative capacity,

(B) to favor or oppose an authorization or appropriation directly affecting the authority, function, or funding of the recipient or the Corporation, or

(C) to influence the conduct of oversight proceedings of the recipient or the Corporation;

(4) to pay for any personal service, advertisement, telegram, telephone communication, letter, printed or written matter, or any other device intended or designed to influence any Member of Congress or any other Federal, State, or local elected official to favor or oppose any Act, bill, resolution, or similar legislation, except that this proviso shall not preclude funds from being used to provide communication directly to a Federal, State, or local elected official on a specific and distinct matter where the purpose of such communication is to bring the matter to the official's attention if—

(A) the project director of a recipient has expressly approved in writing the undertaking of such communication to be made on behalf of a client or class of clients in accordance with policy established by the governing body of the recipient; and

(B) the project director of a recipient has determined prior to the undertaking of such communication, that—

(i) the client and each client is in need of relief which can be provided by the legislative body involved;

(ii) appropriate judicial and administrative relief have been exhausted; and

(iii) documentation has been secured from each eligible client that includes a statement of the specific legal interests of the client, except that such communication may not be the result of participation in a coordinated effort to provide such communications under this proviso; and

(C) the project director of a recipient maintains documentation of the expense and time spent under this proviso as part of the records of the recipient; or

(D) the project director or a recipient has approved the submission of a communication to a legislator requesting introduction of a private relief bill:

except that nothing in this proviso shall prohibit communications made in response to a request from a Federal, State, or local official: *Provided further*, That none of the funds appropriated in this Act made available by the Legal Services Corporation may be used to pay for any administrative or related costs associated with an activity prohibited in clause (1), (2), (3), or (4) of the previous proviso: *Provided further*, That none of the funds appropriated under this Act for the Legal Services Corporation will be expended to provide legal assistance for or on behalf of any alien unless the alien is present in the United States and is—

(1) an alien lawfully admitted for permanent residence as defined in section 101(a)(20) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(20));

(2) an alien who is either married to a United States citizen or is a parent or an unmarried child under the age of twenty-one years of such a citizen and who has filed an application for adjustment of status to permanent resident under the Immigration and Nationality Act, and such application has not been rejected;

(3) an alien who is lawfully present in the United States pursuant to an admission under section 207 of the Immigration and Nationality Act (8 U.S.C. 1157, relating to refugee admissions) or who has been granted asylum by the Attorney General under such Act; or

(4) an alien who is lawfully present in the United States as a result of the Attorney General's withholding of deportation pursuant to section 243(h) of the Immigration and Nationality Act (8 U.S.C. 1253(h)):

Provided further, That an alien who is lawfully present in the United States as a result of being granted conditional entry pursuant to section 203(a)(7) of the Immigration and Nationality Act (8 U.S.C. 1153(a)(7)) before April 1, 1980, because of persecution or fear of persecution on account of race, religion, or political opinion or because of being uprooted by catastrophic natural calamity shall be deemed, for purposes of the previous proviso, to be an alien described in clause (3) of the previous proviso: *Provided further*, That none of the funds appropriated for the Legal Services Corporation may be used to support or conduct training programs for the purpose of advocating particular public policies or encouraging political activities, labor or antilabor activities, boycotts, picketing, strikes, and demonstrations, including the dissemination of information about such policies or activities, except that this provision shall not be construed to prohibit the training of attorneys or paralegal personnel necessary to prepare them to provide adequate legal assistance to eligible clients or to advise any eligible client as to the nature of the legislative process or inform any eligible client of his rights under statute, order, or regulation: *Provided further*, That none of the funds appropriated in this Act for the Legal Services Corporation may be used to carry out the procedures established pursuant to section 1011(2) of the Legal Services Corporation Act unless the Corporation prescribes procedures to insure that financial assistance under this Act shall not be terminated, and a suspension of financial assistance shall not be continued for more than thirty days, unless the grantee, contractor, or person or entity receiving financial assistance under this Act has been afforded reasonable notice and opportunity for a timely, full, and fair hearing and, when requested, such hearing shall be conducted by an independent hearing examiner, subject to the following conditions—

(1) such request for a hearing shall be made to the Corporation within thirty days after receipt of notice to terminate financial assistance, deny an application for refunding, or suspend financial assistance and such hearing shall be conducted within thirty days of receipt of such request for a hearing;

(2) the Corporation shall make such final decision within thirty days after completion of such hearing; and

(3) hearing examiners shall be appointed by the Corporation in accordance with procedures established in regulations promulgated by the Corporation:

Provided further, That none of the funds appropriated in this Act for the Legal Services Corporation may be used to carry out the procedures established pursuant to section 1011(2) of the Legal Services Corporation Act unless the Corporation prescribes procedures to ensure that an application for refunding shall not be denied unless the grantee, contractor, or person or entity receiving assistance under this Act has been afforded reasonable notice and opportunity for a timely, full, and fair hearing to show cause why such action should not be taken and subject to all other conditions of the previous proviso: *Provided further*, That none of the funds appropriated in this Act for the Legal Services Corporation shall be used by the Corporation in making grants or entering into contracts for legal assistance unless the Corporation insures that the recipient is either (1) a private attorney or attorneys (for the sole purpose of furnishing legal assistance to eligible clients) or (2) a qualified nonprofit organization chartered under the laws of one of the States, a purpose of which is furnishing legal assistance to eligible clients, the majority of the board of directors or other governing body of which organization is comprised of attorneys who are admitted to practice in one of the States and who are appointed to terms of office on such board or body by the governing bodies of State, county, or municipal bar associations the membership of which represents a majority of the attorneys practicing law in the locality in which the organization is to provide legal assistance, or, with regard to national support centers, the locality where the organization maintains its principal headquarters: *Provided further*, That none of the funds appropriated in this Act for the Corporation shall be used, directly or indirectly, by the Corporation to promulgate new regulations or to enforce, implement, or operate in accordance with regulations effective after April 27, 1984, unless the Appropriations Committees of both Houses of Congress have been notified fifteen days prior to such use of funds [as provided for in section 606 of this Act]; *Provided further*, That none of the funds appropriated to the Legal Services Corporation for fiscal years prior to fiscal year 1986 and carried over into fiscal year [1990] *1991*, either by the Corporation itself or by any recipient of such funds, may be expended, unless such funds are expended in accordance with the preceding restrictions and provisos, except that such funds may be expended for the continued representation of aliens prohibited by said provisos where such representation commenced prior to January 1, 1983, or as approved by the Corporation; *Provided further,* That if a Presidential Order pursuant to Public Law 100-119, the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987, is issued for fiscal year [1990] *1991,* funds provided to each grantee of the Legal Services Corporation shall be reduced by the percentage specified in the Presidential Order: *Provided further,* That if funds become available to the Legal Services Corporation because a national support center has been defunded or denied refunding pursuant to section 1011(2) of the Legal Services Corporation Act, as amended by this Act, such funds may be transferred to basic field programs to be distributed in the manner specified by this Act: *Provided further,* That none of the funds appropriated by this Act or prior Acts or any other funds available to the Corporation or a recipient may be used by an officer, board member, employee or consultant of the Corporation or by any recipient to implement or enforce the 1984 and 1986 regulations on legislative and administrative advocacy (part 1612) or to implement, enforce or keep in effect provisions in the regulation regarding legislative and administrative advocacy and training (part 1612, 52 FR 28434 (July 29, 1987)) which impose restrictions on private funds except to the extent that such restrictions are explicity set forth in sections 1007 (a)(5), (b)(6), (b)(7), and 1010(c) of the Legal Services Corporation Act, as amended: *Provided further,* That the Corporation shall not impose requirements on governing bodies of the recipients that are additional to, or more restrictive than, the provisions of this Act and section 1007(c) of the Legal Services Corporation Act, as amended, including, but not limited to (1) the procedures of appointment, including the political affiliation and the length of terms of board members, (2) the size, quorum requirements and committee operations of such governing bodies, and (3) any requirements on appointment of board members of national support centers that would preclude the bar associations in the States in which the center's principal offices are located from making all appointments required to be made by bar associations: *Provided further,* That none of the funds appropriated under this Act to the Legal Services Corporation may be used by the Corporation or any recipient to participate in any litigation with respect to abortion: *Provided further,* That the Corporation shall utilize the same formula for distribution of fiscal year [1990] *1991* migrant funds as was used in fiscal year [1989] *1990: Provided further,* That the fourteenth and fifteenth provisos of this section (relating to parts 1607 and 1612 of the Corporation's regulations) shall expire if such action is directed by a majority vote of a Board of Directors of the Legal Services Corporation [composed of eleven individuals nominated by the President after January 20, 1989, and subsequently confirmed by the United States Senate]: *Provided further,* That none of the funds appropriated under this Act or under any prior Acts for the Legal Services Corporation shall be used to consider, develop, or implement any system for the competitive award of grants or contracts until such action is authorized pursuant to a majority vote of a Board of Directors of the Legal Services Corporation [composed of eleven individuals nominated by the President after January 20, 1989, and subsequently confirmed by the United States Senate], except that nothing herein shall prohibit the Corporation Board, members, or staff from engaging in in-house reviews of or holding hearings on proposals for a system for the competitive award of all grants and contracts, including support centers, and that nothing herein shall apply to any competitive awards program currently in existence; [subsequent to confirmation such new] the Board of Directors shall develop and implement a proposed system for the competitive award of all grants and contracts: *Provided further,* That the Corporation shall insure that all grants and contracts made for calendar year [1990] *1991* to all grantees receiving funds under sections 1006(a) (1)(A) and (3) of the Legal Services Corporation Act as of September 30, [1989] *1990,* with funds appropriated by this Act or prior appropriations Acts, shall be made for a period of at least twelve months beginning on January 1, [1990] *1991,* so as to insure that the total annual funding for each current grantee or contractor is no less than the amount provided pursuant to this Act: *Provided further,* That such grants or contracts shall not be subject to any amendments to regulations relating to fee-generating cases (45 CFR part 1609) or the use of private funds (45 CFR parts 1610 and 1611) not in operational effect on October 1, [1988] *1989: Provided further,* That any changes in procedures in operational effect as of September 1, [1989] *1990,* that would have the effect of imposing timekeeping requirements on recipients must be adopted as rules or regulations in accordance with section 1008(e) of the Legal Services Corporation Act and all of the requirements of this Act: *Provided further,* That any new rules or regulations, or revisions to existing rules or regulations adopted by the Board of the Legal Services Corporation after October 1, [1989] *1990,* shall not become effective until after October 1, [1990] *1991,* or until authorized pursuant to a majority vote of a Board of Directors of the Legal Services Corporation [composed of eleven individuals nominated by the President after January 20, 1989, and subsequently confirmed by the United States Senate]: *Provided further,* That, notwithstanding any decision or action of the President of the Corporation after September 7, [1989] *1990,* funds appropriated under this Act or any prior Acts shall not be denied, for the period October 1, [1989] *1990* through December 31, [1990] *1991,* to any grantee or contractor which in fiscal year [1989] *1990* received funding appropriated under any prior Act, as a result of activities which have been found by an independent hearing officer appointed by the President of the Corporation prior to October 1, [1989] *1990,* not to constitute grounds for a denial of refunding, and any decisions or action of the President of the Corporation reversing or setting aside such decision of an independent hearing officer concerning section 1010(c) of the Act rendered in fiscal year [1989] *1990* shall be null and void. *(Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act, 1990.)*

MILITARY PERSONNEL

ACTIVE FORCES

These appropriations finance the personnel costs of the active duty forces of the Army, Navy, Marine Corps, and Air Force. Changes in financial requirements are primarily related to military personnel strengths. In addition, these appropriations finance the future retirement benefits of the current active forces. While most of the entitlements financed by these appropriations are set by statute, the estimates reflect continuing efforts to improve management including implementation of audit recommendations, improved management of military travel, and prudent use of bonus programs, and other pay programs.

The numbers of active duty military personnel provided for are shown in the following table:

RESERVE FORCES

These appropriations finance the personnel costs of the National Guard and Reserve forces, including the future retirement benefits of the current Reserve forces. The estimates reflect continuing efforts to improve management efficiency including, for example, more economical use of training and recruiting resources as well as the undertaking of active missions at lower costs.

The number of National Guard and Reserve personnel estimated to participate in the Selected Reserve training programs and the number of full-time active duty military personnel provided for are summarized in the following table:

The Reserve Officers' Training Corps program provides training for reserve and regular officer candidates who have enrolled in the course while attending a college at which a ROTC unit has been established. College graduates who satisfactorily complete the advanced course of the program are commissioned and may be ordered to active duty for a minimum of 3 years.

The Reserve Officers' Training Corps Vitalization Act of 1964, as amended, authorizes a limited number of scholarships for ROTC students on a competitive basis. Successful candidates for the scholarships generally serve a minimum period of 4 years on active duty upon graduation and appointment as a commissioned officer. A number of scholarship recipients will fulfill their entire obligation in the Reserve components.

The Armed Forces health professions scholarship program provides a source of active duty commissioned officers for the various health professions.

The numbers of commissioned officers graduated from these programs are summarized below:

OPERATION AND MAINTENANCE

These appropriations finance the costs of operating and maintaining the Armed Forces, including the Reserve components and related support activities of the Department of Defense, except military personnel pay, allowance and travel costs. Included are amounts for pay of civilians, contract services for maintenance of equipment and facilities, fuel, supplies, and repair parts for weapons and equipment. Financial requirements are influenced by many factors, including the number of aircraft squadrons, Army and Marine Corps divisions, installations, military strength and deployments, rates of operational activity, and the quantity and complexity of major equipment (aircraft, ships, missiles, tanks, et cetera) in operation.

The purpose of this account is to allow transfers to operation and maintenance appropriations available for Defense activities in foreign countries to finance upward adjustment of recorded obligations due to foreign currency fluctuations above the budget rate. Transfers are made, as needed, to meet disbursement requirements in excess of funds otherwise available for obligation adjustment. Net gains resulting from favorable exchange rates are returned to this appropriation and are available for subsequent transfer when needed.

The Restoration of the Rocky Mountain Arsenal account was established by Section 1367 of Public Law 99-661. In accordance with this statute, any monies awarded to the United States, as a result of a judgment or settlement in litigation concerning the effects of the contamination at the Rocky Mountain Arsenal, are deposited in this account. They are then made available to the Secretary of the Army for the exclusive purpose of correcting the effects of the contamination.

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are shown in the schedules of parent appropriations, as follows:

Funds appropriated to the President:
  "Military assistance, Executive."
  "International military education and training."
  "Foreign military credit sales."
  "Advances, foreign military sales, Executive."
Executive Office of the President: Official residence of the Vice President, "Operating expenses."
Department of Energy: "Operation and research."
Department of Transportation, Federal Aviation Administration: "Operations, Federal Aviation Administration."
National Aeronautics and Space Administration: "Research and Development."

PROCUREMENT

The procurement appropriations of the Department of Defense finance the acquisition of weapons, equipment, munitions, spares, and modification of existing equipment.

Procurement continues in FY 1991 for the Army's Patriot and Stinger air defense missile systems, TOW and Hellfire antitank missiles, M–1 main battle tank, Bradley Fighting Vehicle System, Multiple Launch Rocket System, UH–60 Blackhawk helicopter, and improved conventional munitions.

Modernization of our naval forces in 1991 includes continued procurement of the F–18 air combat fighter and AV–8B VSTOL aircraft and remanufacture of the F–14 fleet air defense fighter. Procurement of the Trident strategic missile and submarine and Tomahawk missile continues. General purpose ships to be acquired include SSN–21 nuclear attack submarines, DDG–51 guided missile destroyers, an LHD–1 amphibious assault ship and coastal minehunters.

Significant Air Force programs include procurement of the Peacekeeper ballistic missile including rail garrison basing equipment, AMRAAM air-to-air missile, Advanced Cruise Missile Short Range Attack Missile (SRAM II), B–2A bomber, F–15 and F–16 air combat fighters, C–17 airlift aircraft, satellites and space launch vehicles.

The 1991 budget continues emphasis on the DOD Acquisition Initiatives including the use of multiyear procurement and economic production rates. It also reflects improvements resulting from the Defense Management review.

The budget plan for each appropriation is shown as a separate table immediately following the program and financing schedules for those appropriations that are available for obligation for more than one year. In 1991, it presents, by budget activity, the value of the program requested for the life of the multiple-year appropriation, with comparable amounts in 1989 and 1990.

The appropriations for procurement depend upon the enactment of authorizing legislation.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

Programs in this title support modernization through military research, exploratory development, fabrication of technology-demonstration devices, and development and testing of prototypes and full-scale preproduction hardware. This work is performed by industrial contractors, Government laboratories and facilities, universities and nonprofit organizations. Research and development programs are funded to cover annual needs.

The budget plan for each appropriation is shown as a separate table immediately following the program and financing schedules for that appropriation. In 1991 it presents, by budget activity, the value of the program requested for the life of these multiple-year appropriations, with comparable amounts in 1989 and 1990. Funds for each fiscal year are available for obligation for a two-year period beginning on the first day of that fiscal year.

The 1991 program provides for major development efforts on the National Aerospace Plane, Balanced Technology Initiative, Peacekeeper Rail Garrison, Small ICBM, the Short-Range Attack Missile, the B-2 Advanced Technology Bomber, the kinetic energy ASAT program, the MILSTAR Communications Satellite System, the Strategic Defense Initiative, the Air Defense Initiative as well as Advanced Anti-Tank Weapons, a new light helicopter (LHX), a Forward Area Air Defense system, the Advanced Tactical Fighter, the Advanced Tactical Aircraft, the next generation airlifter (C-17), the nuclear attack submarine, the Long-Range Air ASW Capable Aircraft (LRAACA-P-7A), the Fixed Distributed System, and NATO Cooperative Research and Development. Funds are also requested for product improvement to systems which have already been fielded or are in production, such as the F-14D fighter, the Advanced Air-to-Air Missile, SSN-21 submarine and the M1A1 tank.

MILITARY CONSTRUCTION

The budget plan for each appropriation is shown as a separate table immediately following the program and financing schedules for those appropriations that are available for obligation for more than one year. In 1991 it presents, by budget activity, the value of the program requested for the life of the multiple-year appropriations, with comparable amounts in 1989 and 1990.

The direct military construction programs for the Armed Forces, both Active and Reserve, shown in the individual schedules of this title are summarized in the following table (in thousands of dollars):

MILITARY CONSTRUCTION PROGRAM

	1989 actual	*1990 est.*	*1991 est.*
Active Forces	4,012,734	3,166,325	3,264,400
Reserve Forces	604,552	586,479	280,100
Interservice activities	1,298,151	1,482,154	2,164,400
Total	5,915,437	5,234,958	5,708,900

The Military Construction programs are intended to provide facilities required as a result of new weapon systems entering the inventory including naval vessels, B-2's, Peacekeeper Rail Garrison, the Trident II weapon system, the Titan IV, and the Large Rocket Test Facility (J-6). The program continues initiatives to improve living and working conditions, to reduce operating costs, increase productivity, and conserve energy by upgrading or replacing facilities which have become functionally obsolete or can be made more efficient through relatively modest investments in improvements. Also included in this request are resources required to realign and close bases consistent with the recommendations of the Base Realignment and Closure Commission.

FAMILY HOUSING, DEFENSE

These appropriations finance all costs associated with construction, improvements, operations, maintenance and leasing of all military family housing. The program contains initiatives to reduce operating costs and conserve energy by upgrading or replacing facilities which can be made more efficient through relatively modest investments in improvements.

The budget plan for each appropriation is shown as a separate table immediately following the program and financing schedules for those appropriations that are available for obligation for more than one year. In 1991 it presents, by budget activity, the value of the program requested for the life of the multiple-year appropriation, with comparable amounts in 1989 and 1990.

The National Defense Stockpile is planned and operated under the authority of the Strategic and Critical Materials Stockpiling Act. The purpose of the Stockpile is to decrease or preclude a dangerous and costly dependence by the United States upon foreign sources for supplies of strategic and critical materials in times of national emergency. The quantities of the materials stockpiled are to be sufficient to sustain the United States for a period of not less than three years during a national emergency situation that would necessitate a total mobilization of the economy for a sustained conventional global war of indefinite duration.

The National Defense Stockpile Transaction Fund provides for the financing of acquisition and upgrading of strategic and critical stockpile materials, and all related expenses such as transportation, development of specifications, testing, quality studies, and relocations of materials.

Funding in FY 1991 finances the acquisition of raw materials, the continuation of the Ferroalloy Upgrade program and the expansion of raw material upgrading in order to address surge requirements.

DEPARTMENT OF DEFENSE STOCK FUNDS

Department of Defense stock funds finance the purchase of materials for resale to the military services and other authorized customers (10 U.S.C. 2208). These inventories are stocked at various Defense activities. Mobilization reserve materials are also purchased through the stock funds.

Budget program.—Inventories rise in 1991 over 1990 to support the existing force structure, modernization efforts, and other logistics initiatives. Efforts continue to achieve efficiencies in spare parts procurement through acquisition reform. The following table shows the stock fund inventories (in millions of dollars) resulting from the budget program.

Total	62,274.8	65,866.0	67,458.4

Financing the budget program.—The budget program is financed primarily from sales to customers. Gross expenditures in 1991 are projected to be higher than in 1990, considering inflation, to support increased operating costs previously funded in the operation and maintenance appropriations and depot level reparables transferred from procurement appropriation to the Army and Air Force Stock Fund. Estimated expenditures are shown below (in millions of dollars):

	Gross outlays		
	1989 actual	*1990 est.*	*1991 est.*
Army stock fund	6,929.4	7,483.8	8,128.3
Navy stock fund	10,227.4	8,301.5	8,652.4
Air Force stock fund	9,509.8	9,341.1	11,084.0
Defense stock fund	11,567.1	10,440.7	11,730.9
Total Department of Defense stock funds	38,233.7	35,567.1	39,595.6

Procurement leadtime for material acquisition is greater than the time required to fill and collect customers' orders. As a result, Department of Defense stock funds are authorized to incur obligations in anticipation of future years' sales (10 U.S.C. 2210(b)). Pursuant to this authority, the outstanding balance of contract authority was $11,463.0 million at the end of 1989, and is estimated at $8,664.2 million in 1991.

***Operating results and financial conditions.*—Revenue and expenses for 1989, 1990, and 1991 are projected on a break-even basis. It is estimated that by the end of 1991, there will be $67,458.4 million in inventory and other assets. Liabilities will be $4,040 million and invested capital from appropriations, capitalized resources and retained income will be $63,418.4 million.**

INDUSTRIAL FUNDS

Department of Defense industrial funds finance various Defense activities that perform industrial or commercial type functions on a reimbursable basis (10 U.S.C. 2208). Workload at these activities is generated by orders from various customers who provide reimbursement through progress payments for the full cost of the work performed. This enables the industrial funds to maintain the level of working capital needed for continued operations.

Budget program.—The policy of stabilizing the rates charged to customers will continue. Estimated total obligations are projected to decrease by over $258 million in 1990 and increase by over $566 million in 1991, reflecting changes in customer workload requirements. Yearend totals are shown in the following table (in thousands of dollars):

TOTAL OBLIGATIONS

	1989 actual	*1990 est.*	*1991 est.*
Army industrial fund	3,403,189	2,947,100	2,601,000
Navy industrial fund	15,165,299	15,202,500	15,848,200
Marine Corps industrial fund	109,442	116,400	118,900
Air Force industrial fund	5,631,602	5,649,400	5,873,800
Defense industrial fund	1,266,193	1,402,200	1,442,500
Total	25,575,725	25,317,600	25,884,400

The Army activities financed through the Army industrial fund include depot supply and maintenance operations, arsenals, and port handling of Defense cargo.

The Navy industrial fund finances a variety of activities, including aircraft maintenance facilities, ordnance stations, research laboratories, shipyards, printing plants, public works centers, and the Military Sealift Command.

The Marine Corps industrial fund finances maintenance depots engaged in repairing or overhauling Marine Corps equipment and providing technical engineering support.

The activities financed under the Air Force industrial fund include laundries, depot maintenance activities, and airlift services.

The Defense industrial fund finances the Defense Clothing and Textile Center and leased communications procured by the Defense Commercial Communications Office.

[EMERGENCY RESPONSE FUND]

[For the "Emergency Response Fund, Defense"; $100,000,000, to remain available until expended. The Fund shall be available for providing reimbursement to currently applicable appropriations of the Department of Defense for supplies and services provided in anticipation of requests from other Federal Departments and agencies and from State and local governments for assistance on a reimbursable basis to respond to natural or manmade disasters. The Fund may be used upon a determination by the Secretary of Defense that immediate action is necessary before a formal request for assistance on a reimbursable basis is received. There shall be deposited to the Fund: (a) reimbursements received by the Department of Defense for the supplies and services provided by the Department in its response efforts and (b) appropriations made to the Department of Defense for the Fund. Reimbursements and appropriations deposited to the Fund shall remain available until expended.] *(Department of Defense Appropriations Act, 1990.)*

SEC. 9001. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes not authorized by the Congress.

SEC. [9003] *9002.* During the current fiscal year, provisions of law prohibiting the payment of compensation to, or employment of, any person not a citizen of the United States shall not apply to personnel of the Department of Defense.[: *Provided,* That salary increases granted to direct and indirect hire foreign national employees of the Department of Defense shall not be at a rate in excess of the percentage increase authorized by law for civilian employees of the Department of Defense whose pay is computed under the provisions of section 5332 of title 5, United States Code, or at a rate in excess of the percentage increase provided by the appropriate host nation to its own employees, whichever is higher.]

SEC. [9005] *9003.* No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year, unless expressly so provided herein.

SEC. [9007] *9004.* No more than 20 per centum of the appropriations in this Act which are limited for obligation during the current fiscal year shall be obligated during the last two months of the fiscal year: *Provided,* That this section shall not apply to obligations for support of active duty training of reserve components or summer camp training of the Reserve Officers' Training Corps, or the National Board for the Promotion of Rifle Practice, Army *or the Defense Departments' Education System.*

SEC. [9009] *9005.* No part of any appropriation contained in this Act, except for small purchases in amounts not exceeding $25,000, shall be available for the procurement of any article or item of food, clothing, tents, tarpaulins, covers, cotton and other natural fiber products, woven silk or woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, canvas products, or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles), or any item of individual equipment manufactured from or containing such fibers, yarns, fabrics, or materials, or specialty metals including stainless steel flatware, or hand or measuring tools, not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the

Secretary of the Department concerned shall determine that satisfactory quality and sufficient quantity of any articles or items of food, individual equipment, tents, tarpaulins, covers, or clothing or any form of cotton or other natural fiber products, woven silk and woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, canvas products, wool, or specialty metals including stainless steel flatware, grown, reprocessed, reused, or produced in the United States or its possessions cannot be procured as and when needed at United States market prices and except procurements outside the United States in support of combat operations, procurements by vessels in foreign waters, and emergency procurements or procurements of perishable foods by establishments located outside the United States for the personnel attached thereto: *Provided*, That nothing herein shall preclude the procurement of specialty metals or chemical warfare protective clothing produced outside the United States or its possessions when such procurement is necessary to comply with agreements with foreign governments requiring the United States to purchase supplies from foreign sources for the purposes of offsetting sales made by the United States Government or United States firms under approved programs serving defense requirements or where such procurement is necessary in furtherance of agreements with foreign governments in which both governments agree to remove barriers to purchases of supplies produced in the other country or services performed by sources of the other country, so long as such agreements with foreign governments comply, where applicable, with the requirements of section 36 of the Arms Export Control Act and with section 2457 of title 10, United States Code: *Provided further*, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its possessions.

(TRANSFER OF FUNDS)

SEC. [9011] *9006*. [Upon] *During the current fiscal year, upon* determination by the Secretary of Defense that such action is necessary in the national interest, he may, with the approval of the Office of Management and Budget, transfer not to exceed $3,000,000,000 of working capital funds of the Department of Defense or funds [made] available [in this Act] to the Department of Defense for military functions (except military construction) between such appropriations or funds or any subdivision thereof, to be merged with and to be available for the same purposes, and for the same time period, as the appropriation or fund to which transferred: *Provided*, That such authority to transfer may not be used unless for higher priority items, based on unforeseen military requirements, than those for which originally appropriated and in no case where the item for which funds are requested has been denied by Congress: *Provided further*, That the Secretary of Defense shall notify the Congress promptly of all transfers made pursuant to this authority.

(TRANSFER OF FUNDS)

SEC. [9012] *9007*. During the current fiscal year, cash balances in working capital funds of the Department of Defense established pursuant to section 2208 of title 10, United States Code, may be maintained in only such amounts as are necessary at any time for cash disbursements to be made from such funds: *Provided*, That transfers may be made between such funds in such amounts as may be determined by the Secretary of Defense, with the approval of the Office of Management and Budget, except that transfers between a stock fund account and an industrial fund account may not be made unless the Secretary of Defense has notified the Congress of the proposed transfer. Except in amounts equal to the amounts appropriated to working capital funds in this Act, no obligations may be made against a working capital fund to procure war reserve material inventory, unless the Secretary of Defense has notified the Congress prior to any such obligation.

SEC. [9015] *9008*. No part of the funds in this Act shall be available to prepare or present a request to the Committees on Appropriations for reprogramming of funds, unless for higher priority items, based on unforeseen military requirements, than those for which originally appropriated and in no case where the item for which reprogramming is requested has been denied by the Congress.

SEC. [9016] *9009*. None of the funds contained in this Act available for the Civilian Health and Medical Program of the Uniformed Services under the provisions for section 1079(a) of title 10, United States Code, shall be available for reimbursement of any physician or other authorized individual provider of medical care in excess of the lower of: (a) the eightieth percentile of the customary charges made for similar services in the same locality where the medical care was furnished, as determined for physicians in accordance with section 1079(h) of title 10, United States Code; or (b) the allowable amounts in effect during fiscal year 1988 increased to the extent justified by economic changes as reflected in appropriate economic index data similar to that used pursuant to title XVIII of the Social Security Act.

SEC. [9018] *9010*. None of the funds appropriated by this Act for programs of the Central Intelligence Agency shall remain available for obligation beyond the current fiscal year, except for funds appropriated for the Reserve for Contingencies, which shall remain available until September 30, [1991] *1992*.

(TRANSFER OF FUNDS)

SEC. [9022] *9011*. None of the funds appropriated in this Act may be made available through transfer, reprogramming, or other means between the Central Intelligence Agency and the Department of Defense for any intelligence or special activity different from that previously justified to the Congress unless the Director of Central Intelligence or the Secretary of Defense has notified the House and Senate Appropriations Committees of the intent to make such funds available for such activity.

SEC. [9026] *9012*. None of the funds made available by this Act shall be used in any way, directly or indirectly, to influence congressional action on any legislation or appropriation matters pending before the Congress.

SEC. [9027] *9013*. None of the funds appropriated by this Act shall be obligated for the pay of any individual who is initially employed after the date of enactment of this Act as a technician in the administration and training of the Army Reserve and the maintenance and repair of supplies issued to the Army Reserve unless such individual is also a military member of the Army Reserve troop program unit that he or she is employed to support. Those technicians employed by the Army Reserve in areas other than Army Reserve troop program units need only be members of the Selected Reserve.

SEC. [9028] *9014*. None of the funds appropriated by this Act shall be used to purchase dogs or cats or otherwise fund the use of dogs or cats for the purpose of training Department of Defense students or other personnel in surgical or other medical treatment of wounds produced by any type of weapon: *Provided*, That the standards of such training with respect to the treatment of animals shall adhere to the Federal Animal Welfare Law and to those prevailing in the civilian medical community.

SEC. [9031] *9015*. Within the funds appropriated for the operation and maintenance of the Armed Forces, funds are hereby appropriated pursuant to section 401 of title 10, United States Code, for humanitarian and civic assistance costs under chapter 20 of title 10, United States Code. Such funds may also be obligated for humanitarian and civic assistance costs incidental to authorized operations and pursuant to authority granted in section 401 of chapter 20 of title 10, United States Code, and these obligations shall be reported to Congress on September 30 of each year: *Provided*, That funds available for operation and maintenance shall be available for providing humanitarian and similar assistance by using Civic Action Teams in the Trust Territories of the Pacific Islands and freely associated states of Micronesia, pursuant to the Compact of Free Association as authorized by Public Law 99-239: *Provided further*, That upon a determination by the Secretary of the Army that such action is beneficial for graduate medical education programs conducted at Army medical facilities located in Hawaii, the Secretary of the Army may authorize the provision of medical services at such facilities and transportation to such facilities, on a nonreimbursable basis, for not more than 250 civilian patients from American Samoa, the Commonwealth of the Northern Mariana Islands, the Marshall Islands, the Federated States of Micronesia, Palau and Guam.

SEC. [9032] *9016*. Notwithstanding any other provision of law, the Secretaries of the Army and Air Force may authorize the retention in an active status until age sixty of any officer who would otherwise be removed from an active status and who is employed as a National Guard or Reserve technician in a position in which active status in a reserve component of the Army or Air Force is required as a condition of that employment.

SEC. [9033] *9017*. Funds available for operation and maintenance under this Act, may be used in connection with demonstration projects and other activities authorized by section 1092 of title 10, United States Code.

SEC. [9034] *9018*. (a) None of the funds appropriated by this Act, shall be used to make contributions to the Department of Defense

Education Benefits Fund pursuant to section 2006(g) of title 10, United States Code, representing the normal cost for future benefits under section 1415(c) of title 38, United States Code, for any member of the armed services who, on or after the date of enactment of this Act:

(1) enlists in the armed services for a period of active duty of less than three years; or

(2) receives an enlistment bonus under section 308a or 308f of title 37, United States Code,

nor shall any amounts representing the normal cost of such future benefits be transferred from the Fund by the Secretary of the Treasury to the Secretary of Veterans Affairs pursuant to section 2006(d) of title 10, United States Code; nor shall the Secretary of Veterans Affairs pay such benefits to any such member: *Provided,* That, in the case of a member covered by clause (1), these limitations shall not apply to members in combat arms skills or to members who enlist in the armed services on or after July 1, 1989, under a [fifteen-month] program [established] *approved in advance by* the Secretary of Defense to test the cost-effective use of special recruiting incentives involving not more than nineteen noncombat arms skills [approved in advance by the Secretary of Defense]: *Provided further,* That no contribution to the Fund pursuant to section 2006(g) shall be made during the current fiscal year that represents liabilities arising from the Department of the Army: *Provided further,* That this subsection applies to active components of the Army.

(b) None of the funds appropriated by this Act shall be available for the basic pay and allowances of any member of the Army participating as a full-time student and receiving benefits paid by the Secretary of Veterans Affairs from the Department of Defense Education Benefits Fund when time spent as a full-time student is credited toward completion of a service commitment: *Provided,* That this subsection shall not apply to those members who have reenlisted with this option prior to October 1, 1987: *Provided further,* That this subsection applies to active components of the Army.

SEC. [9035] *9019.* Funds appropriated in this Act shall be available for the payment of not more than 75 percent of the charges of a postsecondary educational institution for the tuition or expenses of an officer in the Ready Reserve of the Army National Guard or Army Reserve for education or training during his off-duty periods, except that no part of the charges may be paid unless the officer agrees to remain a member of the Ready Reserve for at least four years after completion of such training or education.

SEC. [9040] *9020.* None of the funds appropriated or made available by this Act may be obligated for acquisition of major automated information systems which have not successfully completed oversight reviews required by Defense Department regulations.: *Provided,* That none of the funds appropriated or made available by this Act may be obligated on Composite Health Care System acquisition contracts if such contracts would cause the total life cycle cost estimate of [$1,100,000,000] *$1,600,000,000* expressed in fiscal year 1986 constant dollars to be exceeded.

SEC. [9041] *9021.* None of the funds provided by this Act may be used to pay the salaries of any person or persons who authorize the transfer of unobligated and deobligated appropriations into the Reserve for Contingencies of the Central Intelligence Agency.

SEC. [9042] *9022.* Funds appropriated by this Act for construction projects of the Central Intelligence Agency, which are transferred to another Agency for execution, shall remain available until expended.

SEC. [9043] *9023.* Notwithstanding any other provision of law, the Secretary of the Navy may use funds appropriated to charter ships to be used as auxiliary minesweepers providing that the owner agrees that these ships may be activated as Navy Reserve ships with Navy Reserve crews used in training exercises conducted in accordance with law and policies governing Naval Reserve forces.

SEC. [9044] *9024.* None of the funds in this Act may be used to execute a contract for the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) Reform Initiative that exceeds the total fiscal year 1987 costs for CHAMPUS care provided in California and Hawaii, plus normal and reasonable adjustments for price and program growth.[: *Provided,* That any and all funds derived from contracts or subcontracts issued for the CHAMPUS Reform Initiative shall not be subject to any Hawaii State or local sales, general excise, or similar taxes imposed upon gross sales, gross income, or gross receipts, except to the extent that such taxes are uniformly imposed upon physicians, hospitals, and all similar direct providers of health care services.]

SEC. [9049] *9025.* Monetary limitations on the purchase price of a passenger motor vehicle shall not apply to vehicles purchased for intelligence activities conducted pursuant to Executive Order 12333 or successor orders.

SEC. [9050] *9026.* Not to exceed $20,000,000 of the funds available to the Department of the Army during the current fiscal year may be used to fund the construction of classified military projects within the Continental United States, including design, architecture, and engineering services.

SEC. [9062] *9027.* Of the funds appropriated, reimbursable expenses incurred by the Department of Defense on behalf of the Soviet Union in monitoring United States implementation of the Treaty Between the United States of America and the Union of Soviet Socialist Republics on the Elimination of Their Intermediate-Range or Shorter-Range Missiles ("INF Treaty"), concluded December 8, 1987, may be treated as orders received and obligation authority for the applicable appropriation, account, or fund increased accordingly. Likewise, any reimbursements received for such costs may be credited to the same appropriation, account, or fund to which the expenses were charged: *Provided,* That reimbursements which are not received within one hundred and eighty days after submission of an appropriate request for payment shall be subject to interest at the current rate established pursuant to section 2(b)(1)(B) of the Export-Import Bank Act of 1945 (59 Stat. 526). Interest shall begin to accrue on the one hundred and eighty first day following submission of an appropriate request for payment: *Provided further,* That funds appropriated in this Act may be used to reimburse United States military personnel for reasonable costs of subsistence, at rates to be determined by the Secretary of Defense, incurred while accompanying Soviet Inspection Team members engaged in activities related to the INF Treaty: *Provided further,* That this provision includes only the in-country period (referred to in the INF Treaty) and is effective whether such duty is performed at, near, or away from an individual's permanent duty station.

SEC. [9065] *9028.* Funds available in this Act may be used to provide transportation for the next-of-kin of individuals who have been prisoners of war or missing in action from the Vietnam era to an annual meeting in the United States, under such regulations as the Secretary of Defense may prescribe.

SEC. [9076] *9029.* No funds appropriated by this Act may be obligated or expended to prepare, or to assist any contractor of the Department of Defense in preparing, any material, report, list, or analysis with respect to the actual or projected economic or employment impact in a particular State or congressional district of an acquisition program for which all research, development, testing and evaluation has not been completed.

SEC. [9077] *9030.* All obligations incurred in anticipation of the appropriations and authority provided in this Act are hereby ratified and confirmed if otherwise in accordance with the provisions of this Act.

SEC. [9078] *9031.* None of the funds appropriated by this Act shall be available for a contract for studies, analyses, or consulting services entered into without competition on the basis of an unsolicited proposal unless the head of the activity responsible for the procurement determines:

(a) as a result of thorough technical evaluation, only one source is found fully qualified to perform the proposed work, or

(b) the purpose of the contract is to explore an unsolicited proposal which offers significant scientific or technological promise, represents the product of original thinking, and was submitted in confidence by one source, or

(c) where the purpose of the contract is to take advantage of unique and significant industrial accomplishment by a specific concern, or to insure that a new product or idea of a specific concern is given financial support:

Provided, That this limitation shall not apply to contracts in an amount of less than $25,000, contracts related to improvements of equipment that is in development or production, or contracts as to which a civilian official of the Department of Defense, who has been confirmed by the Senate, determines that the award of such contract is in the interest of the national defense.

SEC. [9080] *9032.* None of the funds appropriated or otherwise made available in this Act shall be obligated or expended for salaries or expenses during the current fiscal year for the purposes of demilitarization of surplus nonautomatic firearms less than .50 caliber.

SEC. [9083] *9033.* Notwithstanding any other provision of law, none of the funds appropriated by this Act shall be available to pay more than 50 percent of an amount paid to any person under section 308 of title 37, United States Code, in a lump sum.

SEC. [9084] *9034*. Notwithstanding any other provision of law, funds available in this Act shall be available to the Department of Defense to grant civilian employees participating in productivity-based incentive award programs paid administrative time off in lieu of cash payment as compensation for increased productivity.

SEC. [9085] *9035*. None of the funds appropriated by this Act may be used by the Department of Defense to assign a supervisor's title or grade when the number of people he or she supervises is considered as a basis for this determination: *Provided*, That savings that result from this provision are represented as such in future budget proposals.

SEC. [9086] *9036*. From the amounts appropriated in this Act, funds shall be available for Naval Aviation Depots to perform manufacturing in order to compete for production contracts of Defense articles: *Provided*, That the Navy shall certify that successful bids between Naval Aviation Depots and private companies for such production contracts include comparable estimates of all direct and indirect costs: *Provided further*, That competitions conducted under this authority shall not be subject to section 2461 or 2464 of title 10, United States Code, or to Office of Management and Budget Circular A-76.

SEC. [9098] *9037*. Notwithstanding any other provision of law, during the current fiscal year, the Secretary of Defense may acquire the depot maintenance and repair of aircraft, vehicles, vessels and components, through competition between Department of Defense depot maintenance activities and private firms: *Provided*, That the Secretary shall certify that successful bids include comparable estimates of all direct and indirect costs for both public and private bids.

SEC. [9099] *9038*. Of the funds appropriated by this Act, no more than [$2,500,000] *4,000,000* shall be available for the health care demonstration project regarding chiropractic care required by section 632(b) of the Department of Defense Authorization Act, 1985, Public Law 98-525.

SEC. [9100] *9039*. None of the funds appropriated by this Act may be used to pay health care providers under the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) for services determined under the CHAMPUS Peer Review Organization (PRO) Program to be not medically or psychologically necessary. The Secretary of Defense may by regulation adopt any quality and utilization review requirements and procedures in effect for the Peer Review Organization Program under title XVIII of the Social Security Act (Medicare) that the Secretary determines necessary, and may adapt the Medicare requirements and procedures to the circumstances of the CHAMPUS PRO Program as the Secretary determines appropriate.

SEC. [9101] *9040*. For the purpose of conducting a demonstration project, to test methods of increasing collections from third-party payers of reasonable inpatient hospital care costs incurred on behalf of retirees and dependents pursuant to section 1095 of title 10, United States Code, the Secretary of Defense is authorized to modify existing Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) regional fiscal intermediary contracts to assist in the administration of activities in connection with such collections: *Provided*, That amounts collected under this section from a third-party payer for the costs of inpatient hospital care provided at a facility of the uniformed services shall be credited to the appropriation supporting the maintenance and operation of the facility.

SEC. [9116] *9041*. None of the funds appropriated by this Act shall be available for payments under the Department of Defense contract with the Louisiana State University Medical Center involving the use of cats for Brain Missile Wound Research, and the Department of Defense shall not make payments under such contract from funds obligated prior to the date of the enactment of this Act, except as necessary for costs incurred by the contractor prior to the enactment of this Act, and until thirty legislative days after the final General Accounting Office report on the aforesaid contract is submitted for review to the Committees on Appropriations in the House and Senate.

SEC. [9117] *9042*. None of the funds appropriated by this Act shall be available for bone trauma research at Letterman Army Institute of Research until the Secretary of the Army has certified to the Committees on Appropriations of the House and Senate that this research has a military application, it is being conducted in accordance with the standards set by an animal care and use committee, and the research is not duplicative of research already conducted by a manufacturer or any other research organization.

SEC. 9043. No later than the end of the second fiscal year after appropriations made to the Department of Defense have expired for obligation, unobligated balances of such appropriations may be transferred into the appropriation "Foreign Currency Fluctuations, Defense", to be merged with and available for the same time period and the same purposes as that appropriation: Provided, That hereafter, funds from contractors and funds deobligated in expired appropriations as a result of reductions in overhead rates based on incurred cost audits may be available for transfer to the appropriation "Foreign Currency Fluctuations, Defense", to be merged with and available for the same period and the same purposes as that appropriation: Provided further, That section 791 of the Department of Defense Appropriations Act, 1983 (Public Law 97-377) is repealed: Provided further, That any transfer made pursuant to any use of the authority provided by this provision shall be limited so that the amount in the appropriation "Foreign Currency Fluctuations, Defense" does not exceed $970 million at the time such transfer is made. (Department of Defense Appropriations Act, 1990.)

GENERAL PROVISIONS—MILITARY CONSTRUCTION

SEC. 101. None of the funds appropriated in this Act shall be expended for payments under a cost-plus-a-fixed-fee contract for work, where cost estimates exceed $25,000, to be performed within the United States, except Alaska, without the specific approval in writing of the Secretary of Defense setting forth the reasons therefor.

SEC. 102. Funds herein appropriated to the Department of Defense for construction shall be available for hire of passenger motor vehicles.

SEC. 103. Funds appropriated to the Department of Defense for construction may be used for advances to the Federal Highway Administration, Department of Transportation, for the construction of access roads as authorized by section 210 of title 23, United States Code, when projects authorized therein are certified as important to the national defense by the Secretary of Defense.

SEC. 104. None of the funds appropriated in this Act may be used to begin construction of new bases inside the continental United States for which specific appropriations have not been made.

SEC. 105. No part of the funds provided in this Act shall be used for purchase of land or land easements in excess of 100 per centum of the value as determined by the Corps of Engineers or the Naval Facilities Engineering Command, except (a) where there is a determination of value by a Federal court, or (b) purchases negotiated by the Attorney General or his designee, or (c) where the estimated value is less than $25,000, or (d) as otherwise determined by the Secretary of Defense to be in the public interest.

SEC. 106. None of the funds appropriated in this Act shall be used to (1) acquire land, (2) provide for site preparation, or (3) install utilities for any family housing, except housing for which funds have been made available in annual military construction appropriation Acts.

SEC. 107. None of the funds appropriated in this Act for minor construction may be used to transfer or relocate any activity from one base or installation to another, without prior notification to the Committees on Appropriations.

SEC. 108. No part of the funds appropriated in this Act may be used for the procurement of steel for any construction project or activity for which American steel producers, fabricators, and manufacturers have been denied the opportunity to compete for such steel procurement.

SEC. 109. None of the funds available to the Department of Defense for military construction or family housing during the current fiscal year may be used to pay real property taxes in any foreign nation.

SEC. 110. None of the funds appropriated in this Act may be used to initiate a new installation overseas without prior notification to the Committees on Appropriations.

SEC. [113] *111*. None of the funds appropriated in this Act for military construction in the United States territories and possessions in the Pacific and on Kwajalein Island may be used to award any contract estimated by the Government to exceed $1,000,000 to a foreign contractor: *Provided*, That this section shall not be applicable to contract awards for which the lowest responsive and responsible bid of a United States contractor exceeds the lowest responsive and responsible bid of a foreign contractor by greater than 20 per centum.

(TRANSFER OF FUNDS)

SEC. [115] *112.* Unexpended balances in the Military Family Housing Management Account established pursuant to section 2831 of title 10, United States Code, as well as any additional amounts which would otherwise be transferred to the Military Family Housing Management Account during *the current* fiscal year [1990], shall be transferred to the appropriations for Family Housing provided in this Act, as determined by the Secretary of Defense, based on the sources from which the funds were derived, and shall be available for the same purposes, and for the same time period, as the appropriation to which they have been transferred.

SEC. [116] *113.* Not more than 20 per centum of the appropriations in this Act which are limited for obligation during the current fiscal year shall be obligated during the last two months of the fiscal year.

(TRANSFER OF FUNDS)

SEC. [117] *114.* Funds appropriated to the Department of Defense for construction in prior years are hereby made available for construction authorized for each such military department by the authorizations enacted into law during the [first] *second* session of the One Hundred First Congress.

SEC. [119] *115.* For military construction or family housing projects that are being completed with funds otherwise expired or lapsed for obligation, expired or lapsed funds may be used to pay the cost of associated supervision, inspection, overhead, engineering and design on those projects and on subsequent claims, if any.

SEC. [121] *116.* Notwithstanding any other provision of law, any funds appropriated to a military department or defense agency for the construction of military projects may be obligated for a military construction project or contract, or for any portion of such a project or contract, at any time before the end of the fourth fiscal year after the fiscal year for which funds for such project were appropriated if the funds obligated for such project (1) are obligated from funds available for military construction projects, and (2) do not exceed the amount appropriated for such project, plus any amount by which the cost of such project is increased pursuant to law.

SEC. [122] *117.* Of the funds appropriated in this Act for Operations and maintenance of Family Housing, no more than $25,000,000 may be obligated for contract cleaning of family housing units.

SEC. [123] *118.* None of the funds appropriated in this Act may be used for the design, construction, operation or maintenance of new family housing units in the Republic of Korea in connection with any increase in accompanied tours after June 6, 1988. *(Military Construction Appropriations Act, 1990.)*

Funds are requested to continue and initiate surveys, preconstruction engineering and design, data collection, interagency coordination and research activities to determine the need, engineering feasibility, economic justification, and the environmental and social suitability of solutions to water and related land resource problems.

No new reconnaissance studies are proposed for 1991, to accommodate follow-on funding requirements for the large number of water resources studies added in the 1990 Energy and Water Development Appropriations Act.

Funds are requested for several new environmental initiatives, many of which will address mitigating environmental damages caused by water resources construction projects, including mitigation preconstruction engineering and design for Richard B. Russell Lake in South Carolina and Georgia, and for Columbia River Treaty Fishing Access Sites in Oregon and Washington.

In the area of infrastructure, funds are proposed to continue participation with the Department of Transportation in the development of magnetically levitated rail transportation (MAGLEV), and to continue the construction productivity advancement research (CPAR) program.

Proposed legislation would authorize phasing in over three years a plan to collect funds from non-Federal interests for expenditure on Flood Plain Management Services and Planning Assistance to States programs. Such collections would be deposited into the Rivers and Harbors Contributed Fund account.

Funds are requested for construction and related activity for water resources development projects having navigation, flood control, water supply, hydroelectric, and other attendant benefits to the Nation.

No new construction starts are proposed for 1991, to accommodate follow-on funding requirements for the large number of water resources projects added in the 1990 Energy and Water Development Appropriations Act.

Funding is included to serve the interests of the environment at completed and ongoing projects, including initiating land acquisition to mitigate environmental losses caused by the construction of the Tennessee-Tombigbee Waterway Project in Alabama and Mississippi. For the first time, the budget includes a package proposal for juvenile fish mitigation in the Columbia River Basin involving funding of passage facilities at four Corps of Engineers hydroelectric dams on the mainstem Columbia and Snake Rivers and a detailed mitigation analysis, prepared in cooperation with regional interests, for juvenile fish losses at Corps dams on the mainstem Columbia and Snake Rivers. Funding is also proposed for demonstration of environmental restoration techniques at completed projects under the authority of section 1135 of the Water Resources Development Act of 1986. Proposed legislation would extend the program beyond its current November 1991 expiration date. Under proposed legislation for the Department of the Interior, the National Park Service will reimburse the Corps of Engineers for work it accomplishes under authority of the Everglades National Park Protection and Expansion Act. Corps of Engineers offsetting collections from Federal funds include this reimbursement.

Outlays	1,269,671	1,184,592	962,510

Funds are requested for operation, maintenance, and related activities of the Corps of Engineers at the navigation, flood control and multiple purpose projects for which it is responsible. Work to be accomplished consists of dredging, repair, and operation of structures and other facilities, including recreation, all as authorized in the various River and Harbor and Flood Control Acts. Related activities include aquatic plant control, monitoring of completed coastal projects, wetlands research, dredging research, removal of sunken vessels, and the collection of domestic waterborne commerce statistics. This request also includes funds for National Emergency Preparedness as directed in Executive Order 11490. Proposed legislation would expand authority to collect recreation user fees on a comparable basis with other agencies. The increase in revenues, to become effective on October 1, 1990, would allow improvement of the program for construction, operation and maintenance of recreation facilities consistent with public demand.

This activity provides for flood emergency preparation, flood fighting and rescue operations, and repair of flood control and Federal hurricane or shore protection works. It also provides for emergency supplies of clean water where the source has been contaminated and, in drought distressed areas, provision of adequate supplies of water for human and livestock consumption. In the event of a major flood or coastal emergency, additional funds may be requested.

Executive direction and management.—The Office, Chief of Engineers, and 11 division offices supervise work in 36 district offices.

Board of Engineers for Rivers and Harbors.—The Board reviews reports on proposed projects and makes advisory recommendations to the Chief of Engineers.

Coastal Engineering Research Board.—The Board provides policy guidance, reviews and plans requirements for conducting coastal engineering research and development, and recommends research project priorities.

Support centers—

Engineer Automation Support Activity.—Provides a central data processing service for a variety of ADP applications.

Water Resources Support Center.—Performs studies and analyses for meeting national objectives. Develops planning techniques for comprehensive management and development of the Nation's water resources. Manages the Washington level review of all proposed water resources projects.

Funds are requested for planning, construction, and operation and maintenance activities associated with the Mississippi River and Tributaries water resources development project located in the Lower Mississippi Valley from Cape Girardeau, Missouri, to the Gulf of Mexico.

No new reconnaissance studies or construction projects are proposed for 1991, consistent with recommendations for the Construction, General and General Investigations appropriations.

Funds are requested to continue the Yazoo Basin Study reformulation report, which will identify alternative plans for achieving greater levels of environmental and urban-flood protection. In addition, funds are requested to initiate mitigation preconstruction engineering and design for completed portions of the Yazoo Backwater Project in Mississippi.

Hydraulic mining in California, debris fund.—Fees paid by mine operators in the Sacramento and San Joaquin basins for depositing mine debris in restraining works are used for their maintenance.

Maintenance and operation of dams and other improvements of navigable waters.—License fees are levied by the Department of Energy for private construction, operation and maintenance of dams, conduits, and reservoirs. Half of the fees collected are used for maintenance and operation of Federal dams and other navigation structures, and for improvement of navigable waters. License fees are also levied by the Department of Energy for benefits accruing directly as the result of headwater improvements by Federal projects. One hundred percent of these fees collected are used for maintenance and operation of Federal dams and other navigation structures, and for improvement of navigable waters.

Payments to States.—Three-fourths of the money received from lease of Federal lands acquired for flood control, navigation, and allied purposes is paid to the State in which such property is situated for public schools, roads, or other expenses of county government.

The Inland Waterways Trust Fund was established in accordance with the Inland Waterways Revenue Act of 1978, Public Law 95–502, and amended by the Water Resources Development Act of 1986, Public Law 99–662. Revenue is derived from taxes imposed on fuel in vessels engaged in commercial waterway transportation and is used for 50 percent of the construction and rehabilitation costs of specified inland waterway projects. See "Construction, General" for appropriation language.

The Harbor Maintenance Trust Fund was established in accordance with the Harbor Maintenance Revenue Act of 1986 (Public Law 99-662, Title XIV). Under existing law, revenue is derived from: (1) receipts from a 0.04 percent *ad valorem* user fee imposed on commercial cargo loaded and unloaded at specified U.S. ports open to public navigation, and (2) collection of charges and tolls imposed by the Saint Lawrence Seaway Development Corporation.

The Harbor Maintenance Revenue Act also authorized expenditures from the Trust Fund to fully finance the operation and maintenance of the Corporation, to finance up to 40 percent of Corps of Engineers' harbor operation and maintenance (O&M) costs, including O&M costs associated with Great Lakes navigational projects, and to rebate the U.S. portion of tolls paid on the Seaway.

For appropriation language, see the following accounts: Army Corps of Engineers, Civil "Operation and Maintenance, General"; St. Lawrence Seaway Development Corporation "Operation and maintenance"; and Department of the Treasury "St. Lawrence Seaway toll rebate program".

Under proposed legislation, additional revenue would be derived from an increase in the *ad valorem* user fee imposed on applicable commercial cargo from 0.04 percent to 0.125 percent. The legislation would increase to 100 percent the amount of the Operation and Maintenance, General harbor maintenance costs that can be financed by the Trust Fund. In addition, a portion of the increased revenue would be used to fund certain National Oceanic and Atmospheric Administration (NOAA) programs that benefit the commercial navigation industry.

ADMINISTRATIVE PROVISIONS

Appropriations in this title shall be available for expenses of attendance by military personnel at meetings in the manner authorized by section 4110 of title 5, United States Code, uniforms, and allowances therefor, as authorized by law (5 U.S.C. 5901–5902), and for printing, either during a recess or session of Congress, of survey reports authorized by law, and such survey reports as may be printed during a recess of Congress shall be printed, with illustrations, as documents of the next succeeding session of Congress; *not to exceed $5,000 for official reception and representation expenses;* and during the current fiscal year the revolving fund, Corps of Engineers, shall be available for purchase (not to exceed [150] *170* for replacement only) and hire of passenger motor vehicles.

Public Law 98-94 provided for accrual funding of the military retirement system and for the establishment of a Department of Defense Military Retirement Fund in 1985. The fund is financed through: (a) Federal contributions for retired pay and retirement pay of military personnel on the retired lists of the Army, Navy and Marine Corps, and Air Force, including the reserve components thereof, and retainer pay for personnel of the Inactive Fleet Reserve; (b) Government contributions consisting of a normal cost accrual percentage applied to basic pay amounts contained in the military personnel appropriations; and (c) interest on investments.

The status of the fund is as follows:

The 1985 Defense Authorization Bill, Public Law 98-525, provided for the accrual funding of certain new education benefits to be provided to active duty military personnel under the authority of Chapter 30, Title 38 U.S.C., and to Selected Reserve personnel under the authority of Chapter 106, Title 10 U.S.C. Public Law 100-48 made this program permanent. The fund is financed through: (a) actuarially-determined Government contributions from the Department of Defense military personnel appropriations; and (b) interest on investments. Section 9034, Public Law 101–165, the FY 1990 Department of Defense Appropriations Act, relieved the Army active component from the obligation to make payments into the Fund during FY 1990. Funds are transferred to the Veterans Administration to make benefit payments to eligible personnel. The status of the fund is as follows:

NOTES

Includes $300 thousand in 1989 for penalty mail costs financed primarily from consultant services savings. In 1990 and 1991, these costs are in the Department of Education, Departmental management, Program administration account.

Excludes $100,000 thousand in budget authority in 1991 for activities transferred to Department of Education, Office of Elementary and Secondary Education, School improvement account. The comparable amount for 1990 ($50,000 thousand) is included above.

This account funds activities authorized under chapter 1 of title I of the Elementary and Secondary Education Act of 1965 and section 418A of the Higher Education Act of 1965.

Grants for the disadvantaged.—

Basic grants to local educational agencies.—Funds enable local educational agencies to provide supplementary compensatory education services for disadvantaged elementary and secondary school students. Funds are allocated to local school districts on the basis of a statutory formula.

Concentration grants.—Funds provide additional resources for compensatory education programs to local educational agencies that have high concentrations of children from low-income families.

Capital expenses.—Funds assist local educational agencies to pay for certain additional capital costs associated with providing equitable compensatory education services to children in non-public schools.

Even start.—Discretionary grants are made to local educational agencies to operate projects that provide educational services to children under 7 years of age and basic education to their parents.

State agency programs.—Funds enable State educational agencies to provide supplementary compensatory education services to migrant children, handicapped children in State operated programs, and neglected or delinquent children in State institutions. In each of the three State agency programs, funds are allocated to the appropriate State agencies on the basis of an annual count of eligible children.

General and special funds—Continued

COMPENSATORY EDUCATION FOR THE DISADVANTAGED—Continued

State administration.—This activity provides funds to State educational agencies to administer the programs authorized under chapter 1.

State program improvement grants.—Funds assist States in their efforts to help local educational agencies to improve ineffective Chapter 1 projects.

Evaluation and technical assistance.—Funds provide technical assistance to local school districts and State educational agencies and support activities to evaluate Chapter 1 programs.

Rural technical assistance centers.—Funds support regional centers that assist State and local educational agencies to improve education services for disadvantaged students in rural and small schools.

Presidential merit schools.—Funds for this program, whose authorization is pending before Congress, would provide awards to public and private elementary and secondary schools that have made substantial progress in raising student educational achievement, creating a safe environment, and reducing the dropout rate. Funds would be allocated to States through a formula grant.

Migrant education programs.—Funds support grants to institutions of higher education and other non-profit agencies that assist migrant students to earn a high school equivalency certificate or to complete their first year of college.

Reimbursable program.—Amounts in this activity consist of: payments made to the Department of Education as audit recoveries that the Secretary has granted back to the audited agency under the terms of section 456 of the General Education Provisions Act; and funds appropriated in other accounts for consolidation grants to the insular areas.

Maintenance and operations.—Payments are made to school districts when enrollments and the availability of revenues from local sources have been adversely affected by Federal activities. Funds are provided to districts under section 3(a) for children who live on and whose parents work on Federal property or are on active duty in the uniformed services, and under section 3(b) for children connected with federally subsidized, low-rent housing. For 1991, funds available for section 3(a) payments would total $578.5 million and funds available for section 3(b) payments would total $25 million.

In 1991, payments would be made to about 1,000 school districts for 300,000 children under section 3(a) and to 800 school districts for 500,000 children under section 3(b). Section 2, which provides payments to certain districts having a partial loss of tax base, would be funded at $15.4 million.

Disaster assistance.—For 1991, $15 million is requested for assistance to school districts that have suffered damage to their facilities from a major disaster.

Construction.—Budget authority of $27 million is requested for 1991 for construction of school facilities in school districts that serve children connected with Federal activities.

Educational improvement.—

State block grants.—States and outlying areas receive grants, according to a statutory formula based on school-age population, to improve the quality of elementary and secondary education for children in public and private schools. Of the total allotted to each State, the State may reserve up to 20 percent for State use and must distribute the remainder to local educational agencies. Funds will also be used for a national study of the program.

National programs.—Funds support the National Diffusion Network, inexpensive book distribution, arts in education, law-related education, and blue ribbon schools.

Drug-free schools and communities.—

State grants.—Under this program, States and outlying areas receive grants, according to a statutory formula based on school-age population and previous year's share of allocations under chapter 1 of title I of the Elementary and Secondary Education Act, to assist in combating the abuse of drugs and alcohol by the Nation's children and youth.

School personnel training.—Funds are used to establish, expand, or enhance programs and activities for the training of teachers and other school personnel in drug and alcohol abuse education and prevention.

National programs.—Funds support programs at institutions of higher education, programs for Indian youth, programs for Native Hawaiians, regional centers, and Federal activities for preventing alcohol and drug abuse.

Emergency grants.—Grants are awarded to provide special assistance to school systems with a high incidence of drug abuse.

Strengthening teaching and administration.—

Eisenhower mathematics and science education.—

State grants.—Funds available for this activity are used by State and local educational agencies to carry out programs to train teachers and improve instruction in mathematics and science. States and outlying areas receive grants based on their school-age population and previous year's share of allocations under chapter 1 of title I of the Elementary and Secondary Education Act. Each State must spend 75 percent of its grant for elementary and secondary education programs and 25 percent for higher education programs.

National programs.—Funds support model demonstration programs of national significance in mathematics and science instruction.

Fund for the Improvement and Reform of Schools and Teaching (FIRST).—Funds support projects to improve the performance of elementary and secondary school students and teachers and to develop family-school educational partnership activities.

Territorial teacher training.—Grants are provided to the State educational agency in each Territory to provide assistance to train elementary and secondary school teachers.

Leadership in educational administration (LEAD).—This program supports the operation of one training and assistance center in each State for upgrading the leadership skills of elementary and secondary school administrators.

Christa McAuliffe fellowships.—This program provides fellowship awards to outstanding teachers to enable and encourage them to continue their education or to develop educational projects and programs. In 1989, 80 fellows received awards.

Mid-career teacher training.—Grants are made to institutions of higher education to establish and maintain programs designed to prepare for teaching careers individuals who already possess baccalaureate degrees and who have prior job experience in relevant fields.

Alternative certification of teachers and principals.—One-time grants would be made to States for additional costs of testing, establishment, or other activities related to alternative teacher and principal certification systems that open entry to teacher and principal positions to individuals with demonstrated knowledge of subject areas and proven administrative competence.

Presidential awards for excellence in education.—Awards of up to $5,000 each would be given to excellent elementary and secondary school teachers in every State.

Magnet schools assistance.—

Magnet schools in desegregating districts.—Funds are provided to local educational agencies for use in operating magnet school programs that are part of approved desegregation plans. In 1989, 54 local educational agencies received awards.

Magnet schools of excellence.—Grants would be awarded to local and intermediate educational agencies and consortia for use in magnet schools, without regard to the presence of desegregation plans.

Fund for innovation in education.—Funds support projects to identify and disseminate innovative educational approaches, including programs for technology education, computer-based education, comprehensive school health education, and innovative alcohol abuse education.

Javits gifted and talented students education.—Funds support projects designed to identify and meet the special educational needs of gifted and talented students and a national center for research and development in the education of gifted and talented children and youth. Economically disadvantaged students must be included among those to be served.

Education for homeless children and youth.—

Grants for State activities.—Funds are awarded to each State based on its share of allocations under chapter 1 of title I of the Elementary and Secondary Education Act, and to outlying areas, and are used to support a State office to coordinate education for homeless children and youth.

Grants for exemplary programs.—Competitive grants are awarded to local educational agencies for exemplary programs that successfully meet the needs of homeless children and youth and for dissemination of information about such programs.

Women's educational equity.—Grants support the development of educational materials and model projects to promote educational equity for women and girls. In 1989, 29 grants were awarded.

Training and advisory services.—Grants are made to State educational agencies and regional desegregation assistance centers to enable them to provide technical assistance, at the request of school districts, in the preparation, adoption, and implementation of plans for the desegregation of public schools and in the development of effective methods of coping with special educational problems occasioned by desegregation.

Dropout prevention demonstrations.—Competitive awards would be made for structured demonstration projects to test new approaches to dropout prevention and reentry. Funds would also support an evaluation of the program.

General assistance to the Virgin Islands.—Under this program, an award is made to the U.S. Virgin Islands to improve public education.

Ellender fellowships.—One award is made to the Close Up Foundation to provide fellowships to secondary school students to enable them to participate in the Foundation's week-long educational program on the U.S. Government.

Educational partnerships.—Funds are awarded to partnerships of local educational agencies or institutions of higher education with business or non-profit organizations to apply the resources of the community to the needs of elementary and secondary or higher education and encourage businesses to work with students.

Funds made available under this account were reappropriated by the Supplemental Appropriations Act, 1987 (Public Law 100-71) from funds enjoined in *United States of America* v. *Board of Education of the City of Chicago*. The funds were reappropriated for the specific purpose of settling this case.

The Department of Education provides these funds to the Chicago Board of Education in annual increments upon receipt of plans from the school district. The plan for 1989 was agreed to late in the year and the grant award was not made until early 1990.

Grants to local educational agencies and Indian-controlled schools.—Formula grants are made to local educational agencies (LEAs) and tribal schools for supplementary elementary and secondary education programs to meet the special educational and culturally-related academic needs of Indian children. In 1989, 1,162 formula grants were made to LEAs and certain tribal schools enrolling approximately 347,000 Indian students. Discretionary awards are authorized to be made to Indian-controlled schools on or near reservations and to LEAs that have been in existence less than three years that serve substantial numbers of Indians. In 1989, 20 discretionary awards supported special projects at 18 Indian-controlled schools.

Special programs for Indian students.—Funds support planning, pilot, and demonstration projects; educational service projects; educational personnel training; resource and evaluation centers; special projects for the education of gifted and talented children; and fellowships.

Special programs for Indian adults.—Competitive grants are made to Indian tribes, institutions, and organizations for programs to improve educational opportunities for Indian adults.

Program administration.—Funds support the administrative expenses of the Office of Indian Education and the National Advisory Council on Indian Education.

Bilingual education.—These programs support the establishment, operation, and improvement of programs in local schools to prepare children of limited English proficiency to enter an all-English-language educational program. In 1991, the Department will hold a special competition for $12 million, limited to school districts that have experienced a recent influx of large numbers of limited English proficient students. Aid is also given to train educational personnel and parents to serve limited English proficient children, to build State capacity to improve educational services for limited English proficient children in school districts, and for information dissemination, studies, and evaluations.

Immigrant education.—The immigrant education program provides grants to school districts to help finance educational services for immigrant students. Participation is limited to districts with 500 immigrant students or districts in which immigrant children represent at least 3 percent of the enrollment. Awards are made to State educational agencies, which make subgrants to eligible local educational agencies. Legislation has been proposed to require that funds be used to supplement, not supplant, local educational funds.

State grants.—

Grants to States.—This formula grant program assists States in providing special education and related services to handicapped children. In order to participate in the program, States must provide services to all handicapped children ages 6 through 17. States must provide services to all handicapped children ages 3 through 5 by 1991. Handicapped children ages 18 through 21 must also be served, except when such services would be inconsistent with State law or practice, or the order of any court. To be eligible for a grant, each State is required to submit an acceptable State plan which requires the development and use of an individualized education program for each handicapped student, the establishment of procedural safeguards for all handicapped children and their parents, and the training of personnel for these special education programs.

Preschool grants.—This formula grant program assists States in providing special education and related services to handicapped children ages 3 through 5. Under this program, States must provide services to all handicapped children ages 3 through 5 by 1991.

Grants for infants and families.—This formula grant program assists States: (1) in developing and implementing a statewide program of early intervention services for handicapped infants and toddlers, from birth through age 2, and their families; (2) in enhancing their capacity to provide quality early intervention services; and (3) in expanding and improving existing early intervention services. The statewide program must be implemented by the fourth year of a State's participation and services must be provided to all handicapped infants and toddlers by the fifth year of a State's participation.

Legislation is pending to reauthorize the special purpose funds discretionary activities under the Education of the Handicapped Act. In general, these activities support a wide range of research, demonstration, development, training, and dissemination programs that are intended to improve special education, related services, and early intervention services for infants, toddlers, children, and youth with disabilities. A request to fund these activities will be transmitted when authorizing legislation is enacted.

State grants.—

Vocational rehabilitation State grants.—The basic State grant program provides Federal matching to State vocational rehabilitation agencies to assist physically and mentally handicapped individuals to become gainfully employed. Under the 1986 amendments to the Rehabilitation Act, the Federal matching share for payments made to States which exceed their 1988 allotments will decrease 1 percent per year down to 75 percent for 1993. Services provided include counseling, vocational evaluation, work adjustment, mental and physical rehabilitation, education and vocational training, job placement, and post-employment services. Priority is given to serving those with the most severe disabilities.

The first table below presents estimates of the number of persons served and rehabilitated nationally. The second table shows relative State performance in rehabilitating severely disabled persons.

Supported employment.—Formula grants are made to assist States in developing programs with public and nonprofit organizations for training and time-limited post-employment services leading to supported employment for persons with severe disabilities.

Client assistance.—Formula grants are made to States to provide assistance in informing and advising clients and applicants of benefits available under the Rehabilitation Act and, if requested, to pursue legal or administrative remedies to ensure the protection of the rights of individuals.

Special purpose funds.—

Service and demonstration projects.—Grants are made for projects to expand services to disability groups who have been underserved in the past, to develop new and innovative approaches to meeting the needs of the severely disabled, and to provide disabled individuals special training and job opportunities in private industry.

Helen Keller Center.—The Center provides services to deaf-blind youths and adults and conducts research and training programs.

Independent living.—Grants are awarded to States and nonprofit agencies for services designed to enable severely disabled persons to live and function more independently.

Training.—Project grants are made to States and public or nonprofit agencies and organizations, including institutions of higher education, to increase the number of skilled personnel available for employment in rehabilitation settings.

National Institute on Disability and Rehabilitation Research.—The Institute carries out a comprehensive and coordinated program of rehabilitation research. Through grants and contracts, it supports research and training centers, rehabilitation engineering centers, research and demonstration projects, information dissemination and utilization projects, and career development activities. In the reimbursable program, the National Institute of Mental Health co-sponsors research and training centers for rehabilitating persons disabled by mental illness.

Technology assistance.—Grants are made to States to assist them in developing statewide programs that facilitate the provision of assistive devices and services to disabled persons. Funds also support technical assistance, an evaluation of the Technology Assistance State grants program, and model projects.

Evaluation.—Studies are conducted to evaluate the impact and effectiveness of various programs authorized under the Rehabilitation Act.

This new account consolidates three prior accounts, each of which included a grant to a particular institution which serves handicapped students. These institutions share a special relationship with the Federal Government including an authorization for Federal appropriations. These grants are the largest single source of funds for each institution.

American Printing House for the Blind.—The Federal appropriation supports the production of free educational materials for blind students below the college level. In 1989, the Federal appropriation represented 41.7 percent of the institution's total budget.

National Technical Institute for the Deaf.—This national residential center provides postsecondary technical education for deaf people to prepare them for employment. In 1989, Federal appropriations represented 83 percent of the Institute's operating budget. Funds are also provided for endowment matching grants.

Gallaudet University.—This private, nonprofit educational institution provides an undergraduate higher education program for deaf persons, a preparatory program for students who need such training to qualify them for college admission, a graduate program in fields of study related to deafness, and continuing education and public service programs.

Gallaudet also operates on campus the Model Secondary School for the Deaf, which serves deaf students of high school age, and the Kendall Demonstration Elementary School for younger children. In connection with their instructional programs, these schools also develop materials and methods for teaching deaf children.

In 1989, Federal appropriations represented 68 percent of the University's operating budget and 100 percent of the operating budgets of the related elementary and secondary schools. Funds are also provided for endowment matching grants.

Evaluation Studies.—For 1991, funds are requested to conduct a comprehensive evaluation of postsecondary education programs for persons who are deaf.

Vocational education.—

The Smith-Hughes Act of 1917 (Public Law 64–347), as amended, provides a permanent appropriation for vocational education basic grants and national programs.

Adult education—

State programs.—Formula grants are made to States to eliminate functional illiteracy among the Nation's adults and to assist adults in obtaining a high school diploma or its equivalent.

National programs.—Funds support discretionary activities that assist States in evaluating the status and progress of adult education. These activities include a longitudinal study of adult education services and participants and, beginning in 1991, a national literacy clearinghouse.

Literacy training for homeless adults.—Funds provide discretionary grants to States to support special literacy services for the homeless.

Workplace literacy partnerships.—Funds support discretionary grants for projects to provide literacy and basic skills education in the workplace.

English literacy grants.—Funds are used for State grants and demonstration projects to promote English literacy for limited-English proficient adults.

Technology education demonstrations.—Funds are used for discretionary grants for model demonstrations to improve technology education.

[1] Includes in all years institutional matching share of defaulted loans assigned to the Education Department. Includes in 1989 an adjustment to defaulted loan principal.

This account finances several programs of aid to students in postsecondary education.

Pell grants.—Undergraduate students establish eligibility for these grants through application to a federally managed system of assessment of need. This need assessment evaluates the individual and parental ability to contribute towards a student's postsecondary education. The 1991 appropriation includes up to $371 million for unfunded Pell costs in prior year programs ($265 million for the 1989-90 award year and $106 million for the 1990-91 award year). In 1990 the Secretary will reduce awards to account for the 1990 sequester pursuant to Public Law 99-177.

The 1991 request of $5,277 million reflects cost savings contained in appropriation language. Without these savings, the request (assuming a $2,300 maximum award) would be $5,495 million.

Work-study.—Federal grants are awarded by formula to qualifying institutions, which develop and provide part-time jobs for eligible undergraduate and graduate students with demonstrated need. Federal grants in most cases pay 70 percent of a student's earnings and the remainder is paid by the employer. Hourly earnings must not be less than the Federal minimum wage.

Supplemental educational opportunity grants.—Funds are allocated by formula among qualifying institutions, which use these funds at their discretion to award grants to undergraduate students, with priority for those students with exceptional need. The Federal share of such grants may not exceed 85 percent of the total grant.

Income contingent loans.—Under the income contingent loan (ICL) program, institutions operate revolving loan funds capitalized in part with Federal contributions distributed to participating institutions. Loans are made at the institution's discretion, usually to students with demonstrated need, and carry unsubsidized interest rates. Repayment rates depend on post-school earnings: as income increases, so does the percentage of income required for repayment. In 1991, the increase in Federal contributions would increase the number of institutions and students served.

Perkins loans—Cancellations.—Under the Perkins loan (formerly national direct student loan (NDSL)) cancellation program, institutional revolving funds are reimbursed for indebtedness cancelled as a result of a borrower engaging in certain public service occupations. Appropriations in 1991 are not needed because sufficient unobligated balances are available to fund expected cancellations in that year. Appropriations will again be required in 1992 and beyond.

The following tables display student aid funds available, the number of aid awards, average awards, and unduplicated count of students receiving awards, including aid under the guaranteed student loan (GSL) program, under the budget request. The tables include the effects of matching funds wherever applicable. ICL and Perkins loan amounts also reflect other available capital in institutional revolving funds, including loan collection and loan cancellation receipts. Guaranteed student loan amounts reflect the capital actually loaned, not the Federal costs of those loans.

[1] Includes adjustment of $2,524 million to 1989 start of year outstanding balance.

[2] Includes terminations that result in lender and guarantee agency liabilities.

The guaranteed student loan (GSL) program is designed to promote the availability of loans from banks and other lenders to students and their parents to help meet the costs of attending participating universities, colleges, and other postsecondary institutions after taking into consideration family financial resources and student self-help. This is accomplished through the provision of Federal reinsurance against borrower default as well as through substantial Federal interest subsidy payments to lenders. In general, the program is administered by State and private nonprofit guarantee agencies that serve as intermediate loan insurers, defaulted loan collectors, and providers of various services to lenders. The Government also provides substantial subsidies to these agencies. Through July 1984, the Federal Government also provided direct loan insurance and, in such cases, continues to be responsible for defaulted loan collection and providing assistance to lenders.

Three types of guaranteed loans are currently available through the program: under the Stafford loan component, students may borrow highly subsidized loans; under the PLUS loan component, parents can borrow less-subsidized loans; and under the Supplemental Loans for Students (SLS) component, formerly part of PLUS, students also may borrow less-subsidized loans. Each program has both annual and cumulative limits on loan amounts. All loans can be used only to meet educational expenses. Evidence of financial need is required for a student to receive a Stafford student loan.

The Federal Government pays lenders a quarterly special allowance throughout the life of each Stafford loan. This allowance generally assures lenders a total yield on new loans equal to the current 91-day Treasury bill rate plus 3¼ percentage points or the interest rate to the borrower, whichever is higher. The Government is also liable for up to 100 percent of costs related to borrower default, death, disability, and bankruptcy. The budget proposes increased guarantee agency default liability to shift a small portion of this risk to a major beneficiary of the program.

Under the Stafford loan component, the Federal Government pays the interest obligation (generally 8 percent on new loans) of eligible borrowers while they are in school and during grace and certain deferment periods. Federal interest benefit costs are offset by an origination fee of 5 percent of loan principal which is charged to borrowers.

Under the PLUS and SLS loan components, all students, and parents of dependent students, may borrow to meet the student's educational expenses without any demonstrated financial need. Unlike the Stafford loan program, the borrower's interest obligation during in-school, grace, and deferment periods (up to the 52-week Treasury bill rate plus 3¼ percentage points, not to exceed 12 percent) is not paid by the Federal Government.

Under a fourth component, consolidation loans, student borrowers meeting certain debt level criteria and with loans from multiple sources may consolidate these loans into a single new long-term loan. Borrowers may consolidate Stafford, Perkins (formerly NDSL), and SLS loans, PLUS loans made to students prior to enactment of the SLS program, and Health Professions Student Loans (HPSL). The interest rate is the greater of 9 percent or the weighted average of the interest rates of the loans discharged by consolidation, rounded to the nearest whole percent. Most consolidation activity is a roll-over of current debt from a Federal perspective, with only Perkins and HPSL consolidation constituting new Federal loan guarantees. Since this new loan volume is minimal (less than $100 million a year), consolidation loan data are included in Stafford loan data.

The Federal Government also pays administrative cost allowances to guarantee agencies.

Under the 1990 sequester, pursuant to Public Law 99-177, for new loans made between October 1, 1989 and December 31, 1989, first year special allowance payments are reduced by .25 percentage point, and the origination fee paid by students is increased by .5 percentage point to 5.5 percent.

Federal receipts primarily include collections on defaulted loans and reimbursements from guarantee agencies for their default collections. One-time savings of $197 million will be achieved in 1988, 1989, and 1990 by applying excess guarantee agency reserves to agency default claims against the Government and by other means. In addition, outstanding advances (interest-free loans) of $31 million to guarantee agencies will be repaid in 1990; $16 million was repaid in 1989. Also included are Student Loan Marketing Association (Sallie Mae) repayments of loans from the Federal Financing Bank; these transactions are treated as part of the cost of the GSL program.

Total loan volume insured under all program components under the President's program is expected to be $11 billion in 1991, resulting in outstanding loans at the end of 1991 of $54.3 billion.

The text tables that follow provide additional information on the program and reflect the effect of proposed legislative changes.

Costs to the Federal Government related to a particular loan accrue throughout the period the loan is outstanding, which can be extended up to 25 years. Federal costs on Stafford loans are significantly reduced through the origination fees, used to offset interest subsidy costs. As the following table illustrates, net obligations for the first year of loans may be negative. Costs in the budget year, therefore, are determined largely by the cost of loans outstanding at the start of the year.

All new loans are insured directly by guarantee agencies, then reinsured by the Federal Government. The following table displays Federal payments to these agencies, separated into net payments for loan guarantees and net payments for agency overhead costs.

[1] The "Program and Financing" schedules provided for this account reflect net default collections, gross collections less agency retentions, as the reimbursement received by the Government.

Increased efforts are being made to collect outstanding defaults and to reduce the incidence of default. Final default reduction regulations were issued in 1989 to curb defaults at participating schools. Full implementation is expected to occur toward the end of 1991. Legislative changes in the Omnibus Budget Reconciliation Act of 1989 (P.L. 101-239) focus on decreasing defaults in the SLS program. Increased efforts to collect outstanding defaults include: referring both insured and reinsured defaulted loans to private collection agencies;

sharing information on defaulted loans with consumer credit bureaus; computer matches to locate defaulters; increased litigation; increased lender and guarantee agency due diligence requirements; closer monitoring of collection activity; review of debt compromise policies to ensure maximum collections on defaults; and deduction from Federal income tax refunds of defaulted loan amounts. Outstanding defaults owed to the Federal Government in 1989–91 are as follows:

Note.—Same as "Status of Direct Loans" schedules provided for this account, except that this schedule excludes advances to guarantee agency reserve funds.

Frequently used GSL default rate measures are the gross and net cumulative default rates. The former represents cumulative defaults divided by cumulative loans that have matured (i.e., entered repayment). The latter represents cumulative defaults minus cumulative collections on defaults, divided by cumulative matured loans. These rates are the best measures of the long-term default costs of the entire GSL portfolio and the best indicators of longer term trends in default costs.

END OF YEAR GUARANTEED LOAN STATUS

[In thousands of dollars]

	1989 actual	*1990 est.*	*1991 est.*
Cumulative loans disbursed	93,361,750	104,415,750	115,434,750
Cumulative loans matured	73,771,000	83,988,000	94,614,000
Cumulative defaults	10,474,000	12,507,000	14,532,401
Cumulative collections	3,331,000	4,135,000	5,043,000
Gross default rate	14.2%	14.9%	15.4%
Net default rate	9.7%	10.0%	10.0%

Another measure represents defaults in a given year divided by the average amount of loans in repayment during that year. This annual rate is more comparable to default rates calculated by commercial lending institutions. The volatility of this rate, depending as it does on annual flows into and out of repayment, makes this a less useful indicator in assessing longer term default trends.

Excludes $907 thousand in budget authority in 1991 for activities transferred to Department of Education, Office of Elementary and Secondary Education, School improvement programs. The comparable amount for 1990 ($907 thousand) is included above.

Includes $1,784 thousand in 1989 for penalty mail costs financed primarily from consultant services savings. In 1990 and 1991, these costs are in the Department of Education, Departmental management, Program administration account.

Aid for institutional development—

Strengthening historically black colleges and universities.—Funds under this heading are for grants to help historically black undergraduate and graduate institutions equalize educational opportunity and strengthen their management and fiscal operations so that they may become self-sufficient.

Endowment grants for historically black colleges and universities.—Funds support matching grants to these institutions to help them build their endowments.

Other.—Funds would support grants for strengthening institutions and new endowment grants for institutions other than historically black colleges and universities.

General and special funds—Continued

HIGHER EDUCATION*—Continued

Other aid for institutions—

Program development.—In 1991, funds would support projects under: the Fund for the Improvement of Postsecondary Education, to address problems and encourage improvements in postsecondary education; the minority science improvement program, to improve science education at predominantly minority institutions; international education and foreign language study programs, to help strengthen American education in foreign languages and area and international studies; and the student literacy corps, to provide literacy training for the disadvantaged.

Academic facilities—

Interest subsidy grants.—Funds would meet mandatory interest subsidy costs of construction loan commitments made prior to 1974.

Aid for students—

Special programs for the disadvantaged.—This program (TRIO) supports projects to help individuals from disadvantaged backgrounds enter and complete college. In 1991, funds would also support the final year of an evaluation of these programs and a math/science Upward Bound initiative in coordination with the National Science Foundation.

Other support services.—In 1991, funds would support projects under the legal training for the disadvantaged program and the school, college, and university partnerships program to assist individuals from disadvantaged backgrounds.

Scholarships and fellowships.—In 1991, funds would support: the national science scholars program for outstanding undergraduate students studying in the areas of mathematics and science; Robert C. Byrd honors scholarships for outstanding students who show promise of continued excellence; the minority participation in graduate education program to support talented minority students as they increase their preparation for graduate study; the graduate assistance in areas of national need program to assist needy graduate students of superior ability studying in fields of national need; Patricia Roberts Harris graduate fellowships to assist minorities and women to undertake graduate study in fields in which they have been traditionally underrepresented; Paul Douglas teacher scholarships for outstanding students who intend to teach at the elementary and secondary level; and non-competing continuation grants for the Jacob K. Javits fellowships and the Patricia Roberts Harris public service fellowships.

This account also records collections on outstanding prior year loans under the Cuban and law enforcement education loan programs. No new loans are made under these activities. Outstanding defaults, as well as delinquent loans, are as follows:

Howard University is a private, nonprofit educational institution consisting of 18 schools and colleges. Federal funds are used to provide partial support for the University programs as well as for the teaching hospital facilities. In 1989, direct Federal appropriations represented 65 percent of the University's educational and general expenditures. Policies to reduce the Federal tuition subsidies to foreign students have been developed and will be implemented in 1990.

HIGHER EDUCATION FACILITIES LOANS

The Secretary is hereby authorized to make such expenditures, within the limits of funds available under this heading and in accord with law, and to make such contracts and commitments without regard to fiscal year limitation, as provided by section 104 of the Government Corporation Control Act (31 U.S.C. 9104), as may be necessary in carrying out the program for the current fiscal year. For the fiscal year [1990] *1991*, no new commitments for loans may be made from the fund established pursuant to title VII, section 733 of the Higher Education Act, as amended (20 U.S.C. 1132d–2). *(Department of Education Appropriations Act, 1990.)*

Program operations.—Title VII, Part C, of the Higher Education Act of 1965 authorizes direct loans at 5.5 percent interest, repayable within 50 years, to colleges, universities, and higher education building agencies for the construction, reconstruction, or renovation of academic facilities. No new loan commitments have been made since 1981, and no new commitments are planned for 1991 and beyond.

Financing.—Loan capital for this program has been provided both through appropriations and the sale of participation certificates which are backed by pools of existing higher education facilities loans held by the Federal Government. All participation certificates held by this account were redeemed as of September 30, 1988.

Interest is payable to Treasury on the amount of appropriations paid out for loan capital and remaining outstanding, less the average undisbursed cash balance in the fund during the year. The interest rate certified by Treasury for payment from the account was 9.125 percent in 1989 and is 9.0 percent in 1990.

The appropriation, along with repayments on outstanding loans, interest revenue, and investment income, is used to pay operating expenses and to repay interest costs to Treasury. The status of defaulted loans is shown in the table below:

This program finances direct loans at 5.5 percent interest to schools and colleges for construction and renovation of undergraduate academic facilities, student and faculty housing, and other educational facilities.

Under section 761(d) of the Higher Education Act, capital to finance new loans is borrowed from the Treasury at an interest rate based on the average yield for long-term Treasury securities during the month before loan commitments are made to schools. Loan commitments are usually made in the fourth quarter of the fiscal year. The Secretary pays 8.90 percent interest on funds borrowed for 1989 loans. Appropriations finance the difference between the total interest received from borrowers and the higher amount of interest owed to Treasury each year.

[1] Adjustments in 1989 represent reconciliations with inventory records.

Program operations.—Loans in this account were made for construction and renovation of college housing facilities prior to 1987 under title IV of the Housing Act of 1950. The Higher Education Amendments of 1986 repealed title IV and gave the Secretary authority to manage outstanding college housing loans under title VII, Part F of the Higher Education Act. There is no new loan activity in this account. New loans made after 1986 under Part F are financed in the College Housing and Academic Facilities Loans Account.

Financing.—Loan capital for this program was provided primarily through Treasury borrowings and the sale of participation certificates which were backed by pools of college housing loans held by the Federal Government. The participation certificates sold by the Government National Mortgage Association (GNMA) and held by this account, were redeemed as of September 30, 1988. As of September 30, 1989, $711 million in loan capital is still due the Treasury under a note that comes due January 1, 1991 that bears interest at 2.75 percent annually. In January 1991, the outstanding Treasury debt will be refinanced under a new note projected to bear interest at 7 percent annually.

Available resources (loan repayments, interest revenue, and other income in excess of operating expenses) will be used to redeem a portion of the agency's debt in outstanding Treasury borrowings, as is being done in 1990 and as was done in the three preceeding years. If there are no additional loan sales in 1991, approximately $87 million will be repaid to Treasury in 1990 and $15 million will be repaid in 1991; $177 million was repaid in 1989.

The budget provides $50 thousand in 1991 to fund facilities management and property disposition expenses related to loan collection action. Fees and commissions associated with loan sales will be financed from this account.

A total of $3.8 million was collected in 1989 from institutions in default. The status of defaulted loans is shown in the table below:

Research, statistics, and assessment activities aid students, teachers, administrators, and decisionmakers at all levels of education, as well as parents and other members of the public.

Research.—Research centers focus on topics of national concern in education. Additional individual projects and field-initiated research complement this work.

Regional laboratories determine and help meet the educational research and development needs in specified geographic regions. Study groups and national leadership conferences are also supported.

The Educational Resources Information Center system makes education literature accessible through computerized abstracts and indexes. Dissemination activities provide timely information to the public and educational practitioners.

Statistics.—Statistics are collected on educational institutions and on individuals to monitor trends in education. A coordinated program of statistical services is supported that provides assistance to States in developing comparable data bases and analyses of the implications of data.

Assessment.—The National Assessment of Educational Progress surveys young Americans to provide reliable information about the nation's attainment in certain important skill areas. Collection of both nationally- and State-representative data is planned.

Evaluation of reform.—State and local efforts in education reform, restructuring, and academic improvement will be evaluated to provide information about "lessons learned" for others interested in pursuing such improvement efforts.

Dropout prevention.—Research and development activities will be conducted both at a research center and through individual projects to provide useful information for States and local school districts to improve the educational performance of secondary students and reduce the number of dropouts.

Principal training.—An initiative to improve the training of school principals will utilize proven effective principals to train prospective principals in a year-long, on-the-job training program.

Education summit follow-up.—A variety of activities will be carried out to provide useful information and help track the Nation's progress, in some cases State by State, toward the national performance goals in education to be established by the President and the Governors, and to implement new methods of State and local flexibility in program management linked to enhanced accountability.

Public library services.—State formula grants improve access to public library services, with emphasis on target groups of economically disadvantaged, limited English-proficient, older readers, physically handicapped and blind, and State institutionalized persons.

Public library construction.—State formula grants support the construction of new buildings and the acquisition, expansion, remodeling, and alteration of existing buildings, and the initial equipment for any such buildings.

Interlibrary cooperation.—State formula grants support projects that link two or more types of libraries through networking, resource sharing projects, or other cooperative activities.

Library literacy programs.—Small discretionary grants are awarded primarily to local public libraries to assist in promoting volunteerism, acquiring materials, and using library facilities for literacy projects.

Training and demonstrations.—Discretionary grants provide both pre-service and in-service training for librarians and support research directed toward the improvement of library services.

Research libraries.—Discretionary grants are awarded to help strengthen the collections of major public and private research libraries and to help make these collections available to other libraries and users.

College library technology.—Discretionary grants primarily support the acquisition of equipment necessary for the expansion of resource sharing among institutions of higher education.
